Annual Report 29 CFR, Part 1926

A new edition of Pound's groundbreaking shorter poems. If the invention of literary modernism is usually attributed to James Joyce, T. S. Eliot and Ezra Pound, it was Pound alone who provided (in Hugh Kenner's words) "the synergetic presence") to convert individual experiment into an international movement. In 1926 Pound carefully

sculpted his body of shorter poems into a definitive collection which would best show the concentration of force, the economy of means, and the habit of analysis that were, to him, the hallmarks of the new style. This collection, where Pound presented himself in a variety of characters or "masks," was called *Personae*. In 1926, *Personae's* publication gave solidity to a movement today the work stands as one of the classic texts of the twentieth century. Pound scholars Lea Baechler (of Columbia) and A. Walton Litz (Holmes Professor of English Literature at Princeton) have prepared a corrected text and supplied an informative "Note on the Text" explaining both Pound's original criteria for his selection and the volume's subsequent history.

### **ANNUAL REPORT, RELATIVE TO BANKS**

The Electrification of Russia, 1880-1926 is the first full account of the widespread adoption of electricity in Russia, from the beginning in the 1880s to its early years as a state technology under Soviet rule. Jonathan Coopersmith has mined the archives for both the tsarist and the Soviet periods to examine a crucial element in the modernization of Russia. Coopersmith shows how the Communist Party forged an alliance with engineers to harness the socially transformative power of this science-based enterprise. A centralized plan of electrification triumphed, to the benefit of the Communist Party and the detriment of local governments and the electrical engineers. Coopersmith's narrative of how this came to be

elucidates the deep-seated and chronic conflict between the utopianism of Soviet ideology and the reality of Soviet politics and economics.
