 A full-length study and new translation of the great Sanskrit poet Kalidasa's famed Meghaduta (literally "The Cloud Messenger,") The Cloud of Longing focuses on the poem's interfacing of nature, feeling, figuration, and mythic memory. This work is unique in its attention given to the natural world in light of the nexus of language and love that is the chief characteristic (lakshana) of the poem. Along with a scrupulous study of the approximately 111 verses of the poem, The Cloud of Longing offers an extended look at how nature was envisioned by classical India's supreme poet as he portrays a cloud's imagined voyage over the fields, valleys, rivers, mountains, and towns of classical India. This

sustained, close reading of the Meghaduta will speak to contemporary readers as well as to those committed to developing a more in-depth experience of the natural world. The Cloud of Longing fills a gap in the translation of classical Indian texts, as well as in studies of world literature, religion, and into an emerging integrative environmental discipline.

## TEMPLE TO LOVE

Psychology Press  
 Pilgrims in the deserts of Egypt and the holy land during the fourth and fifth centuries A.D. often reported visiting holy people as part of their tours of holy places. This is the first comprehensive study of pilgrimage to these famous ascetics of late antique Christianity. Through an original analysis of pilgrim writings of this period, Georgia Frank discovers a literary imagination at work, one that both recorded and shaped the

experience of pilgrimage to living saints. Taking an important new approach to these texts, Frank finds in them a record of the writers' and readers' spiritual expectations and uses these fresh insights to add substantially to our understanding of the purposes and practices of pilgrimage. Frank focuses in particular on two important and well-known early texts—The History of the Monks in Egypt (ca. 400) and Palladius's The Lausiaca History (ca. 420), situating these narratives in their literary, historical, and spiritual contexts. She compares these narratives to exotic travel writing and to tales of otherworldly journeys. Bringing in contemporary theory, she demonstrates the importance of sight as a means of spiritual progress and explores the relation between the function of sight in these narratives and in other expressions of visual piety in late antiquity Christianity, such as the veneration of relics and, eventually, icons. With its unique focus on the sensory dimensions of pilgrimage—especially visuality—this absorbing book widens our understanding of early Christian pilgrims and those who read their accounts. At the same time, it also sheds new light on the relation between religious experience and the senses, on literary representations of visual experience, and on the literature of pious travel.

Celebrated as an aquatic form of divinity for thousands of years, the Yamuna is one of India's most sacred rivers. A prominent feature of north Indian culture, the Yamuna is conceptualized as a goddess flowing with liquid love—yet today it is severely polluted, the victim of fast-paced industrial development. This fascinating and beautifully written book investigates the stories, theology, and religious practices connected with this river goddess collected from texts written over several millennia, as well as from talks with pilgrims, priests, and worshippers who frequent the pilgrimage sites and temples located on her banks. David L. Haberman offers a detailed analysis of the environmental condition of the river and examines how religious practices are affected by its current pollution. He introduces Indian river environmentalism, a form of activism that is different in many ways from its western counterpart. *River of Love in an Age of Pollution* concludes with a consideration of the broader implications of the Yamuna's plight and its effect on worldwide efforts to preserve our environment.

"Very few scholars in religious studies have achieved Haberman's combination of textual and ethnographic authority. The book is groundbreaking, building on his achievements in the study of the religious traditions of Braj; he is widely regarded as a major authority on this area of Hinduism's complex regional matrix. The superior scholarship, combined with the author's personal voice, gives the book additional resonance, bringing to light an urgent environmental and moral challenge."—Paul B. In this engrossing new piece of Beat history, Pulitzer Prize finalist Deborah Baker takes us back to the moment when America's edgiest writers looked to India for answers as India looked to the West. It was 1961 when Allen Ginsberg left New York by boat for Bombay, where he hoped to meet poets Gary Snyder and Joanne Kyger. Baker follows Ginsberg and his companions as they travel from ashram to opium den. Exposing an overlooked chapter of the literary past, *A Blue Hand* will delight all those who continue to cherish the frenzied creativity of the Beats.

