Man should proceed with caution if modifications such as loading, excavation, or changes of the water regime are contemplated for slopes in Allegheny County, especially those slopes described on the map as

highly sensitive to disturbance by man. Features indicative of unstable slope conditions include: cracks in buildings, yard walls, and pools; doors and windows that jam; fences and other linear features bowed out

of line; tilted trees and utility poles; cracks and steplike ground features; hummocky ground; and water seeps. Geologic factors related to the landsliding process include rock types, layering, fracturing, and attitude; nature of soil cover; permeability of rocks and soils; and steepness of slope. book. Landsliding in Allegheny County, Pennsylvania Arcadia Publishing Impeccably researched and richly detailed, this book addresses the issue of translation between visual arts and landscape design in the 50-year career of American painter and environmental artist Patricia Johanson. Exploring the artist's search for an art of the real as a member of the postwar New York art world, it demonstrates that visual translation

cannot be understood solely through the works of art, instead attention must be paid to the process of creation. This book is an insightful attempt to confront a crucial question in the history of art through the work of a contemporary artist.

Simon and Schuster
Mining the Earth's Heat:

Hot Dry Rock Geothermal Energy describes the work carried out by the Los Alamos National Laboratory to turn an idealistic concept - that of drawing useful amounts of energy from the vast underground store of hot rock at reachable depths - into a practical reality. This book provides comprehensive documentation of the over two decades of experiments carried out at the test site at Fenton Hill, New Mexico, where the feasibility of accessing and extracting this vast

natural resource was finally demonstrated. It also discusses the numerous technical, administrative, and financial hurdles that had to be overcome along the way. This publication will no doubt prove invaluable to researchers around the world as they strive to move this now-proven technology toward commercial viability. In addition, it is a valuable source of relevant information for anyone interested in the world energy outlook for the 21st century and beyond.

HarperCollins

In this exceptional cultural history, Atlantic Senior Editor Ronald Brownstein—“one of America's best political journalists (The Economist)—tells the kaleidoscopic story of one monumental year that marked the city of Los Angeles’ creative peak, a glittering moment when popular culture was ahead of politics in predicting what America would become. Los Angeles in 1974 exerted more influence over popular

culture than any other city in America. Los Angeles that year, in fact, dominated popular culture more than it ever had before, or would again. Working in film, recording, and television studios around Sunset Boulevard, living in Brentwood and Beverly Hills or amid the flickering lights of the Hollywood Hills, a cluster of transformative talents produced an explosion in popular culture which reflected the demographic, social, and cultural realities of a changing America. At a

time when Richard Nixon won two presidential elections with a message of backlash against the social changes unleashed by the sixties, popular culture was ahead of politics in predicting what America would become. The early 1970s in Los Angeles was the time and the place where conservatives definitively lost the battle to control popular culture. *Rock Me on the Water* traces the confluence of movies, music, television, and politics in Los Angeles month by month through

that transformative, magical year. Ronald Brownstein reveals how 1974 represented a confrontation between a massive younger generation intent on change, and a political order rooted in the status quo. Today, we are again witnessing a generational cultural divide. Brownstein shows how the voices resistant to change may win the political battle for a time, but they cannot hold back the future.

The New York Times
Theater Reviews Springer

The Dictionary of Southern Appalachian English is a revised and expanded edition of the Weatherford Award-winning Dictionary of Smoky Mountain English, published in 2005 and known in Appalachian studies circles as the most comprehensive reference work dedicated to Appalachian vernacular and linguistic practice. Editors Michael B. Montgomery and Jennifer K. N. Heinmiller document the variety of English used in parts of eight states, ranging from West

Virginia to Georgia—an expansion of the first edition's geography, which was limited primarily to North Carolina and Tennessee—and include over 10,000 entries drawn from over 2,200 sources. The entries include approximately 35,000 citations to provide the reader with historical context, meaning, and usage. Around 1,600 of those examples are from letters written by Civil War soldiers and their family members, and another 4,000 are taken from

regional oral history recordings. Decades in the making, the Dictionary of Southern Appalachian English surpasses the original by thousands of entries. There is no work of this magnitude available that so completely illustrates the rich language of the Smoky Mountains and Southern Appalachia.

Springer Science & Business Media
This second and completely revised edition of Special Report No. 6 provides a comprehensive

review and report of work carried out since 1975. It emphasises the relationship between, and the correlation of, the units in to which the Precambrian rocks of England, Ireland, Scotland, Wales and the Channel Islands have been divided. The chapters also provide a comprehensive bibliography of the work on which the correlations have been based.

