RAMOS SARA

The Official CompTIA Security+ Self-Paced Study Guide (Exam SY0-601) Bloomsbury Publishing English as a Foreign Language in Saudi Arabia: New Insights into Teaching and Learning English offers a detailed discussion of key aspects of teaching and learning English in the Saudi context and offers a comprehensive overview of related research authored or co-authored by Saudi researchers. It provides readers with an understanding of the unique cultural, linguistic, and historical context of English in Saudi Arabia—with a focus on the principal factors that may influence successful teaching and learning of English in this country. Uniquely, the book looks separately at issues pertaining to in-country English learning and learners, and those pertaining to in-country English teaching and teachers. The volume also explores issues concerning Saudi learners and teachers in overseas contexts. Lastly, the book touches on the future of English as a Foreign Language and TESOL in Saudi Arabia and its implications for the field.

The Power of ICT Policies Springer

The ICDL Conferences are recognized as one of the most important platforms in the world where noted experts share their experiences. Many DL experts have contributed thought-provoking papers in ICDL 2016. These important papers are reviewed and conceptualized into ICDL on different areas of DL proceedings. The Proceedings have two volumes and over 700 pages.

Business Transformations and Financialisation MDPI

In the last decade, due to factors of ICT infrastructural and broadband maturation, rising levels of educational attainment and computer literacy, and diversification strategies, e-learning has exploded in the Middle East and North Africa (MENA) region. However, significant barriers remain in the region's e-learning development: lack of research on outcomes and effectiveness, paucity of Arabic language learning objects, monopolies and high cost of telecommunications, cultural taboos, accreditation, censorship, and teacher training. This unique volume is the first comprehensive effort to describe the history, development, and current state of e-learning in each of the 20 MENA countries from Algeria to Yemen. Each entry is expertly written by a specialist who is acutely familiar with the state of e-learning in their respective country, and concludes with a bibliography of key reports, peer-reviewed books and articles, and web resources. E-Learning in the Middle East and North Africa (MENA) proves itself as a vital compendium for a wide readership that includes academics and students, transnational program directors, international education experts, MENA government departments, commercial vendors and investors, and ICT development and regulatory agencies involved in e-learning in the Middle East.

EMERGING TECHNOLOGIES FOR EDUCATION

Artificial intelligence (AI) is taking an increasingly important role in our society. From cars, smartphones, airplanes, consumer applications, and even medical equipment, the impact of AI is changing the world around us. The ability of machines to demonstrate advanced cognitive skills in taking decisions, learn and perceive the environment, predict certain behavior, and process written or spoken languages, among other skills, makes this discipline of paramount importance in today's world. Although AI is changing the world for the better in many applications, it also comes with its challenges. This book encompasses many applications as well as new techniques, challenges, and opportunities in this fascinating area.

Records of Saudi Arabia 1961-1965: 1965 Bloomsbury Publishing

This is the first of a two-volume set (CCIS 373 and CCIS 374) that constitutes the extended abstracts of the posters presented during the 15th International Conference on Human-Computer Interaction, HCI 2013, held in Las Vegas, USA, in July 2013, jointly with 12 other thematically similar conferences. The total of 1666 papers and 303 posters presented at the HCI 2013 conferences was carefully reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The extended abstracts were carefully reviewed and selected for inclusion in this two-volume set. The papers included in this volume are organized in the following topical sections: HCI design approaches, methods and techniques; usability methods, techniques and studies; universal access and inclusion; multimodal and ambient interaction; cognitive and psychological aspects of interaction; perception and interaction; ergonomic and human modelling issues; capturing gaze, biosignals and brainwaves; development environments; product design, marketing and advertisement.

Distance and Blended Learning in Asia is a unique and comprehensive overview of open, distance learning (ODL) and information and communication technology (ICT) in Asian education and training. Broad in coverage, this book critically examines ODL and ICT experiences from Japan to Turkey and from Sri Lanka to Mongolia - drawing conclusions from the successes and failures, and recommending ways in which planning, management and practice may be developed for the world's largest concentration of adult open and distance learners. This pioneering book draws on Asian theory, research and practice to identify the strengths, weaknesses and challenges in all sectors of Asian education and training. It critically and insightfully discusses the ideas, skills and practices that are necessary to advance knowledge in leadership and management, professional development, innovation and quality assurance and research and diffusion. Distance and Blended Learning in Asia provides an insightful, informative and critical review of ODL / ICT developments in schools, open schooling, colleges, universities, workplace training, professional development and non-formal adult and community education. The book is an invaluable reference for ODL / ICT professionals, educators and students anywhere in the world, and is essential reading for all of those involved in ODL / ICT in Asia.

