The hilarious New York Times bestselling phenomenon and the perfect funny gift! The Darwin Awards II: Unnatural Selection brings together a fresh collection of the hapless, the heedless, and the just plain foolhardy among us. Salute the owner of an equipment training school who demonstrates the dangers of driving a forklift by failing to survive the filming of his own safety video. Gawk at the couple who go to sleep on a sloping roof. Witness the shepherd who leaves his rifle unsecured—only to be accidentally shot by one of his own flock. With over one hundred Darwin Award Winners, Honorable Mentions, and debunked Urban Legends, plus science and

safety tips for avoiding the scythe of natural selection, The Darwin Awards II proves once again how uncommon common sense can be.

The Forklifts Have Nothing To Do! provides practical methods for improving supply chain operations. Colonel Joe Walden has spent more than 30 years leading and improving supply chain operations. Improving your supply chain will improve your bottom line, regardless of your industry. His recommendations draw on examples in civilian industry and military operations, including his experiences in Operation Iraqi Freedom and his experience as a consultant to FORTUNE 500 Companies. The examples in this book demonstrate that supply chain operations in the military are very similar to supply chain operations in commercial industry. The successful management of supply chains in the military and corporations has the ability to improve operations for the organization and improve support for the customer.

The Cal/OSHA Pocket Guide for the Construction Industry is a handy guide for workers, employers, supervisors, and safety personnel. This latest 2011 edition is a quick field reference that summarizes selected safety standards from the California Code of Regulations. The major subject headings are alphabetized and cross-referenced within the text, and it has a detailed index. Spiral bound, 8.5 x 5.5"

NSC Emergency Medical Response [With DVD and Pocket Guide] Mississauga, Ont. : Canadian Standards Association

SAFETY IS THE CORNERSTONE for excellent operations, but it is often marginalized and relegated to dense handbooks that are ignored by employees. James T. Schultz and Brian L. Fielkow instead offer a straightforward how-to guide for maximizing organizational performance through safety leadership. They demonstrate why safety must be a core value engrained into the rhythms of every task. Jim and Brian show how to bring people and process together in full alignment to provide a definitive competitive advantage.

Leading People Safely

"This document seeks to improve health and safety outcomes in Australian workplaces by offering businesses and employees practical guidance on managing risks related to forklifts."-- Introduction.

Road maps are accompanied by information on federally-designated routes and trucking restrictions.

MOTOR CARRIERS ROAD ATLAS

Today most employee learning happens during unstructured on-the-job experiences, social interactions, and while perusing informal learning sources. The challenge for organizations is tracking and reporting on all of this learning in a consistent, reliable way. A great way to do this is by using the new learning technology specification, the Experience API (xAPI), which allows learning content and systems to speak to each other to record and track all types of learning experiences. In this Infoline, you will learn how and why the xAPI has emerged as the next-generation learning standard how to implement xAPI in your organization the benefits and challenges of xAPI how to select appropriate training systems how to assess your organization's

readiness for this software standard. This Infoline also includes use cases to help you solve problems you may be experiencing in managing organizational learning, and to help you find new ways to support various types of learning experiences.

Forklift Training

Complete Forklift Course for Beginners Ever wanted to operate a forklift, but have no idea where to start? Created by Australia's leading online training provider, Your Licence, the Complete Forklift Course for Beginners offers a comprehensive introduction to forklift truck operations and on-the-job requirements, providing aspiring forklift drivers with the key information needed to obtain forklift certification. With a strong focus on safety, this book includes information on: Parts and controls for different forklifts you may use, including propane, LPG and battery powered electric forklifts, as well as reach forklifts. How to plan a job and reduce risks to yourself and others. How to conduct a forklift inspection using a checklist to ensure it's safe to use, and what to do if you find a fault. How to lift, move and place loads. How to figure out the weight and centre of gravity of loads so you don't overload your forklift. How to correctly shut down, secure, refuel and maintain your forklift. How to meet legal requirements when on the job. Along with a step-by-step guide to operations in industrial and warehouse settings, this forklift training book includes a variety of sample assessment questions, allowing you to test your learning along the way. The training material included is mapped to Australian standards, and is suitable for international use. This guide is presented in an easy-to-understand, engaging format, and is suitable for persons of all ages, with a basic/intermediate level of written English skills.

Fall Protection for Construction

It is a requirement of The Occupational Safety and Health Administration (OSHA) that any person who operates a forklift should receive proper training and be evaluated under a minimum set of safety standards. Carolina Trucking Academy is pleased to offer a program designed to comply with these standards to those who wish to pursue work as a forklift operator.
