A Life on Our Planet Pebble

The enormous facts
about our solar system
can make your head
spin! You hear about
huge distances (like
the 483 million miles
separating the sun and
Jupiter), huge timelines
(it's been 14 billion
years since the big
bang), and even huger
mysteries (why the
universe is expanding).
How can all these big
numbers and concepts
make more sense?
Infographics! The
charts, maps, and
illustrations in this
book tell a visual story
to help you better

understand key concepts about our solar system. Crack open this book to explore mind-boggling questions such as: ? How long would it take a beam of light to cross the universe? ? What exactly would happen if you were sucked into a black hole? ? Does alien life reside somewhere in our galaxy? The answers are sure to be out of this world!

Going Around the

Sun Capstone Editions

Read Along or

Enhanced eBook:

Elementary readers will get a look into space exploration as they move through this fascinating nonfiction title. Readers will discover galaxies like the Milky Way, the effect gravity has on the inner and outer planets, comets,

asteroids, constellations, and what measures scientists are taking to learn more about the vast body of the universe and more, including the Hubble Telescope and the Mars Rover. With vivid images, intriguing facts, informational text, a glossary, and a list of helpful websites, readers are encouraged to discover what they would explore in deep space!

Stellar Space

National Geographic Books

Launched on Oct. 15, 1997, the spacecraft entered orbit around Saturn on June 30, 2004 (PDT). After its four-year prime mission, Cassini's tour was extended twice. Beginning in 2010, Cassini began a seven-year mission extension

in which it completed many moon flybys on Saturn and Titan. In April 2017, operators placed Cassini on an impact course that unfolded over five months of daring dives. On Sept. 15, 2017, the spacecraft made its final approach to the giant planet Saturn. But this encounter was like no other. This time, Cassini dived into the planet's atmosphere, sending science data for as long as its small thrusters could keep the spacecraft's antenna pointed at Earth. To its very end, Cassini was a mission of thrilling exploration. *Earth in 30 Seconds* Speedy Publishing LLC Help students in grades PK-K make connections and reinforce learning while keeping the classroom manageable using

Giant Book of Preschool Activities. This 304-page book provides practice for the skills and functions needed for early childhood development. With more than 26 themes and 500 activities, this book makes it practically impossible to run out of ideas for teaching social, motor, memory, and auditory skills. The book includes ideas for movement, rhyming, circles, counting, games, and centers and comes with reproducibles, literature selections, Web site suggestions, and an index of activities by skill. This book supports NAEYC standards and aligns with state, national, and Canadian provincial standards.

21ST CENTURY:**MYSTERIES OF DEEP
SPACE GUIDED****READING 6-PACK**

Ballantine Books
 “Fascinating . . .
 memorable . . .
 revealing . . . perhaps
 the best of Carl
 Sagan’s books.”—The
 Washington Post Book
 World (front page
 review) In *Cosmos*, the
 late astronomer Carl
 Sagan cast his gaze
 over the magnificent
 mystery of the
 Universe and made it
 accessible to millions
 of people around the
 world. Now in this
 stunning sequel, Carl
 Sagan completes his
 revolutionary journey
 through space and
 time. Future
 generations will look
 back on our epoch as
 the time when the
 human race finally
 broke into a radically

new frontier—space. In
Pale Blue Dot, Sagan
 traces the spellbinding
 history of our launch
 into the cosmos and
 assesses the future
 that looms before us as
 we move out into our
 own solar system and
 on to distant galaxies
 beyond. The
 exploration and
 eventual settlement of
 other worlds is neither
 a fantasy nor luxury,
 insists Sagan, but
 rather a necessary
 condition for the
 survival of the human
 race. “Takes readers
 far beyond *Cosmos* . . .
 Sagan sees humanity’s
 future in the
 stars.”—Chicago
 Tribune

 See amazing snapshots

from space & Learn more than forty fun facts about our universe Level 2 includes longer sentences with richer vocabulary, type set line to line to aid readability, varied photographic treatments, and brief chapters with simple illustrated diagrams and a glossary. Special features include How Big?, Take a Close Look, Did You Know?, Words to Know, Fun Facts and full color photographs, as well as a full page, simply labeled diagram showing body parts.