Everybody needs a rock -- at least that's the way this particular rock hound feels about it in presenting her own highly individualistic rules for finding just the right rock for you.

Anchor
This bulletin serves not only to introduce the non-geologist to the rich geology of Millard County, but also to provide professional geologists with technical information

on the stratigraphy, paleontology, and structural geology of the county. Millard County is unique among Utah's counties in that it contains an exceptionally complete billion-year geologic record. This happened because until about 200 million years ago the area of present-day Millard County lay near sea level and was awash in shallow marine waters on a continental shelf upon which a stack of fossil-bearing strata more than 6 miles (10 km) thick slowly accumulated. This

bulletin summarizes what is known about these strata, as well as younger rocks and surficial deposits in the county, and provides references to scientific papers that describe them in greater detail. Mountains North 30 x 60 (1:100,000-scale) quadrangles. These companion maps and this bulletin portray the geology of Millard County more completely and accurately than any previously published work.

Patricia Johanson and the Re-invention of Public

Environmental Art, 1958-2010 Ashgate Publishing, Ltd. KWIC Index of Rock Mechanics Literature, Part 2: 1969-1976 is an index of subjects in rock mechanics. The KWIC (keyword-in-context) index is produced by cyclic permutation of significant words in the title of the publication. The text covers materials in rock mechanics and geomechanics published around the 70s. The book will be of great use to students, researchers, and practitioners of

geological sciences.

The Gallatin Way, a
picturesque route heading
south through the canyon
to the west gate of
Yellowstone, boasts a
history covering more
than a century of
exploration,
homesteading and

development. Early
pioneers and adventurers
endured a rugged and
unforgiving terrain where
today's travelers speed
along a modern highway.
One might expect to see
dramatic shifts, yet little
change is evident in some
areas, while others teem
with contemporary
luxuries. Pairing historic
and modern photography
of the same locations,
Duncan T. Patten retraces
the marvel of this iconic
thoroughfare.

Unpopular at school and
subjected to her mother's
religious fanaticism at
home, Carrie White does

not have it easy. But while
she may be picked on by
her classmates, she has a
gift she's kept secret
since she was a little girl:
she can move things with
her mind. Doors lock.
Candles fall. Her ability
has been both a power
and a problem. And when
she finds herself the
recipient of a sudden act
of kindness, Carrie feels
like she's finally been
given a chance to be
normal. She hopes that
the nightmare of her
classmates' vicious taunts
is over . . . but an
unexpected and cruel

prank turns her gift into a
weapon of horror so
destructive that the town
may never recover.

Winner of the 1974
National Book Award "A
screaming comes across
the sky. . ." A few months
after the Germans' secret
V-2 rocket bombs begin
falling on London, British
Intelligence discovers that
a map of the city
pinpointing the sexual
conquests of one
Lieutenant Tyrone
Slothrop, U.S. Army,

corresponds identically to a map showing the V-2 impact sites. The implications of this discovery will launch Slothrop on an amazing journey across war-torn Europe, fleeing an international cabal of military-industrial superpowers, in search of the mysterious Rocket 00000, through a wildly comic extravaganza that has been hailed in The New Republic as “the most profound and accomplished American novel since the end of World War II.”

A CONFERENCE ON EARTHQUAKE WARNING AND RESPONSE, HELD IN SAN FRANCISCO, CALIFORNIA, ON NOVEMBER 7, 1975 : CONTRIBUTIONS FROM CITY OF SAN FRANCISCO, DIRECTOR OF EMERGENCY SERVICES ... [ET AL.]

Disc jockey Alan Freed coined the term “rock and roll” in the 1950s. Rooted in rockabilly, rhythm and blues, country and

western, gospel, and pop, the genre was popularized by performers like Elvis Presley, Bill Haley, Chuck Berry and Jerry Lee Lewis. Rock and roll’s originators and revivalists continue to entertain crowds at roots music festivals worldwide. This book presents stories about performers’ lives on the road and in the studio, along with the stories behind popular songs. Informative biographical profiles are provided. Artists sharing their experiences include Dale Hawkins, Big Jay McNeely, Ace Cannon, Sleepy

LaBeef, Billy Swan, Robin Luke, Rosie Flores and James Intveld. Conway Twitty, Buck Owens and Janis Martin are also featured.
