**Anthropological Insights into Reason and Unreason** Hau Religion and magic have played important roles within Eastern European societies where social reality and socio-political balance may differ greatly from those in the West. Although often thought of as being two distinct, even antagonistic forces, religion and magic find ways to work together. By taking on various examples in the multicultural settings of post-Soviet and post-socialist spaces, this collection brings together diverse historical and ethnographic analyses of orthodoxy and heterodoxy from the pre- and post-1989 periods, studies on the relationship of religious and state institutions to individuals practicing alternative forms of spirituality, and examples of borderlands as spaces of ambiguity. This volume is at the crossroads of anthropology, history, as well as cultural memory studies. Its archival and field research findings help understand how repurposing religious and magic practices worked into the transition that countries in Eastern Europe and beyond have experienced after the end of the Cold War.

**How the Supernatural Reflects Rationality** Routledge Providing a unique anthropological perspective on Jewish mysticism and magic, this book is a study of Jewish rites and rituals and how the analysis of early literature provides the roots for understanding religious practices. It includes analysis on the importance of sacrifice, amulets, and names, and their underlying cultural constructs and the persistence of their symbolic significance.

**An Anthropological Study of the Supernatural** Blackwell Publishing This lively and readable survey introduces students to key areas of the field and shows how to apply an anthropological approach to the study of contemporary world religions. Written by an experienced teacher, it covers all of the traditional topics of anthropology of religion, including definitions and theories, beliefs, symbols and language, and ritual and myth, and combines analytic and conceptual discussion with up-to-date ethnography and theory. Eller includes copious examples from religions around the world – both familiar and unfamiliar – and two mini-case studies in each chapter. He also explores classic and contemporary anthropological contributions to important but often overlooked issues such as violence and fundamentalism, morality, secularization, religion in America, and new religious movements. Introducing Anthropology of Religion demonstrates that anthropology is both relevant and essential for understanding the world we inhabit today.

This comparative reader takes an anthropological approach to the study of religious beliefs, both strange and familiar. The engaging articles on all key issues related to the anthropology of religion grab the attention of students, while giving them an excellent foundation in contemporary ideas and approaches in the field. The multiple authors included in each chapter represent a range of interests, geographic foci, and ways of looking at each subject. Divided into ten chapters, this book begins with a broad view of anthropological ways of looking at religion, and moves on to some of the core topics within the subject, such as myth, ritual, and the various types of religious specialists.

## JEWISH MYSTICISM AND MAGIC

Allyn & Bacon

This concise introductory textbook emphasizes the major concepts of both anthropology and the anthropology of religion. It is aimed at students encountering anthropology for the first time. Reviewers describe the text as vivid, rich, user-friendly, accessible, and well-organized. The Anthropology of Religion, Magic, and Witchcraft examines religious expression from a cross-cultural perspective while incorporating key theoretical concepts. In addition to providing a basic overview of anthropology, including definition of key terms and exposure to ethnographies, the text exposes students to the varying complexity of world religions.

This book contains three prolific essays by the world renowned polish anthropologist Bronislaw Malinowski. First published in 1926, *Magic, Science and Religion* provides its readers with a seminal collection of texts exploring the concepts of magic, religion, science, rite and myth, detailing how they interlink to offer exciting and informative insights into the Trobrianders of New Guinea. A must-have for any students of anthropology and collectors of Malinowski's work, we are republishing this classic work with a new introductory biography of the author.

## RELIGION AND MAGIC IN THE LIFE OF TRADITIONAL PEOPLES

Routledge

'Religion as Magical Ideology' examines the relationship between rationality and supernatural beliefs arguing that such beliefs are products of evolution, cognition and culture. The book does not offer a false rapprochement between reason and religion; instead, it explores their interrelationship as a series of complex adaptations between cognitive and cultural processes. Exploring the nature of the tension between religious traditions and reason,

'Religion as Magical Ideology' develops a dual inheritance theory of religion - which combines the cognitive byproduct and prosocial adaptation accounts - and analyses the connection between the function of a belief and the degree of protection it gets from potential counter-evidence. With discussion ranging from individual cognitive mechanisms, general functional considerations, to the limits of evolutionary and cognitive processes, the book offers readers a systematic account of how cognition shapes religious beliefs and practices.