Women, Men and News UNESCO

This multi-authored scholarly volume explores the divide between men and women in their consumption of news media, looking at how the sexes read and use news, historically and currently, how they use technology to access their news, and how today's news pertains to and is used by women. The volume also addresses diversity issues among women's use of news, considering racial, ethnic, international and feminist perspectives. The volume is intended to help readers understand adult news use behavior--a critical and timely issue considering the state of newspapers and television news in today's multi-media news environment.

Over the past quarter century, the people of the Arabian Peninsula have witnessed a revolutionary transformation in higher education. In 1990, there were fewer than ten public universities that offered their Arabic-language curricula in sex-segregated settings to national citizens only. In 2015, there are more than one hundred public, semi-public, and private colleges and universities. Most of these institutions are open to expatriates and national citizens; a few offer gender integrated instruction; and the language of instruction is much more likely to be in English than Arabic. Higher Education Revolutions in the Gulf explores the reasons behind this dramatic growth. It examines the causes of the sharp shift in educational practices and analyses how these new systems of higher education are regulated, evaluating the extent to which the new universities and colleges are improving quality. Questioning whether these educational changes can be sustained, the book explores how the new curricula and language policies are aligned with official visions of the future. Written by leading scholars in the field, it draws upon their considerable experiences of teaching and doing research in the Arabian Gulf, as well as their different disciplinary backgrounds (linguistics and economics), to provide a holistic and historically informed account of the emergence and viability of the Arabian Peninsula's higher education revolutions. Offering a comprehensive, critical assessment of education in the Gulf Arab states, this book represents a significant contribution to the field and will be of interest to students and scholars of Middle East and Gulf Studies, and essential for those focused on higher education.

Information and Beyond: Part II Routledge

Autism is a baffling brain disorder that profoundly affects children's communication and social skills. This work provides a reference guide to this disease. It includes approximately 500 entries that address the different types of autism, causes and treatments, institutions, associations, leading scientists and research, social impact, and more.

AN AMERICAN DICTIONARY OF THE ENGLISH LANGUAGE

IAP

This book focuses on the building of a crypto economy as an alternative economic space and discusses how the crypto economy should be governed. The crypto economy is examined in its productive and financialised aspects, in order to distil the need for governance in this economic space. The author argues that it is imperative for regulatory policy to develop the economic governance of the blockchain-based business model, in order to facilitate economic mobilisation and wealth creation. The regulatory framework should cater for a new and unique enterprise organisational law and the fund-raising and financing of blockchain-based development projects. Such a regulatory framework is crucially enabling in nature and consistent with the tenets of regulatory capitalism. Further, the book acknowledges the rising importance of private monetary orders in the crypto economy and native payment systems that do not rely on conventional institutions for value transfer. A regulatory blueprint is proposed for governing such monetary orders as 'commons' governance. The rise of Decentralised Finance and other financial innovations in the crypto economy are also discussed, and the book suggests a framework for regulatory consideration in this dynamic landscape in order to meet a balance of public interest objectives and private interests. By setting out a reform agenda in relation to economic and financial governance in the crypto economy, this forward-looking work argues for the extension of 'regulatory capitalism' to this perceived 'wild west' of an alternative economic space. It advances the message that an innovative regulatory agenda is needed to account for the economically disruptive and technologically transformative developments brought about by the crypto economy.

IGI Global

"A fabulous read, filled with heroism, history, and hi-jinks, as author William F. Sine recounts his life as an Air Force Pararescue Jumper" (Readers' Favorite). US Air Force Pararescue is the most skillful and capable rescue force in the world, taking on some of the most dangerous rescue missions imaginable. PJs (short for para-jumpers), are members of an elite unit whose commando skills are so wide-reaching they often seem like something out of science fiction. They routinely tackle perilous operations that are beyond the capabilities of other rescue organizations, and sometimes dare the seemingly impossible. Since their inception in 1947, PJs have saved more than thirty thousand lives. They can pluck near-frozen climbers off jagged mountaintops and recover shot-down jet pilots stranded deep in hostile territory. In the dead of night, the PJs parachute into ominous, black, twenty-foot-tall waves to save distressed seamen, and they brave the cruelest and most desolate deserts to recover victims. US Air Force pararescuemen have played a prominent role in every armed conflict since the Korean War, rescuing thousands of soldiers from behind enemy lines. Guardian Angel provides a rare glimpse at a PJ's mind-blowing adventures. You follow Sgt. Sine's trek across exotic lands and share his encounters with mysterious cultures. Learn what it takes to lower from a helicopter onto the slippery decks of storm-tossed ships to rescue dying sailors. Feel what it's like to be caught in the middle of a bomb blast so powerful that it tears high-rise buildings in half, and flattens armored vehicles hundreds of yards away. Soar high above towering jungle trees and experience the danger of swinging on a slim cable below a helicopter, while performing a mid-air rescue of a pilot, dangling from his chute a hundred feet above a mountain slope. Go to war in Afghanistan and parachute onto a nocturnal battlefield, surrounded by land mines, to help a mortally wounded soldier. This is a deadly serious business: When things go wrong, they can go terribly wrong. Aircraft crash into mountainsides, killing all onboard, while some PJs live through horrendous helicopter crashes only to struggle with freezing temperatures, snapped limbs and torn flesh in a desperate fight for survival. This book presents true stories of uncommon courage told from the perspective of the actual men in the arena. PJs belong to an exclusive brotherhood and forge unbreakable bonds of loyalty, commitment, and sacrifice. They do these things for their country, to protect their brothers in arms, and to honor their motto: "That Others May Live."

