Whether attending conferences, visiting clients, or going to sales meetings, travel is an unavoidable necessity for many businesspeople. Today's high-tech enabled businessperson travels with electronic devices such as smartphones, tablets, laptops, health sensors, and Google Glass. Each of these devices offers new levels of productivity and efficiency, but they also become the weak link in the security chain: if a device is lost or stolen during travel, the resulting data breach can put the business in danger of physical, financial, and reputational loss. Online Security for the Business Traveler provides an overview of this often overlooked problem, explores cases highlighting specific security issues, and offers practical advice on what to do to ensure business security while traveling and engaging in online activity. It is an essential reference guide for any travelling business person or

security professional. Chapters are organized by travel stages for easy reference, including planning, departure, arrival, and returning home Touches on the latest technologies that today's business traveler is using Uses case studies to highlight specific security issues and identify areas for improved risk mitigation

Virtual Teams That Work offers a much-needed, comprehensive guidebook for business leaders and managers who want to create the organizational conditions that will help virtual teams thrive. Each chapter in this important book focuses on best practices and includes case studies and illustrative examples from a wide variety of companies, including British Petroleum, Lucent Technologies, Ramtech, SoftCo, and Whirlpool Corporation. These real-life examples demonstrate how the principles identified in the book play out within virtual teams. Virtual Teams That Work shows how organizations can put in place the structure to help team members who speak different languages and have different cultural values develop effective ways of communicating when there is little opportunity for the members to meet face-to-face. The authors also reveal how organizations can implement performance management and reward systems that will motivate team members to cooperate across multiple boundaries. And they offer the information to determine which technologies best fit a variety of virtual-team tasks and the level of information technology support needed.
