This book is the first of three volumes on conflict resolution for school administrators. The introduction provides a context for the discussion by outlining seven human systems levels at which conflict can occur and suggesting that the approach to dealing effectively with conflict varies with the level of the system involved. Chapter 1 explores the nature of conflict and its sources. Chapter 2 suggests a positive attitudinal stance useful for administrators engaging in conflict resolution. Ten attitudes are identified that, if adopted, will lay the foundation for the successful management of conflict. The third chapter presents a model for understanding conflict resolution and the distinction between conflict management and negotiation. Specific processes for conflict management and negotiation are presented in the fourth chapter, providing guidelines for resolving conflicts as they emerge at any human systems level. Twelve figures are included. Contains 15 references. (LMI)

This book is for both managers and those they manage. It is for both individuals and teams. It is a practical book which, I hope, will speak to both your hearts and your minds. Since this book was first published in 2000, I have received many encouraging comments from readers telling me what a difference it has made to their lives. The book has been purchased by libraries, prisons,

social services, universities and students. It has been recommended as essential reading material by various training organizations and educational establishments. It has also been translated into three languages. But the book was a hardback edition retailing at a high price. This meant that it was out of the reach of many of the people for whom I originally wrote the book. I hope that by having it republished in paperback at a more affordable price range, more people will be able to purchase it and put the skills into practice. I know this book works. It is based on material from the excellent 12 Skills Programme from the Conflict Resolution Network of Australia (CRN). ([www.crnhq.org](http://www.crnhq.org)). While grappling with my own conflict issues, fate brought me into contact with the teachings of the CRN, a network of people with a common commitment to conflict resolution, co-operative communication strategies and related skills.

**Win-win Approaches to Conflict Resolution** Simon and Schuster

Every couple has disagreements. All too often, though, when we engage in arguments, our goal is not to resolve the conflict at hand, but rather, to win the fight. Unfortunately, when you win an argument, your spouse is the loser, and nobody wants to be or live with a loser. When you resolve a conflict, your spouse becomes your friend. Good marriages are based on friendship, not on winning arguments. Now, Gary Chapman provides couples with a simple blueprint for achieving win-win solutions to everyday conflicts and disagreements. By learning how to listen empathetically, respecting each other's ideas and feelings, and understanding why particular issues are so important to their spouse, couples can find solutions that result not only in resolving the conflict at hand, but also leave both partners feeling loved, listened to, and appreciated.

## HOW TO MANAGE CONFLICT

Career PressInc

One Paradigm, Many Worlds: Conflict Resolution across the Disciplines surveys how the paradigm of collaborative conflict resolution shapes a variety of disciplines. Conflict resolution examines the theory, research, strategies and spirit that accompany subscription to this “win-win” approach to conflict. In the past few decades, such a collaborative approach has emerged to challenge existing “win-lose” paradigms to approaching conflict that are predicated on some form of violence and unacknowledged/ unchanging power differentials. By challenging these existing paradigms, One Paradigm, Many Worlds documents and instructs on the merits of the collaborative approach to conflict resolution. It promises a broad and contemporary examination of how this paradigm both influences and holds the potential to influence a number of different professional and academic disciplines. The text is organized in four sections. They focus on the application of conflict resolution in the human services, elementary/secondary education, higher education, and a range of other disciplines (philosophy, communication, international relations). With such a breadth contained in the text, One Paradigm, Many Worlds’ unifying core is the centrality of conflict resolution as a paradigm supportive of cooperation, positive communication and relationship to self, to others, to organizations and institutions, and to society.

## 50 ACTIVITIES FOR CONFLICT RESOLUTION

Penguin

"This is a book about making peace, but it is new in tone; there is no call for sacrifice here, nor for altruism, but a steady insistence on realism in the pursuit of one's interests. In pursuing win-win strategies, the participants in conflict seek their advantage. What is new is the realization that this can often be gained without the discomfiture of competitors. Solutions that satisfy one's competitor's needs as well as one's own tend to be lasting. The broad purpose of this volume is to introduce and illustrate a framework that looks to solutions that are maximally satisfying and minimally damaging to each of the parties"-- Foreword.
