KeyThe basic
unit of body
structure is
the cell. Cells
have the
same basic
structure.
Function, size,
and shape
may differ.
Cells are very
small. You
need a
microscope to
see them.
Cells need
food, water,
and oxygen to
live and
function.
Figure 10-1
shows the cell
and its
structures.
The cell
membrane is
the outer

covering. It
encloses the
cell and helps
hold the cell's
shape.Body
Structure and
FunctionThe
structures
involved
include the
nasal passage,
the trachea,
and the lungs.
The
respiratory
system takes
oxygen from
the
environment
to be used
throughout
the body. In
humans,
oxygen is
taken into the
body by the
lungs, where it
and rapidly
diffuses into
the
blood.Body

 Body Structures
 And Functions
 There are different cavities in the human body that house various organ systems. The cranial cavity is the space within the skull, it protects the brain and other parts of the central nervous system. The lungs are protected in the pleural cavity. The abdominal cavity houses the intestines, liver and spleen. Human Body -
