This book is about investing in sub \$30k properties (under

\$30,000) and becoming a wealthy real estate investor enjoying the profits now, rather than later ... with only 2-5 properties instead of hundreds or overly priced properties. This book on investing in rental properties for beginners is the foundation of what I've built 47,000 person social media platform on - helping the average person get involved in rental properties on an average income, and building the cash flow of their dreams with

2-5 properties. That's it. This will teach you (the ordinary investor) how to tailor your investment strategy to your pocketbooks (and no one else's). You don't need to ask your parents or friends for loans because the best approach to building a rental portfolio is by purchasing units in modest neighborhoods that offer really high rents (i.e. purchase a \$44,000 rental that earns \$1200 a month in rents). If being a real estate investor is your dream and

being a landlord is not, this is the book for you! The author will personally take you through the steps she's used on over 560 people to build their dream income and lifestyle.

Since the publication of the first edition of Property Investment almost 15 years ago, the property sector has undergone some significant shifts that investors must now factor into their investment choices. In this thoroughly updated second edition, the authors address the issues that have risen to prominence in recent years including • the impact of the credit crunch • the growing importance of sustainability • the growth of buy-to-let investment • the introduction of Real Estate Investment Trusts (REITs). This trusted book provides an essential overview of strategies for investment, markets and appraisal, making it an ideal read for any student or professional working in property investment, property funding, real estate and land management. Concepts are explained with great clarity and the authors use worked examples to elucidate key principles where possible, enabling readers to develop their knowledge of the sector and to strengthen their understanding of the challenges that lie ahead for property investors.

*Competitiveness and Private Sector Development: Eastern Europe and South Caucasus 2011 Competitiveness Outlook* OECD Publishing

A step-by-step, practical guide on how to purchase your first investment property, written in easy-to-understand, conversational language that explains complex concepts simply. Most people believe that property is a great investment, but that in order to get into property you need money, contacts and experience. When you only see the barriers to entry, you tend to give up before you even try. Property investment expert Laurens Boel believes that with the right knowledge anyone can make money in property, regardless of the resources available to them. Financial Freedom Through Property is filled with practical tips, insider secrets and case studies. It explains the risks and rewards of property investing, how to make the right offer on property deals, raise capital, contract the right team, negotiate win-win scenarios, utilise innovative PropTech, find discounted properties and enjoy positive cash flows from day one. It also tells the story

of how the author became one of the top property investors in South Africa – after being retrenched and going broke. Financial Freedom Through Property is an inspirational book for those who want to create a better financial future for themselves. You don't need to be a property mogul to make money on the property market – all you need is the willingness and the time to learn how to do it.

How real estate investors and speculators can take their business global The real estate boom has gone global, and those successful investors who want to keep up their profits are starting to look at emerging markets on other continents. Markets in South America, Eastern Europe, India, and Asia are currently experiencing the rapid growth that mature domestic markets experienced a few years ago. Based on the author's personal experience buying and selling dozens of overseas properties, this book provides all the relevant data investors need to evaluate properties and markets anywhere in the world. Colin Barrow (Hayle, Cornwall, UK) is a non-executive director of two venture capital funds and serves on the UK Government Task Force for Business.

Over the years, a shortage of funds has resulted in a huge deficit in government budgets for infrastructure, especially in developing economies. It is no longer feasible for governments to bear the entire burden of funding public infrastructure. Given that an inadequate supply of public infrastructure poses a challenge for the economic development of any country, partnerships with the private sector to fund public infrastructure procurement has started to be relied on as an alternative to traditional public procurement. Public-Private Partnerships are an arrangement that allow private entities to fund, design, manage and operate public infrastructure for a term in exchange for the payment of tolls by users or the government may well be the solution to the infrastructure crisis in many developing economies. This book examines the role of law in the adoption, implementation and regulation of Public-Private Partnership in selected developing economies including Brazil, India, Nigeria and South Africa to address how to deal with overlapping laws and how the law can protect assets invested in PPP in order to attract private sector interests in infrastructure financing in developing market, showing how law can be used to create, sustain and promote PPP frameworks that take into account local circumstances in developing economies.

Throughout Florida you can see the effects of poor environmental stewardship. The Martin County Community Redevelopment Agency strives to be a leader in Florida to encourage a built environment that reflects sustainability, ultimately resulting in a positive impact on the quality of life for its residents and continued opportunities for its businesses. The Stormwater Design Toolkit is a plain language document outlining best stormwater management practices which enhance both the built and natural environment in our region. As an educational tool, this book seeks to inspire audiences of all ages and backgrounds to learn more about stormwater, the best management practices, and innovative design strategies. The Toolkit demonstrates innovative engineering and best management practices that can be "modularized" to provide alternative approaches, urban strategies and innovative methodologies toward treating and managing stormwater. Various tools found within the Toolkit can be combined to create effective "treatment trains" designed to maintain and treat stormwater runoff. Each tool has the ability to be used as a piece of the development puzzle assisting a property owner to evaluate the capacity of a piece of land and the value of

each tool's potential. Funding and support for this project is provided by South Florida Water Management District and a successful partnership with Martin County Redevelopment Agency.

The contribution of buildings to climate change is widely acknowledged. This book investigates how building regulatory systems are addressing the current and future effects of climate

change, and how these systems can be improved. After presenting a comprehensive overview of how the current building regulatory system developed, some of the inadequacies are identified. The largest part of the book examines the potential for innovative policy solutions to address the real world problem of mitigating and adapting buildings to climate change. This publication contributes significantly to our understanding of the complexities of long-term energy efficiency in buildings. This book was originally published as a special issue of the Building Research & Information journal.

*Technology Business Incubation* Routledge

This unique book is a first for South Africa and for Africa, providing a broad coverage of topics in property finance, property

development, and property investment. There are specific chapters on commercial property finance and risk assessment, property economics, financial statement analysis, property tax, property law, property valuation, property development, market analysis, feasibility analysis, investment analysis, and property management. These topics are addressed from the point of view of commercial property finance. By necessity, the coverage is therefore very broad, and at an introductory level. However, because this is also the first South African book that addresses the full range of topics covered here, other readers will find this to be a valuable resource. The authors are experts in their respective fields: accounting, law, finance, taxation, economics, construction, valuation, feasibility, development, investment, and management.