Ages 6+

Pale Blue Dot My First Book of Planets Profiles each of the planets in Earth's solar system, including Pluto, Ceres, Eris, Haumea, MakeMake, the sun, the Oort

cloud, comets, and more.

A TWISTED HISTORY: GENESIS AND THE COSMOS

Libraries Unlimited
A tour of outer space explores the solar system as well as stars, galaxies, and the birth of planets, and speculates on whether other intelligent beings exist in the universe.

21st Century:

Mysteries of Deep Space Carson-Dellosa Publishing

John Philip Hunter brings his passion and love for astronomy - and those travelers through the night sky, comets - to vivid life in his book, Comets for Kids: Travelers Through Space. This fascinating and informative book will take kids and adults alike on an amazing

and interesting journey through space, right alongside those moving objects. Learn All About Comets Comets for Kids: Travelers Through Space offers a wealth of information, written in a manner that kids can easily understand, about historical and recent comets. Some of the things your children will learn in this book are... - Why comets are called "travelers through space" - Where comets come from and how they form - What those long, bright tails are made of - What the most famous comets are - Why 2013 was considered "The Year of the Comet" Comets for Kids: Travelers Through Space offers a wealth of information, written in a manner that kids can easily

understand, about historical and recent comets. Throughout the book, readers will delight in the fantastic images of comets that have passed by our solar system in recent years. What happens to comets ultimately? What are some famous comets that still exist today? You and your children can spend a quiet afternoon exploring the wonders of these often mysterious travelers. Enjoy the trivia section that offers interesting information about the appearance of comets and their connections to famous people and historical events. A resources section provides links to some of the author's favorite sites and publications. We live in an exciting time when it comes to astronomy. This past

year alone has seen the passage of an asteroid and the comet ISON gracing our skies. This book will help fill you and your children in on what's to come, what comets to look for and how to find them, what created them and much more.

Jabberwocky
Uranus is the seventh planet from the sun and has a special feature, it tilts! Discover the mysteries of this ice giant that sits half in darkness for more than 40 years at a time!
Comets for Kids:
Travelers Through Space Quirk Books
This third entry in the Jumpstarts series focuses on Science

topics for upper elementary and middle school students. Maintaining the 99 Jumpstarts format of the two previous books, 99 Jumpstarts for Kids Science Research is divided into ten broad topical sections. Each topic is arranged in alphabetical order under its section. Topics include Body Parts, Energy, Animals, Heavens, Weather, Matter, Medicine, Technology, Environment, and Geology. This pathfinder approach aides students in the research process, helping them define important terms, offer beginning questions to help narrow their topic, furnish source ideas and some fun activities to explore each topic. Grades 4-8.

 Journey into space and find out all there is to know about Neptune. Exploring the Solar System Encyclopaedia Britannica
 Astronomy for kids! If you are looking for home school supplies, this book needs to be on your list. Through bright illustrations, young readers learn about our solar system to the tune of an old familiar song, "Over in the Meadow". In *Going Around the Sun: Some Planetary Fun*, readers also learn of our place in a very big universe and an appreciation for the world we live in. *Mother sun and her "family" of planets "spin," "roll," "tilt," "blow" and "whirl" around the Sun to the tune of "Over in the Meadow."* Each of

those actions is astronomically correct—for example, Earth is the one that "tilts," and that's what creates the seasons. It is also astronomically up-to-date, with Pluto being a "dwarf planet." Bright illustrations create an exciting mood, and there's plenty of interesting supplementary information in the back along with tips on related ways to integrate science, art, and literature in the classroom. Backmatter Includes: Further information about the planets! Tips from the author and illustrator. *Big Book of Stars and Planets* Sourcebooks, Inc.
 In *Dwarf Planets: Pluto and the Lesser Planets*, students will learn about the five discovered dwarf

planets in our solar system and make observations about orbital patterns, new discoveries, and more. Filled with fun facts, young learners will love exploring the scientific information and drawing conclusions about life now and in the future. The Inside Outer Space series takes readers on an intergalactic journey that unravels the mysteries of the universe. Each 24-page book informs readers in grades K-3 on the Sun, Earth, planets, and stars, while also igniting imaginations about the unknown. Stunning photographs and diagrams engage readers, while text-based questions aid in reading comprehension
