This book is about nuclear legacies in Russia and Central Asia, focusing on selected sites of the Soviet atomic program, many of which have remained understudied. Nuclear operations, for energy or military purposes, demanded a vast infrastructure of production and supply chains that have transformed entire regions. In following the material traces of the atomic programs, contributors pay particular attention to memory practices and memorialization concerning nuclear legacies. Tracing the Atom foregrounds historical and contemporary engagements with nuclear politics: How have institutions and governments responded to the legacies of the atomic era? How do communities and artists articulate concerns over radioactive matters? What was the role of radiation expertise in a broader Soviet and international context of the Cold War? Examining nuclear legacies together with past atomic futures and post-Soviet memory and nuclear heritage, sheds light on how modes of knowing intersect with livelihoods, compensation policies, and historiography. Bringing together a range of disciplines - history, science and technology studies, social anthropology, literary studies, and art history - this volume offers insights that broaden our understanding of 20th century atomic programs and their long aftermaths.

While there is growing interest in IFRS within the US, interest outside the US has exploded. Weygandt's fourth edition of Financial Accounting: IFRS highlights the integration of more US GAAP rules, a desired feature as more foreign companies find the United States to be their largest market. The highly anticipated new edition retains each of the key features (e.g. TOC, writing style, pedagogy, robust EOC) on which users of Weygandt Financial have come to rely, while putting the focus on international companies/examples, discussing financial accounting principles and procedures within the context of IFRS, and providing EOC exercises and problems that present students with foreign currency examples instead of solely U.S. dollars.
