## DISCOURSE ANALYSIS

Routledge

This book provides a comprehensive account of the discipline of Critical Discourse Analysis (CDA) and demonstrates multiple linguistic methods through which it exposes and demystifies ideologies that are present in institutional discourse. The book enables readers to critique the complexities of the relationship between language and power to expose the ideological operation of discourse. Proceeding from a theoretical grounding for CDA in contemporary society, the book comprises analysis of a wide range of discourse examples, including the news media, political speeches, public service leaflets and social media. Readers are guided through a diverse range of models in CDA in order to scrutinise and assess the role of language in society and to consider and challenge the principles of powerful networks, institutions and organisations.

The Routledge Handbook of Critical Discourse Studies provides a state-

of-the-art overview of the important and rapidly developing field of Critical Discourse Studies (CDS). Forty-one chapters from leading international scholars cover the central theories, concepts, contexts and applications of CDS and how they have developed, encompassing: approaches analytical methods interdisciplinarity social divisions and power domains and media. Including methodologies to assist those undertaking their own critical research of discourse, this Handbook is key reading for all those engaged in the study and research of Critical Discourse Analysis within English Language and Linguistics, Communication, Media Studies and related areas. *A New Agenda in (critical) Discourse Analysis* Routledge

Want to use Critical Discourse Analysis, but not sure where to start? This book is the complete toolkit you need. Each chapter presents distinct concepts and ideas in Critical Discourse Analysis, explaining how to use them in your research – and why. Packed with case studies of news texts, social

media content, memes, promotional videos, institutional documents, infographics and webpages, the book shows you how to apply each set of tools to real life examples. Most importantly, examples, case studies, and revised opening chapters of this second edition show how multimodal Critical Discourse Analysis can help us to understand the role of language in the functioning of society and politics today, shaping our priorities for what to do and how to act. This book is an inspiring and valuable resource for any undergraduate students and researchers who wish to understand and use Critical Discourse Analysis. David Machin is Professor of Linguistics at Shanghai International Studies University. Andrea Mayr is an Associate Professor at Zayed University.

### **Critical Discourse Analysis, Critical Discourse Studies and Beyond** Routledge

This book provides an introduction to the aims, theories and practices of critical discourse analysis (CDA). It is mainly concerned with the linguistic aspects of CDA. It provides an introduction to the different types of

language analysis that are employed in CDA (frequency analysis, conversation, transitivity and reference, and figurative language, for example) and seeks to provide readers with the skills to apply them in different contexts to various types of texts: political speeches, marketing pieces, literary works, advertising, multimedia persuasive texts, discourses on race, gender, and politics.

### **TEXT, CONTEXT, PRETEXT**

Springer  
Texts and Practices provides an essential introduction to critical discourse analysis. With a wide range of commissioned pieces from international experts, it is an important contribution to this developing field.

This study advances a model for Critical Discourse Analysis which draws on Evolutionary Psychology and Cognitive Linguistics, applied in a critical analysis of immigration discourse. It will be of special interest to students and researchers with which to explore new perspectives

in CDA.  
*How to Do Critical Discourse Analysis* Taylor & Francis  
Since the late 1980s, Critical Discourse Analysis (CDA) has become a well-established field in the social sciences. However, in contrast with some branches of linguistics, CDA is not a discrete academic discipline in the traditional sense, with a fixed set of research methods. The manifold roots of CDA lie in a myriad of disciplines including rhetoric, anthropology, philosophy and cognitive science, to name a few. This four-volume set brings together seminal articles on the subject from varied sources, creating an invaluable roadmap for scholars seeking to consolidate their knowledge of CDA, and of its continued development. Sculpted and edited by a leading voice in the field, this work covers the interdisciplinary roots, the most important approaches and methodologies of CDA, as well as applications in other disciplines in an updated and comprehensive way.

CDS is a multifarious field constantly developing different methodological frameworks for analysing dynamically evolving aspects of language in a broad range of socio-political and institutional contexts. This volume is a cutting-edge, interdisciplinary account of these theoretical and empirical developments. It presents an up-to-date

survey of Critical Discourse Studies (CDS), covering both the theoretical landscape and the analytical territories that it extends over. It is intended for critical scholars and students who wish to keep abreast of the current state of the art. The book is divided into two parts. In the first part, the chapters are organised around different methodological perspectives for CDS (history, cognition, multimodality and corpora, among others). In the second part, the chapters are organised around particular discourse types and topics investigated in CDS, both traditionally (e.g. issues of racism and gender inequality) and only more recently (e.g. issues of health, public policy, and the environment). This is, altogether, an essential new reference work for all CDS practitioners.

**The Practice of Critical Discourse Analysis: an Introduction** SAGE

Critical discourse analysis (CDA) is a social scientific theory and method for analyzing and critiquing the use of language and its contribution to forming and sustaining social practice and for analysis of how language can contribute to reproducing

or transforming social problems. CDA adopts the position that the analysis of how language is used can be a way in to, or complementary to, an interdisciplinary critique of events or social practices. The use of language may be an indicator of a more extensive problem, or it might be implicated in reproducing a problematic social practice. This entry examines some of the core concepts which inform the methods of CDA and describe analytical methods associated with each concept. It begins with an overview of the concepts which underpin the critical and analytical methods of CDA: critical analysis, social practices, social and historical context, dialectical relations, power and ideology, and the conceptual distinction of text, discourse, and language. It goes on to describe the major analytical concepts of CDA with subsections on text, discourse, and orders of discourse. The final section discusses further implications of the CDA method for engaging in full research projects: data collection, tools for handling data analysis, interpretation, and interdisciplinary working.

