By analysing the rationales for sustainability strategies, this book addresses a timely question for managers, academics and MBAs: 'when does it pay to be green?' Based on solid theoretical foundations and empirical research, it clarifies the elements involved in the formation and evaluation of sustainability strategies in firms.

Farewell to the Good Old Days is a lively and intimate tale by David Greatrix, a man who has lived a dynamic professional life, first as an aerospace engineer and then as a professor of the subject. The book, leaning heavily on the actual life experiences of Greatrix and a number of his academic colleagues close and far away, is divided into two discrete parts; the book's narrator for both parts is nominally a fictional consolidated representation of Greatrix, drawing from various sources in addition to the author. Part One covers the narrator's childhood and early adulthood, followed by his moving into his years of growth as a professional breaking into the challenging field of aerospace engineering. Part Two tracks the narrator's subsequent twenty-five-year academic career as a professor of aerospace engineering at a university in a major urban centre. Prominent in this story are the many challenges the narrator encounters in his navigation of academe in a high-profile setting for engineering education. In an emotional narrative that never strays far from various shades of humour, the narrator shares the details of his teaching and

research experience at his institution, frequently bumping up against the pointy bits of an evolving cosmopolitan academic culture. In colourful detail, the narrator reveals the small successes, notable failures, unexpected events, and crushing disappointments that describe his tenure at his university. The narrator is especially candid in his revelations about episodes of betrayal. He takes aim at big targets, including the Canadian government, university administrators, and the academic superstructure as a whole. The result is an enlightening view into an individual's complicated experience in a demanding world that serves as a microcosm of society at large.

Jeff Speck has dedicated his career to determining what makes cities thrive. And he has boiled it down to one key factor: walkability. The very idea of a modern metropolis evokes visions of bustling sidewalks, vital mass transit, and a vibrant, pedestrian-friendly urban core. But in the typical American city, the car is still king, and downtown is a place that's easy to drive to but often not worth arriving at. Making walkability happen is relatively easy and cheap; seeing exactly what needs to be done is the trick. In this essential new book, Speck reveals the invisible workings of the city, how simple decisions have cascading effects, and how we can all make the right choices for our communities. Bursting with sharp observations and real-world examples, giving key insight into what urban planners actually do and how places can and do change, Walkable City lays out a practical, necessary, and eminently achievable vision of how to make our normal American cities great again.

This book can save you more than \$100,000. These days, most people assume you need to pay a boatload of money for a quality college education. As a result, students and their parents are willing to go into years of debt and potentially sabotage their entire financial futures just to get a fancy name on their diploma. But Zac Bissonnette is walking proof that this assumption is not only false, but dangerous—a class con game designed to rip you off and doom your student to a post-graduation life of near poverty. From his unique double perspective—he's a personal finance expert (at Daily Finance) AND a current senior at the University of Massachusetts—Zac figured out how to get an outstanding education at a public college, without bankrupting his parents or taking on massive loans. Armed with his personal knowledge, the latest data, and smart analysis, Zac takes on the sacred cows of the higher education establishment. He reveals why a lot of

the conventional wisdom about choosing and financing college is not only wrong but hazardous to you and your child's financial future. You'll discover, for instance, that: \* Student loans are NOT a necessary evil. Ordinary middle class families can—and must—find ways to avoid them, even without scholarships. \* College "rankings" are useless—designed to sell magazines and generate hype. If you trust one of the major guides when picking a college, you face a potential financial disaster. \* The elite graduate programs accept lots of people with non-elite bachelors degrees. So do America's most selective employers. The name on a diploma ultimately won't help your child have a more successful career or earn more money. Zac can prove every one of those bold assertions—and more. No matter what your current financial situation, he has a simple message for parents: "RELAX! Your kid will be able to get a champagne education on a beer budget!"

 Jihad vs. McWorld is a groundbreaking work, an elegant and illuminating analysis of the central conflict of our times: consumerist capitalism versus religious and tribal fundamentalism. These diametrically opposed but strangely intertwined forces are tearing apart—and bringing together—the world as we know it, undermining democracy and the nation-state on which it depends. On the one hand, consumer capitalism on the global level is rapidly dissolving the social and economic barriers between nations, transforming the world's diverse populations into a blandly uniform market. On the other hand, ethnic, religious, and racial hatreds are fragmenting the political landscape into smaller and smaller tribal units. Jihad vs. McWorld is the term that

distinguished writer and political scientist Benjamin R. Barber has coined to describe the powerful and paradoxical interdependence of these forces. In this important new book, he explores the alarming repercussions of this potent dialectic for democracy. A work of persuasive originality and penetrating insight, *Jihad vs. McWorld* holds up a sharp, clear lens to the dangerous chaos of the post-Cold War world. Critics and political leaders have already heralded Benjamin R. Barber's work for its bold vision and moral courage. *Jihad vs. McWorld* is an essential text for anyone who wants to understand our troubled present and the crisis threatening our future.

*Lemon-Aid* guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new *Lemon-Aid Used Cars and Trucks 2012-2013* has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.