Originally published as *The Continuum Companion to Hindu*

*Studies*, this Companion offers the definitive guide to Hinduism and study in this area. Now available in paperback, *The Bloomsbury Companion to Hindu Studies* covers all the most pressing and important themes and categories in the field - areas that have continued to attract interest historically as well as topics that have emerged more recently as active areas of research. Specially commissioned essays from an international team of experts reveal where important work continues to be done in the field and, valuably, how the various topics intersect through detailed reading paths. Featuring a series of indispensable research tools, including a detailed list of resources, chronology and diagrams summarizing content, this is the essential tool for anyone working in Hindu Studies.

*The Routledge Handbook of Religious and Spiritual Tourism* provides a robust and comprehensive state-of-the-art review of the literature in this growing sub-field of tourism. This handbook is split into five distinct sections. The first section covers past and present debates regarding definitions, theories, and concepts related to religious and spiritual tourism. Subsequent sections focus on the supply and demand aspects of religious and spiritual tourism markets, and examine issues related to the management side of these markets around the world. Areas under examination include religious theme parks, the UNESCO branding of religious heritage, gender and performance, popular culture, pilgrimage, environmental impacts, and fear and terrorism, among many others. The final section explores emerging and future directions in religious and spiritual tourism, and proposes an agenda for further research. Interdisciplinary in coverage and international in scope through its authorship and content, this will be essential reading for all students, researchers, and academics interested in Tourism, Religion, Cultural Studies, and Heritage Studies.

*Between Heaven and Earth* explores the relationships men, women, and children have formed with the Virgin Mary and the saints in twentieth-century American Catholic history, and reflects, more broadly, on how people live in the company of sacred figures and how these relationships shape the ties between people on earth. In this boldly argued and beautifully written book, Robert Orsi also considers how scholars of religion occupy the ground in between belief and analysis, faith and scholarship. Orsi infuses his analysis with an autobiographical voice steeped in his own Italian-American Catholic background—from the devotion of his uncle Sal, who had cerebral palsy, to a "crippled saint," Margaret of Castello; to the bond of his Tuscan grandmother with Saint Gemma Galgani. Religion exists not as a medium of making meanings, Orsi maintains, but as a network of relationships between heaven and earth involving people of all ages as well as the many sacred figures they hold dear. Orsi argues that modern academic theorizing about religion has long sanctioned dubious distinctions between "good" or "real" religious expression on the one hand and "bad" or "bogus" religion on the other, which marginalize these everyday relationships with sacred figures. This book is a brilliant critical

inquiry into the lives that people make, for better or worse, between heaven and earth, and into the ways scholars of religion could better study of these worlds.

This study is focused on the interaction of material and symbolic values ascribed to sacred trees in India and expressed in 3,000 years of ritual practice. Point of departure is the contemporary trend of mining religious narratives in order to mobilise environmental awareness.

This is one of the first books in any language on the life and work of Miraji (1912-1949), one of the major canonical Urdu poets of the 20th century. Presenting close readings of some of Miraji's most compelling and challenging poems, the author reconceives the relationships among nationalism, gender, and sexuality in Indian life.

### POLITICAL ECOLOGY OF TOURISM

Elsevier

Tourism in Asia is growing faster than anywhere else in the world. Despite the significance of the tourism industry in this area it is under researched. This book addresses this imbalance by providing an edited collection of chapters which explore the domestic and intraregional tourism in Asia.

