Practical SQL is an approachable and fast-paced guide to SQL (Structured Query Language), the standard programming language for defining, organizing, and exploring data in relational databases. The book focuses on using SQL to find the story your data tells, with the popular open-source database PostgreSQL and the pgAdmin interface as its primary tools. You'll first cover the fundamentals of databases and the SQL language, then build skills by analyzing data from the U.S. Census and other federal and state government agencies. With exercises and real-world examples in each chapter, this book will teach even those who have never programmed before all the tools necessary to build powerful databases and access information quickly and efficiently. You'll learn how to: - Create databases and related

tables using your own data - Define the right data types for your information - Aggregate, sort, and filter data to find patterns - Use basic math and advanced statistical functions - Identify errors in data and clean them up - Import and export data using delimited text files - Write queries for geographic information systems (GIS) - Create advanced queries and automate tasks Learning SQL doesn't have to be dry and complicated. Practical SQL delivers clear examples with an easy-to-follow approach to teach you the tools you need to build and manage your own databases. This book uses PostgreSQL, but the SQL syntax is applicable to many database applications, including Microsoft SQL Server and MySQL.

Post-Qualifying Mental Health Social Work Practice "O'Reilly Media, Inc."

Learning through practice lies at the heart of social work education, providing the opportunity for students to develop and employ the skills, experience and knowledge they need to become effective social workers. This exciting new addition to Palgrave's Practical Social Work series provides an integrated and

user-friendly approach to practice learning by putting placements within a broader learning framework. Rather than treating placements as an isolated aspect of the social work degree, *Practice Learning in Social Work* shows how they are relevant to all aspects of the social work experience. Divided in to three parts, this book's pragmatic approach mirrors students' own journey as they progress from preparation for practice, through to actual experience, and then beyond this to support personal and professional development right up to qualification as a Newly Qualified Social Worker. With a strong emphasis on service users and carers as central stake holders, *Practice Learning in Social Work* illustrates the practical nature of the profession with realistic case scenarios based on real life learning experiences, reflective learning exercises and practice led research references throughout. Progress checklists, linked to the Professional Capabilities Framework, also provide readers with the opportunity to assess their own strengths and learning needs.

The National Fire Protection Association (NFPA) and the International Association of Fire Chiefs (IAFC) are pleased to present you with the third edition of *Chief Officer: Principles and Practice*. The Third Edition addresses both Fire Officer III and Fire Officer IV levels of the 2020 Edition of NFPA 1021: Standard for Fire Officer Professional Qualifications and is designed to help future chief officers as they transition from company officer and become problem-solving leaders for their organization. Good leadership is an essential element in the successful operational management of any organization. Today's chief officers must prepare themselves and the staff they lead to navigate powerful

trends—including political, ethical, legal, and sociological—that are likely to shape the fire service, impacting department structures and roles in the community, and altering the demands placed not only on fire service leaders but also on the personnel they lead. The Third Edition features exceptional content to prepare today's fire service leaders to develop the leadership skills necessary to excel in their position and motivate their department members to become an efficient, effective, and safe response force. New to the Third Edition: A section on media relations programs that addresses communication methods, policy development, and crisis management A discussion of department risk management, including the importance of creating a risk management plan, taking an inventory of potential risks faced by department employees, and implementing control measures to correct deficiencies A section on preparing to deal with an active shooter or hostile event situation A discussion of the ways generational differences may influence a department member's workplace expectations and preferences Expanded coverage of diversity policies and practices and consideration of LGBTQ rights to reflect the current workforce Information on long-range planning, including how to create a capital improvement plan and meet training needs The Third Edition features: A clear division of Fire Officer III and IV content After-Action Review sections that include detailed chapter summaries, key terms, and Chief Officer in Action case scenarios designed to reinforce chapter content New Deputy Chief and Fire Chief Activities that encourage students to take what they have learned about the Job Performance Requirements covered in the chapters and apply it to their own departments New case study continued from Fire

Officer: Principles and Practice, Fourth Edition that addresses the progression of responsibility from Fire Officer I to Fire Officer IV

"This is the first book to give social workers the tools to understand their clients' legal needs and rights and to address them collaboratively and effectively. Lyn Slater and Kara Finck ground their text in a comprehensive grasp of the legal system and the inequities of race, class, and gender that shape clients' experiences. Social Work Practice and the Law is a powerful call for social workers to be passionate and skillful advocates for their clients. Essential reading for social workers and lawyers alike who serve low-income people entangled in systems that so often fail them." Dorothy Roberts, JD Kirkland & Ellis Professor, Northwestern University School of Law Author, Shattered Bonds: The Color of Child Welfare Based on the author's innovative and nationally recognized prototype for inter-professional work at Fordham University, this is the only volume about social work and the legal system that is written from the social worker's perspective. Devoid of "legalese," the book is designed to help social workers develop the ability to reappraise, question, and challenge the law to best serve their clients. It aims to promote the development of a more strategic relationship with the legal system—a partnership that can achieve more creative and just solutions to social problems. Exhaustive in scope, Social Work and the Law identifies current national and international trends and legal movements that support and invite inter-professional, critically competent social work participation. The book also identifies and explains the essential knowledge, skills, values, and attitudes necessary for the attainment of collaborative

critical competence when interacting with the legal system. Each chapter includes vivid case studies based on actual collaborations that illustrate the application of theory to practice. Chapters also include legal, social work, and evidence-based resources. Key Features: Promotes a proactive approach to the ways in which social workers can use law to promote clients' best interests Addresses all domains of social work practice—child welfare, housing law, educational access, disability law, benefits, and more Offers abundant case studies taken from the authors' real-life work Devoid of "legalese" and written from a social worker's perspective

