Richard Owen was, after Darwin, the most important figure in Victorian natural history. He was, for most of the six decades of his career, Britain's foremost comparative anatomist and vertebrate palaeontologist. As the most renowned opponent of natural selection, Owen was type-cast as a Cuvierian creationist and became the bete noire of the Darwinian evolution debate. In this

comprehensive intellectual and scientific biography, Nicolaas Rupke argues that Owen was no simple-minded anti-evolutionist and, moreover, should be freed from the distortion of the evolution dispute that was only a minor part of his work, yet has come to dominate his memory.

Medical microbiology concerns the nature, distribution and activities of microbes and how they impact on health

and wellbeing, most particularly as agents of infection. Infections remain a major global cause of mortality and in most hospitals around one in ten of those admitted will suffer from an infection acquired during their stay. The evolution of microbes presents a massive challenge to modern medicine and public health. The constant changes in viruses such as influenza, HIV, tuberculosis, malaria and SARS demand vigilance and insight into the underlying process. Building on the huge success of previous editions, *Medical Microbiology 18/e* will inform and inspire a new generation of readers. Now fully revised and updated, initial sections cover the basic biology of microbes, infection and immunity and are followed by a systematic review of infective agents,

their associated diseases and their control. A final integrating section addresses the essential principles of diagnosis, treatment and management. An unrivalled collection of international contributors continues to ensure the relevance of the book worldwide and complementary access to the complete online version on Student Consult further enhances the learning experience. *Medical Microbiology* is explicitly geared to clinical practice and is an ideal textbook for medical and biomedical students and specialist trainees.
