The Makeup Artist Handbook

The “exquisite and richly illustrated” New York Times bestseller from the renowned makeup artist, “a retrospective written for all

women, everywhere” (Vogue France). Makeup, as we know it, has only been commercially available in the last 100 years, but applying decoration to the face and body may be one of the oldest global social practices. In *Face Paint*, Lisa Eldridge reveals the entire history of the art form, from Egyptian and Classical times up through the Victorian age and golden era of Hollywood, and also surveys the cutting-edge makeup science of today and tomorrow. *Face Paint* explores the practical and idiosyncratic reasons behind makeup’s use, the actual materials employed over generations, and the glamorous icons that people emulate, it is also a social history of women and the ways in which we can understand their lives through the prism and impact of makeup. “Makeup artist and Lancome global creative director Lisa Eldridge drops serious knowledge in *Face Paint*, her book on the history of beautifying.” —Marie Claire “Clear your coffee table and turn off YouTube—Lisa Eldridge’s book is a must read.” —Teen Vogue “The book is not only rich with history but also with a series of paintings, sketches and photographs in an intense array of colors, selected by the make-up artist herself in the most aesthetically pleasing universal statement to women you’ll ever see.” —Vogue France “*Face Paint* delves into the history of makeup, with glossy pictures to match . . . the book’s cover is striking.” —New York Post

HarperCollins

Color Theory for the Make-up Artist: Understanding Color and Light for Beauty and Special Effects analyzes and explains traditional color theory for fine artists and applies it to the make-up artist. This book is suitable for both professionals and beginners who wish to train their eye further to understand and recognize distinctions in color. It explains why we see color, how to categorize and identify color, relationships between colors, and it relates these concepts to beauty and special effects make-up. The book teaches the reader how to mix flesh tones by using only primary colors, and explains how these colors in paints and make-up are sourced and created. It also discusses the reason for variations in skin colors and undertones, and how to identify and match these using make-up, while choosing flattering colors for the eyes, lips, and cheeks. Colors found inside the body are explained for special effects make-up, like why we bruise, bleed, or appear sick. Ideas and techniques are also described for painting prosthetics, in addition to using color as inspiration in make-up designs. The book also discusses how lighting affects color on film, television, theater, and photography sets, and how to properly light a workspace for successful applications.