Supervision and Professional Development in Social Work Practice aims to familiarize its readers with the current state of supervision in social work, provide them a common platform for reflection and action and thereby promote excellence in their respective learning, research and professional practice areas. It incorporates contributions by scholars, practitioners and students from various backgrounds, professional disciplines and countries. The ideas, concepts and practice frameworks discussed in this book are useful in any human service context. However, they need to be adapted with cultural sensitivity and appropriate levels of consultation and guidance to effectively challenge prevalent practice frameworks and support the embracing of new ideas to enhance professional and authentic engagement. The book utilizes several research studies, views, experiences and reflections, and includes numerous Voices from the Field, which provide diverse perspectives and viewpoints as well as practical help. This book will prove indispensable for academicians, practitioners, supervisors and supervisees as well as postgraduate and advanced undergraduate students of social work, counselling, psychology and education.

EBOOK: PERSONALISATION FOR SOCIAL WORKERS: OPPORTUNITIES AND CHALLENGES FOR FRONTLINE PRACTICE

Pearson Education

Transformative Social Work Practice presents an innovative and integrative approach towards critically reflective practice with an interweaving of micro, mezzo, and macro applications to real world demands. The authors explore issues commonly addressed by social workers, including health, mental health, addictions, schools, and family and community violence, while challenging assumptions and promoting ethically-driven, evidence-based practice perspectives to advocate for social justice and reduce disparities. The book is about redefining social work practice to meet the current and complex needs of diverse and vulnerable individuals, families, and communities in order to enhance their strengths in an era of unprecedented technological growth, globalization, and change.

Model Rules of Professional Conduct Thomson South-Western

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique

abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

The four-volume set LNCS 8513-8516 constitutes the refereed proceedings of the 8th International Conference on Universal Access in Human-Computer Interaction, UAHCI 2014, held as part of the 16th International Conference on Human-Computer Interaction, HCII 2014, held in Heraklion, Crete, Greece in June 2014, jointly with 14 other thematically similar conferences. The total of 1476 papers and 220 posters presented at the HCII 2014 conferences was carefully reviewed and selected from 4766 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers thoroughly cover the

entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 251 contributions included in the UAHCI proceedings were carefully reviewed and selected for inclusion in this four-volume set. The 60 papers included in this volume are organized in the following topical sections: web accessibility; design for all in the built environment; global access infrastructures and user experiences in universal access.

"This helpful text represents another brick in the wall for social workers and social work students seeking to make sense of personalisation/person-centred support, personal budgets and the changing role of social work in the future ... This book will help all concerned with social work make better sense of what this should look like - if it is to support social justice, inclusion and equality." Professor Peter Beresford OBE, Brunel University and Chair, Shaping Our Lives "This informative text bases the Personalisation discussion on real life examples and perspectives, providing a balanced account of the opportunities and obstacles faced by all stakeholders engaged in this agenda The final chapter on managing change provides the reader with an opportunity to step forward in time and consider how Personalisation might be located within the historical timeline of delivering social care and whether concepts of co-production, empowerment and citizenship can in fact become central to this agenda. A book to get you 'thinking' and 'doing'." Ali Gardner, Senior Lecturer, Manchester Metropolitan University, UK "The authors have written a timely and highly topical book on the

impact that Personalisation has and will have upon the world of Social Work. They do so in a very accessible way through highlighting the benefits of the model to all concerned, but crucially they explore some of the many concerns. In particular they address the anxieties expressed by qualified social workers upon their future role. ... I shall certainly draw upon the text for my own teaching and learning and will encourage students and practitioners to do the same." Paul Hollingdale, Course Leader, University of Huddersfield, UK Personalisation remains a huge talking point in the world of social care. This timely book addresses the tensions, opportunities and challenges faced by social workers attempting to implement personal funding and support. Written by three academics with extensive first hand experience of supporting people in personalised ways, the book highlights the ethical dilemmas and complexities of frontline practice and is grounded in a pragmatic and creative approach to personalisation. The authors offer an honest representation of positive aspects of personalisation and examine areas that cause concern. The book also: Contains scenarios based on realistic examples of supporting service users and carers Recognises the political, social, cultural and individual factors that interplay in personalisation Provides a balance between an academic understanding of personalisation and application in practice Presents a vision for what the future would look like with fully implemented personalisation in adult social care

The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First

published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact

evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.
