Sound HRM practices matter—they are a sine qua non of effective governance in democratic government—equally so at the local, regional, state and national levels of government. The NASPAA (Network of Schools of Public Policy, Affairs, and Administration) accreditation standards demand critical competencies for public managers that are vital to human resource managers and supervisors at all levels. These competencies include: skills to lead and manage in public governance; to participate in and contribute to the policy process; to analyze, synthesize, think critically, solve problems and make decisions; to articulate and apply a public service perspective; and to communicate and interact productively with a diverse and changing workforce and citizenry. This second edition of Human Resource Management is designed specifically with these competencies in mind to: Introduce and explore the fundamental purposes of human resource management in the public service and consider the techniques used to accomplish these purposes Provide exercises to give students practice for their skills after being introduced to the theory, foundation, and practices of public and nonprofit sector HRM Facilitate instruction of the material by introducing important topics and issues with readings drawn from the professional literature Provide information and examples demonstrating the interrelatedness of many of the topics in public sector HRM and the trends shaping public and nonprofit management, especially diversity, ethics, and technology. Demonstrate and describe differences among HRM practices in public, for-profit and nonprofit organizations, and between the levels of government. Human Resource Management is organized to provide a thorough discussion of the subject matter with extensive references to relevant literature and useful teaching tools. Thus, students will consider the issues, purposes, and techniques of HRM and conceptualize how varied their roles are, or will be, whether a personnel specialist in a centralized system or a supervisor managing in one of the increasingly common decentralized systems. Each chapter includes a thorough review of the principles and practices of HRM (including the why and the how), selected readings, important themes, diverse examples, key terms, study questions, applied exercises, case studies, and examples of forms and processes would-be managers will encounter in their roles.

The study of educational leadership makes little sense unless it is in relation to who the leaders are, how they are leading, what is being led, and with what effect. Based on the premise that learning is at the heart of leadership and that leaders themselves should be learners, the Leadership for Learning series explores the connections between educational leadership, policy, curriculum, human resources and accountability. Each book in the series approaches its subject

matter through a three-fold structure of process, themes and impact. Series Editors - Clive Dimmock, Mark Brundrett and Les Bell The effects of globalization are evident in education policy around the world. Governments from the United States to China are driving their education systems to produce more skilled, more flexible, more adaptable employees. The pressure to perform is all-pervasive, meaning present-day leaders have to go beyond the principles of humane and equitable management practice and look for a competitive advantage through strategies that enhance motivation, build capacity for organizational improvement, and produce better value-added performance. Human Resource Management in Education debates the fundamental question of how far effective human resource management policies can enable schools and colleges to transcend the paradoxes of the global reform agenda. It analyses the relationship between leadership, the classroom and results, and uses case studies to explore the extent to which performance is enhanced by distributed leadership and constrained by social, political and economic contexts. The book is divided into three parts: examining the current context of human resource management, by critically analysing globalization, human capital theory, and worldwide trends in government legislation, societal values, and teacher culture(s); exploring two pairs of contemporary themes in human resource management, by comparing the roles of leaders and followers, on the one hand, and contrasting learning and greedy organizations, on the other; looking at how the context and the themes impact on particular contemporary practices in human resource management, by analysing the selection and development of professionals, the remodelling of school teams and the management of performance. The authors carefully blend advocacy with evidence to ensure relevance for both practitioner and academic audiences across the globe. The book would be of particular use to students on masters courses in educational leadership.