A Critical Discourse Analysis of Family Literacy Practices Bloomsbury Publishing

"How great to have this practical introduction to doing critical discourse analysis, especially one that provides examples of multimodal discourse analysis. Extremely useful for students who need tools for the study of text, talk and images." - Teun van Dijk, Pompeu Fabra University "The authors have truly achieved the impossible: to make extremely complex phenomena accessible for students and scholars alike. Thus, this textbook will provide a most helpful guide when looking for adequate ways to grasp and analyze the intricate interdependence of written, oral and visual forms of semiosis." - Ruth Wodak, Lancaster University How do media texts manipulate and persuade us? How do language and images play out the ideas, values and identities? This book shows readers exactly how language, power and ideology are negotiated in media texts, from magazine and advertising, to YouTube and music videos. Presenting a systematic toolkit of theories, concepts and techniques for doing

language and image analysis, students learn how to dig deep into discourses and the media landscape. With case studies and examples from a range of traditional and new media content, the book equips students to understand the relationship between language, discourse and social practices.

### **A NEW AGENDA IN (CRITICAL) DISCOURSE ANALYSIS**

Routledge  
Scientific Essay from the year 2012 in the subject Speech Science / Linguistics, grade: Excellent with honor, , course: Critical Discourse Analysis, language: English, abstract: The present paper has shown the practical part of CDA according to three scholars, namely they are Norman Fairclough, Ruth Wodak, and Teun van Dijk. Their approaches are somehow different in method and way of interpretation. While Fairclough is brought up on the systemic-functional model of theory and thus often concentrates on rather limited amounts of research material, Wodak turns to sociolinguistics and ethnography with an emphasis on corpus-

based research and on work with different approaches with a variety of empirical data as well as background information. However, the notion that language is inherently social remains a key assumption in both approaches. On the other hand, similarly to Fairclough, van Dijk acknowledges three different perspectives; text, discourse practice and sociocultural practice, and emphasizes on the link between textual analysis and sociocultural analysis. However, van Dijk differentiates himself from both Fairclough and Wodak in his understanding of social events or of social institutions and power relations. To van Dijk, social cognitions mediate between micro- and macro-levels of society, between discourse and action, between the individual and the group. Therefore, the focus on social cognition governs the process of analysis. Critical Discourse Analysis Critical Discourse Analysis Critical Discourse Analysis (CDA) has established itself over the past two decades as an area of academic activity in which scholars and students from many different disciplines are involved. It

is a field that draws on social theory and aspects of linguistics in order to understand and challenge the discourses of our day. It is time for A New Agenda in the field. The present book is essential for anyone working broadly in the field of discourse analysis in the social sciences. The book includes often critical re-assessments of CDA's assumptions and methods, while proposing new route-maps for innovation. Practical analyses of major issues in discourse analysis are part of this agenda-setting volume.

### **ANALYSING NEWSPAPERS**

SAGE  
Advances in Critical Discourse Studies collects ground-breaking scholarship and cutting-edge research which reflects significant shifts in Critical Discourse Studies, exploring the field from theoretical, analytic and methodological perspectives. Innovative chapters analyse a diverse range of discourses including journalism, mass media, political communication, policy documents, interviews, photographic archive and official

bodies. The chapters in Part I explore Critical Discourse Studies from the point of view of history, memory, identity politics, and discourse, analysing salient examples of how memory and recollection of the past shapes understandings and narratives of the present, and visions of future societies. Part II explores problem-oriented analysis in Critical Discourse Studies and examines the roles that discourse plays in the formation, perpetuation and transformation of class relations. Finally, Part III explores a methodological issue by looking at the benefits of reinforcing fieldwork and ethnographic analysis in Critical Discourse Studies. The case studies throughout the book demonstrate that analytic research contributes significantly to the in-depth and in-situ research of a variety of increasingly complex social, historical, political and economic contexts. This book was originally published as three special issues of the journal *Critical Discourse Studies*.

## **METHODS OF CRITICAL DISCOURSE STUDIES**

SAGE

Methods of Critical Discourse Analysis provides a concise, comprehensible and thoroughly up-to-date introduction to CDA, appropriate for both novice and experienced researchers. This new edition has been updated throughout, with a new introduction contextualizing the development of the CDA approach, and two entirely new chapters on the 'social actor approach' to CDA and the use of quantitative corpus linguistic methods. The editors have brought together contributions from leading experts in the field, who each introduce their own approaches to CDA. Examples are included throughout, demonstrating the value of the method in analyzing a variety of genres of written material on a whole range of topics, including global warming, leadership in management, and globalization. This book will be of great interest to students and researchers in linguistics, sociology and psychology interested

in interdisciplinary approaches to coping with topical social problems.

theoretically rich, this landmark text introduces key concepts and issues in critical discourse analysis and situates these within the field of educational research. The book invites readers to consider the theories and methods of three major traditions in critical discourse studies – discourse analysis, critical discourse analysis, and multimodal discourse analysis -- through the empirical work of leading scholars in the field. Beyond providing a useful overview, it contextualizes CDA in a wide range of learning environments and identifies how CDA can shed new insights on learning and social change. Detailed analytic procedures are included – to demystify the process of conducting CDA, to invite conversations about issues of trustworthiness of interpretations and their value to educational contexts, and to

encourage researchers to build on the scholarship in critical discourse studies. This edition features a new structure; a touchstone chapter in each section by a recognized expert (Gee, Fairclough, Kress); and a stronger international focus on both theories and methods. NEW!
