A compelling look at a new class of the affluent - the middle-class millionaires - whose attitudes and values are influencing and reshaping American life In this groundbreaking book, Russ Alan Prince and Lewis Schiff examine the far-reaching impact of the middle class millionaires—people who enjoy a net worth ranging from one million to ten million dollars and have earned rather than inherited their wealth. Comprising 8.4 million households and growing in number, the attitudes and behaviors of these working rich are exerting a powerful influence over our society. So who are these people? They believe in the benefits of hard work. They believe in investing in themselves, and in self improvement. They are more likely to focus on drawing financial gain from their work, and less inclined to be discouraged by failure. And they don't spend money on the extravagances indulged in by the very rich; instead, they wield their affluence according to middle-class values and ideals. From home security systems to health care, technology to travel, their spending choices are affecting us all - from the products we buy, to the communities in which we live, to the aspirations and values of the broader middle class and American population as a whole. In the bestselling tradition of *Bobos in Paradise* and *The Millionaire Next Door*, **THE MIDDLE-CLASS MILLIONAIRE** is a captivating narrative - part sociology, and part aspirational journey into the lives, attitudes, and values of the middle-class millionaires. Based on extensive surveys and research into more than 3,600 middle-class millionaire households around the country, this book will reshape our understanding of what it takes to be successful - and how all of us can achieve similar success.

Influence And Income Online: Three Millennial Millionaires Share Their Secrets Only six to eight years ago, most people who wanted to take a message or product to the world had to ask permission (from the authorities, associations, and governing bodies that centralized content distribution). But now, because of technology (particularly social media and video), decentralization is everywhere (technology inherently decentralizes). This has empowered everyone with a phone to reach the masses without ever worrying about asking for permission again. This book reveals how three millennial influencers did just that and took their message to hundreds of thousands (and sometimes millions) of followers—all without ever asking for "permission." This is the day when kids make \$1000s doing things adults once mocked with statements like: "keep making that face and it will become permanent!" "when are you going to stop dancing and go get a job!" "stop playing those video games, like someone's really going to pay you for that!" As more Fortune 500 brands fall by the waste side, people like Steve Larsen, Josh Forti, me, and many other entrepreneurs, many of which are featured in this book, are taking up the baton and running without looking back. We are the ones Steve Jobs envisioned when he ran the most famous technology commercial of all-time in 1997: Here's to the crazy ones. The misfits. The rebels. The troublemakers. The round pegs in the square holes. The ones who see things differently. They're

not fond of rules. And they have no respect for the status quo. You can quote them, disagree with them, glorify or vilify them. About the only thing you can't do is ignore them. Because they change things. They push the human race forward. While some may see them as the crazy ones, we see genius. Because the people who are crazy enough to think they can change the world, are the ones who do. Thank you Mr. Jobs, and now to the crazy ones, let's go get it! James Smiley (and remember, it's all about attitude!)

Super Founders John Wiley & Sons

Super Founders uses a data-driven approach to understand what really differentiates billion-dollar startups from the rest—revealing that nearly everything we thought was true about them is false! Ali Tamaseb has spent thousands of hours manually amassing what may be the largest dataset ever collected on startups, comparing billion-dollar startups with those that failed to become one—30,000 data points on nearly every factor: number of competitors, market size, the founder's age, his or her university's ranking, quality of investors, fundraising time, and many, many more. And what he found looked far different than expected. Just to mention a few: Most unicorn founders had no industry experience; There's no disadvantage to being a solo founder or to being a non-technical CEO; Less than 15% went through any kind of accelerator program; Over half had strong competitors when starting—being first to market with an idea does not actually matter. You will also hear the stories of the early days of billion-dollar startups first-hand. The book includes exclusive interviews with the founders/investors of Zoom, Instacart, PayPal, Nest, Github, Flatiron Health, Kite Pharma, Facebook, Stripe, Airbnb, YouTube, LinkedIn, Lyft, DoorDash, Coinbase, and Square, venture capital investors like Elad Gil, Peter Thiel, Alfred Lin from Sequoia Capital and Keith Rabois of Founders Fund, as well as previously untold stories about the early days of ByteDance (TikTok), WhatsApp, Dropbox, Discord, DiDi, Flipkart, Instagram, Careem, Peloton, and SpaceX. Packed with counterintuitive insights and inside stories from people who have built massively successful companies, *Super Founders* is a paradigm-shifting and actionable guide for entrepreneurs, investors, and anyone interested in what makes a startup successful.