**Introducing Anthropology of Religion** Zed Books Magic, always part of the occult underground in North America, has experienced a resurgence since the 1960s. Although most contemporary magical religions have come from abroad, they have found fertile ground in which to develop in North America. Who are today's believers in Witchcraft and how do they worship? Alternative spiritual paths have increased the ranks of followers dramatically, particularly among well-educated middle-class individuals. Witchcraft and Magic conveys the richness of magical religious experiences found in today's culture, covering the continent of North America and the Caribbean. These original essays survey current and historical issues pertinent to religions that incorporate magical or occult beliefs and practices, and they examine contemporary responses to these religions. The relationship between Witchcraft and Neopaganism is explored, as is their intersection with established groups practicing goddess worship. Recent years have seen the growth in New Age magic and Afro-Caribbean religions, and these developments are also addressed in this volume. All the religions covered offer adherents an alternative worldview and rituals that are aimed at helping individuals redefine themselves and make their interactions with the environment more empowered. Many modern occult religions share an absence of dogma or central authority to determine orthodoxy, and have become a contemporary experience embracing modern concerns like feminism, environmentalism, civil rights, and gay rights. Afro-Caribbean religions such as Santería, Palo, and Curanderismo, which do have a more developed dogma and authority structure, offer their followers a religion steeped in African and Hispanic traditions. Responses to the growth of magical religions have varied, from acceptance to an unfounded concern about the growth of a satanic underground. And, as magical religions have flourished, increased interest has resulted in a growing commercialization, with its threat of trivialization.

## STUDYGUIDE FOR THE ANTHROPOLOGY OF RELIGION, MAGIC, AND WITCHCRAFT BY STEIN, REBECCA

University of Pennsylvania Press

Taking the reader into the heart of one of the fastest-growing religious movements in North America, Sabina Magliocco reveals how the disciplines of anthropology and folklore were fundamental to the early development of Neo-Paganism and the revival of witchcraft. Magliocco examines the roots that this religious movement has in a Western spiritual tradition of mysticism disavowed by the Enlightenment. She explores, too, how modern Pagans and Witches are imaginatively reclaiming discarded practices and beliefs to create religions more in keeping with their personal experience of the world as sacred and filled with meaning. Neo-Pagan religions focus on experience, rather than belief, and many contemporary practitioners have had mystical experiences. They seek a context that normalizes them and creates in them new spiritual dimensions that involve change in ordinary consciousness. Magliocco analyzes magical practices and rituals of Neo-Paganism as art forms that reanimate the

cosmos and stimulate the imagination of its practitioners. She discusses rituals that are put together using materials from a variety of cultural and historical sources, and examines the cultural politics surrounding the movement—how the Neo-Pagan movement creates identity by contrasting itself against the dominant culture and how it can be understood in the context of early twenty-first-century identity politics. *Witching Culture* is the first ethnography of this religious movement to focus specifically on the role of anthropology and folklore in its formation, on experiences that are central to its practice, and on what it reveals about identity and belief in twenty-first-century North America.

**The Crisis and the Presence** Rowman & Littlefield  
This innovative introduction to the anthropological study of religion challenges traditional categories and assumptions, arguing that too many of them reflect ethnocentric perspectives long discarded by contemporary anthropologists. The continued use of such terms as "supernatural" and "cult" inescapably communicates that what is under study is not as real or true as the beliefs of the observer. This conflict between the axioms of science and Western scholarship and those of the belief systems under study can be avoided with careful attention to terminology and underlying assumptions. *Ordered Universes* introduces and explores important anthropological issues, concerns, and findings about the institution of religion approached as a human cultural universal. Klass applies a non-ethnocentric perspective to each topic, relying on contemporary anthropological theories and using approaches deriving from other subdivisions of the discipline. Offering operational, non-judgmental definitions that avoid taking a position on whether the belief under study is "true" and providing examples from ethnographic (and other) literature on religion, Klass explores values, beliefs, witchcraft, shamans, sacrifice, ghosts, revitalization, and many other concepts. In the final chapters, he considers the emergence of new religious movements and leaders and evaluates the continuing ideological conflict between proponents of scientific, fundamentalist, and

post-rationalist systems of thought.

Randall Styers seeks to account for the vitality of scholarly discourse purporting to define and explain magic despite its failure to do just that. He argues that it can best be explained in light of the European and Euro-American drive to establish and secure their own identity as normative.

Ernesto de Martino was a major critical thinker in the study of vernacular religions, producing innovative analyses of key concepts such as 'folklore', 'magic' and 'ritual'. His methodology stemmed from his training under the philosopher Benedetto Croce whilst his philosophical approach to anthropology borrowed from Marx and Gramsci. Widely celebrated in continental Europe, de Martino's contribution to the study of religion has not been fully understood in the Anglophone world though some of his works - 'Primitive Magic: the Psychic Powers of Shamans and Sorcerers' and 'The Land of Remorse: a Study of Southern Italian Tarantism' - have been translated. This volume presents a comprehensive overview of de Martino's life and work, the thinkers and theories which informed his writings, his contribution to the study of religions and the potential of his methodology for contemporary scholarship.
