This comprehensive reference guide reviews the literature concerning the impact of the automobile on American social, economic, and political history. Covering the complete history of the automobile to date, twelve chapters of bibliographic essays describe the important works in a series of related topics and provide broad thematic contexts. This work includes general histories of the automobile, the industry it spawned and labor-management relations, as well as biographies of famous automotive personalities. Focusing on books concerned with

various social aspects, chapters discuss such issues as the car's influence on family life, youth, women, the elderly, minorities, literature, and leisure and recreation. Berger has also included works that investigate the government's role in aiding and regulating the automobile, with sections on roads and highways, safety, and pollution. The guide concludes with an overview of reference works and periodicals in the field and a description of selected research collections. The *Automobile in American History and Culture* provides a resource with which to examine the entire field and its structure. Popular culture scholars and enthusiasts involved in automotive research will appreciate the extensive scope of this reference. Cross-referenced throughout, it will serve as a valuable research tool.

The Cold War contains a selection of official and unofficial documents which provide a truly multi-faceted account of the entire Cold War era. The experiences of the East Berlin housewife are placed alongside those of the South African student; the participation of political leaders from Europe and the Third World stand juxtaposed. Not only does this book put a human face on the conflict, but it draws emphasis to the variety of ways in which this conflict was experienced. The final selection of documents illustrates the global impact of the Cold War to the present day, and establishes links between the Cold War and the events of 11th September 2001.

Using a three-part framework of Ideas, Arguments, and Contexts and Applications, International Relations, Second Edition, shows students how to think critically about issues and current events in world politics. Each chapter first describes key concepts and developments in the field (Ideas), then presents the main theoretical and analytical approaches (Arguments), and finally applies the main theories and approaches within the individual, state, and global contexts (Contexts and Applications). Historical information is woven throughout the text, and every chapter ends with an extended case study ("The Uses of History") that demonstrates how what

we have learned from the past can influence our future actions. Three full chapters on key approaches--realism (chapter 2), liberalism (chapter 3), and constructivism and other alternative views (chapter 4)--introduce students to a broad spectrum of approaches, and each chapter integrates discussions of relevant theories and levels of analysis. Visual Reviews at the end of each chapter not only recap key points but include Critical Thinking questions that reflect the chapter learning objectives.

“Leaps at the throat of television history and takes down the patriarchy with its fervent, inspired prose. When Women Invented Television offers proof that what we watch is a reflection of who we are as a people.”
—Nathalia Holt, New York Times bestselling author of *Rise of the Rocket Girls*
New York Times bestselling author of *Seinfeldia*
Jennifer Keishin Armstrong tells the little-known story of four trailblazing women in the early days of television who laid the foundation of the industry we know today. It was the Golden Age of Radio and powerful men were making millions in advertising dollars reaching thousands of listeners every day. When television arrived, few radio moguls were interested in the upstart industry and its tiny production budgets, and expensive television sets were out of reach for most

families. But four women—each an independent visionary—saw an opportunity and carved their own paths, and in so doing invented the way we watch tv today. Irna Phillips turned real-life tragedy into daytime serials featuring female dominated casts. Gertrude Berg turned her radio show into a Jewish family comedy that spawned a play, a musical, an advice column, a line of house dresses, and other products. Hazel Scott, already a renowned musician, was the first African American to host a national evening variety program. Betty White became a daytime talk show fan favorite and one of the first women to produce, write, and star in her own show. Together, their stories chronicle a forgotten chapter in the history of television and popular culture. But as the medium became more popular—and lucrative—in the wake of World War II, the House Un-American Activities Committee arose to threaten entertainers, blacklisting many as communist sympathizers. As politics, sexism, racism, anti-Semitism, and money collided, the women who invented television found

themselves fighting from the margins, as men took control. But these women were true survivors who never gave up—and thus their legacies remain with us in our television-dominated era. It's time we reclaimed their forgotten histories and the work they did to pioneer the medium that now rules our lives. This amazing and heartbreaking history, illustrated with photos, tells it all for the first time.

 A look back at vintage magazines and an invitation to enter the spellbinding world of luscious pin-up models. IMAGINED BY MALY SIRI, THIS COFFEE TABLE BOOK IS A REMINDER OF VINTAGE MAGAZINES AND AN INVITATION TO ENTER THE SPELLBINDING WORLD OF PIN-UPS Maly Siri's Pin-up Art Good Girls / Bad Girls raises two themes: - On one side, the "Good Girls": the damsels with soft skin powdering their faces in front of the mirror, the Tahitian girls with enchanting smiles and the brave soldiers... Their charm is due to their sparkling characters and apparent candour. - And on the other side, the "Bad Girls": the rouged vamps with sensuous looks, the spies, the melancholic blues singers

and other mis ts... The fact that they are aware of their charms makes them even more dangerous... This book is a rich and delicious homage inspired by the iconography of the 1930's to 50's, a concentrate of pure glamour, with a preface by Chantal Thomass.