### RIVER OF LOVE IN AN AGE OF POLLUTION

Living Earth Community: Multiple Ways of Being and Knowing is a celebration of the diversity of ways in which humans can relate to the world around them, and an invitation to its readers to partake in planetary coexistence. Innovative, informative, and highly accessible, this interdisciplinary anthology of essays brings together scholars, writers and educators across the sciences and humanities, in a collaborative effort to illuminate the different ways of being in the world and the different kinds of knowledge they entail – from the ecological knowledge of Indigenous communities, to the scientific knowledge of a biologist and the embodied knowledge communicated through storytelling. This anthology examines the interplay between Nature and Culture in the setting of our current age of ecological crisis, stressing the importance of addressing these ecological crises occurring around the planet through multiple perspectives. These perspectives are exemplified through diverse case studies – from the political and ethical implications of thinking with forests, to the capacity of storytelling to motivate action, to the worldview of the Indigenous Okanagan community in British Columbia. Living Earth Community: Multiple Ways of Being and Knowing synthesizes insights from across a range of academic fields, and highlights the potential for synergy between disciplinary approaches and inquiries. This anthology is essential reading not only for researchers and students, but for anyone interested in the ways in which humans interact with the community of life on Earth, especially during this current period of environmental emergency.

Why has political ecology been assigned so little attention in tourism studies, despite its broad and critical interrogation of

environment and politics? As the first full-length treatment of a political ecology of tourism, the collection addresses this lacuna and calls for the further establishment of this emerging interdisciplinary subfield. Drawing on recent trends in geography, anthropology, and environmental and tourism studies, *Political Ecology of Tourism: Communities, Power and the Environment* employs a political ecology approach to the analysis of tourism through three interrelated themes: Communities and Power, Conservation and Control, and Development and Conflict. While geographically broad in scope—with chapters that span Central and South America to Africa, and South, Southeast, and East Asia to Europe and Greenland—the collection illustrates how tourism-related environmental challenges are shared across prodigious geographical distances, while also attending to the nuanced ways they materialize in local contexts and therefore demand the historically situated, place-based and multi-scalar approach of political ecology. This collection advances our understanding of the role of political, economic and environmental concerns in tourism practice. It offers readers a political ecology framework from which to address tourism-related issues and themes such as development, identity politics, environmental subjectivities, environmental degradation, land and resources conflict, and indigenous ecologies. Finally, the collection is bookended by a pair of essays from two of the most distinguished scholars working in the subfield: Rosaleen Duffy (foreword) and James Igoe (afterword). This collection will be valuable reading for scholars and practitioners alike who share a critical interest in the intersection of tourism, politics and the environment

### KRISHNA IN HISTORY, THOUGHT, AND CULTURE: AN ENCYCLOPEDIA OF THE HINDU LORD OF MANY NAMES

Indiana University Press

We now live in the time of the Gaian hierophant. This is the one who reveals and shows us how to relate to the sacred aspects of Gaia, our planet. Who is this hierophant? Each of us, when we join the campaign with Gaia against the desecration of our natural environment. But first we have to discover what the Earth really is. The Earth's thousands of sacred sites hold a secret: they are functional parts of the planet's geomantic body, consciousness nodes in the Earth's subtle body. Each veils a Light temple, each once known widely and remembered in myth, and Welcome to Your Designer Planet! documents 165 different kinds. The Earth is not an accident of the cosmos, but was designed specifically for humans as an extended Mystery temple primed to support and enhance our greater awareness. And the designers intended that humans help maintain it. Want to help the ecosystem and modulate global warming and climate change? Plug yourself into the Earth's Light grid through your nearest sacred site and start helping. Earth Mysteries researcher Richard Leviton presents a working model of the Earth's geomantic reality based on 24 years of research. The world's myths are the doorway into this fantastic domain of the Earth's visionary geography, showing us where to go and what to do and even what kinds of spiritual beings to expect to see. The future of the Earth is in our hands. Here are some pages from its design manual showing us how to fine-tune our wonderful host planet.

A deeply researched and vividly written study, this book depicts religion in place and in movement, dwelling and crossing. Drawing on insights from the natural and social sciences, Tweed's work is grounded in the gritty particulars of distinctive religious practices, even as it moves toward ideas about cross-cultural patterns. It offers a responsible way to think broadly about religion, a topic that is crucial for understanding the contemporary world.