ICT ACCEPTANCE, INVESTMENT AND ORGANIZATION: CULTURAL PRACTICES AND VALUES IN THE ARAB WORLD

دار التعليم الجامعي

This book constitutes the thoroughly refereed post-workshop proceedings of the Second International Symposium, SETE 2017, held in conjunction with ICWL 2017, Cape Town, South Africa, in September 2017. The 52 full and 13 short papers were carefully reviewed and selected from 123 submissions. This symposium attempts to provide opportunities for the crossfertilization of

knowledge and ideas from researchers in diverse fields that make up this interdisciplinary research area.

Artificial Intelligence Academic Conferences Limited

Offers comprehensive coverage of the issues, concepts, trends, and technologies of distance learning.

Electrical & Electronics Abstracts Oxford Business Group

This book proposes new technologies and discusses future solutions for ICT design infrastructures, as reflected in high-quality papers presented at the 5th International Conference on ICT for Sustainable Development (ICT4SD 2020), held in Goa, India, on 23-24 July 2020. The conference provided a valuable forum for cutting-edge research discussions among pioneering researchers, scientists, industrial engineers, and students from all around the world. Bringing together experts from different countries, the book explores a range of central issues from an international perspective.

Responsible Organizations in the Global Context Springer Nature

This book is a collection of recent publications from researchers all over the globe in the broad area of high-voltage engineering. The presented research papers cover both experimental and simulation studies, with a focus on topics related to insulation monitoring using state-of-the-art sensors and advanced machine learning algorithms. Special attention was given in the Special Issue to partial discharge monitoring as one of the most important techniques in insulation condition assessment. Moreover, this Special Issue contains several articles which focus on different modeling techniques that help researchers to better evaluate the condition of insulation systems. Different power system assets are addressed in this book, including transformers, outdoor insulators, underground cables, and gas-insulated substations.

PROCEEDINGS OF ICT4SD 2020, VOLUME 2

Routledge

CompTIA Security+ Study Guide (Exam SY0-601)

Online and Distance Learning: Concepts, Methodologies, Tools, and Applications Routledge

The goal of this text is to help teachers in diverse classrooms understand the importance of students' culture, languages, and schooling experiences to curriculum, assessment, and student achievement. Readers will learn about aspects of specific cultures and languages that are important to their understanding of their students, and they will discover that cultures that are often considered similar may not be so (and why they aren't). Finally, the text focuses on how teachers can integrate languages and cultures into classrooms and how to account for students' backgrounds and funds of knowledge when devising tasks. The text starts with an introduction to language and culture that presents a research-based explanation of why these concepts are important for teachers to understand (Chapter 1). Then, the middle 28 chapters each address one country/culture. Each chapter starts with a school scenario in the US. Part 2 of each chapter includes evidence-based demographic and background data on the country, including historical events that may have an impact on our students and their families. Part 3 includes a look at education, schooling, and culture, including famous people, contributions to the world, personal characteristics, important religious information, focal customs, and other aspects that are important to cultural insiders. Part 4 is about language and literacy traditions and how they relate to the culture, a number of words that teachers can learn (e.g., yes, no, thank you, please, hello), how the language is different from and similar to English, and what those differences and similarities might mean for English language learners from that culture. Part 5 comprises advice, resources, and ideas for teachers (for example, if it is an oral culture, the teacher might consider working with students on oral storytelling before transitioning to written stories, or incorporate both using technology). Each chapter also contains recommended readings and resources and short exercises that extend the chapter information. The final chapter presents parting notes for teachers and additional suggestions for addressing diversity.
