Companies of all sizes have been
initiating international transactions--
mergers and acquisitions, joint ventures,
strategic alliances, and private

placements--in record numbers.
Targeted due diligence is crucial to
effectively research, value, and
complete these complex deals. With an
evolving climate of uncertainty and new,
unpredictable threats to business, it is
more essential than ever before. Due
Diligence for Global Deal Making is an
invaluable guidebook for companies
trying to capitalize on the opportunities

in both developed and emerging cross-border markets. All too often global transactions fail to meet the parties' expectations, and the leading culprit is inadequate due diligence. Especially when the target partner lacks a financial performance track record and significant assets, expanding businesses must answer difficult questions, such as: Why (if at all) do this deal? What are the rules going in, and what happens if things go wrong? Where are the tax, legal, financial, and operational traps, and what are the opportunities? This book provides what's needed to avoid devastating mistakes and to master the steps that ensure success: Expert analysis, insights, and strategies from experienced practitioners and leading authorities in cross-border matters In-

depth coverage of critical topics decision makers need to understand in order to succeed in cross-border transactions--from corporate planning to operational, financial, legal, tax, accounting, and people/organizational considerations Best practices of corporate investors and professional advisers in conducting critical due diligence Noted experts discuss critical topics corporate executives--and all those involved with their company's legal, operational, accounting, and tax matters--need to know to successfully complete complex global transactions today.

The automotive industry is a major pillar of the modern global economy and one of Europe's key industries. There can hardly be any doubt about the important

role of this sector as an engine for employment, growth and innovation in Europe, and there are crucial challenges and opportunities ahead. The authors shed light on a broad range of issues – globalisation and restructuring, trade and foreign direct investment, innovation, regulation, and industry policy – and put a special focus on the new member states. While change may be inevitable, progress is not. This book shall serve as a map to all stakeholders: business executives and policy makers, investors and scholars.

Jazz Sells: Music, Marketing, and Meaning examines the issues of jazz, consumption, and capitalism through advertising. On television, on the Internet, in radio, and in print, advertising is a critically important medium for the mass dissemination of music and musical meaning. This book is a study of the use of the jazz genre as a musical signifier in promotional efforts, exploring how the relationship between brand, jazz music, and jazz discourses come together to create meaning for the product and the consumer. At the same time, it examines how jazz offers an invaluable lens through which to

examine the complex and often contradictory culture of consumption upon which capitalism is predicated.

Brandweek Chrysler PT Cruiser The book of Chryslers classic design for a modern age

Book Description: Management: The New Competitive Landscape, by Bateman and Snell, has consistently discussed and explained the traditional, functional approach to management-through planning, organizing, leading, and controlling. But the 6th edition goes a step further, in defining and highlighting with icons, four "bottom line" practices that managers and companies must deliver to their customers: Innovation, Speed, Quality, and Cost. Bateman and Snell's: Management: The New Competitive Landscape, 6th edition has always been about a series of "firsts": first to have a chapter on diversity, first

to devote a section to the environment, and first to relate a "bricks and clicks" theme to explain the challenges of managing in a New Economy. This new edition is no exception with the expansion of such timely topics as ethics and technology. Management: The New Competitive Reality, 6th edition shows how managers must utilize the classic principles of management in combination with the practices of the "New Economy" to achieve managerial goals. By reinforcing these new business practices in context with the functional approaches, the authors deliver a unique theme amongst all principles of management texts-how to manage in ways that deliver results.

NEW CARS AND TRUCKS, WINTER 2001

I was born and raised in Rockland
County, which until the mid-fifties, was a
region of New York State characterized
by small villages and farms just 18 miles
or so from New York City. After high
school and college and having seen
enough of "progress" destroying this
wonderful way of life, my wife and I
moved to a small community a few miles

from Cooperstown, New York, home of the Baseball Hall of Fame. After raising three daughters and a career in education I decided to change the tempo of life and began a new occupation as a full-time writer of automotive history. This was simply an extension of what I had been doing since my preadolescent years when my brother and I would collect sales brochures from any auto dealer who wouldn't show us the exit/door, since we obviously had no cash, no credit and no intention of buying a new car. Ever since I was in elementary school I was fascinated by the hopped-up Fords and Chevys (and even an occasional Plymouth) of the late '30's and '40's that the older "cool" boys drove to school. Recollections of those cars from long ago instantly came to

mind when I first saw the PT Cruiser in 2000. Having previously written numerous articles and several books on Chrysler vehicles, my interest in the PT as the subject of a forthcoming volume was instantaneous.
