behaviors are woven together in related, interconnected patterns. Integrating applications and methods throughout the text, authors Douglas Kenrick, Steven Neuberg, Robert Cialdini, and David Lundberg-Kenrick prompt students to consider personal and situational factors, as well as the interactions among these factors, when analyzing human behavior. Social Psychology: Goals in Interaction, 7th Edition - Pearson

The different verbal and nonverbal signals used in conversation have been studied, and the functions of such factors as gaze, gesture, and tone of voice are analyzed in social-interaction studies. Social interaction is thus seen to consist of closely related sequences of nonverbal signals and verbal utterances. Gaze has been found

to perform several important functions. Laboratory and field studies have examined helping behaviour, imitation, friendship formation, and social interaction in ... Social psychology - Interaction processes | Britannica
