SOCIOLOGISTS' TALES

University of California Press

Forensic Science provides a comprehensive overview of the sociology of forensic science. Drawing on a wealth of international research and case studies, it explores the intersection of science, technology, law and society and examines the production of forensic knowledge. The book explores a range of key topics such as:

- The integration of science into police work and criminal investigation
- The relationship between law and science
- Ethical and social issues raised by new forensic technology including DNA analysis
- Media portrayals of forensic science
- Forensic policy and the international agenda for forensic science

This new edition has been fully updated, particularly with regard to new technology in relation to the various new forms of DNA technology and facial recognition. Updates and additions include:

- Facial recognition technology
- Digital forensics and its use in policing
- Algorithms (such as probabilistic genotyping)
- Genealogical searching
- Phenotyping

This new edition also reviews and critically appraises recent scholarship in the field, and new international case studies have been introduced, providing readers with an international comparative perspective. Engaging with sociological literature to make arguments about the ways in which forensic science is socially constituted and shapes justice, Forensic Science provides an excellent introduction to students about the location of forensic science and the ways it fits within the criminal justice system, as well as systems of professionalisation and ethics. It is important and compelling reading for students taking a range of courses, including criminal investigation, policing, forensic science, and the sociology of science and technology.

Introduction to Sociology 2e Taylor & Francis

This groundbreaking book is about what 'popular culture' means in France, and how the term's shifting meanings have been negotiated and contested. It represents the first theoretically informed study of the way that popular culture is lived, imagined, fought over and negotiated in modern and contemporary France. It covers a wide range of overarching concerns: the roles of state policy, the market, political ideologies, changing social contexts and new technologies in the construction of the popular. But it also provides a set of specific case studies showing how popular songs, stories, films, TV programmes and language styles have become indispensable elements of 'culture' in France. Deploying yet also rethinking a 'Cultural Studies' approach to the popular, the book therefore challenges dominant views of what French culture really means today.

It is possible to be irrational without being uneconomic? What is the link between value and values? What do economists do when they explain? We live in times when the economic logic has become unquestionable and all-powerful so that our quotidian economic experiences are defined by their scientific construal. This book is the result of a

This book maps the intersections between sociology and feminism in the Indian context. It retrieves the lives and work of women pioneers of and in sociology, asking crucial questions of their

feminisms and their sociologies. The chapters address the experiential realities of women in the field, pedagogical issues, methodological frameworks, mentoring processes and artistic engagements with academic work. The volume's strength lies in bringing together Indian scholars from diverse social backgrounds and regions, reflecting on the specificity of the Indian social sciences. The chapters cover a range of key areas, including sexuality, law, environment, science and medicine. This volume will greatly interest students, teachers, researchers and practitioners of sociology, women's studies, gender studies and feminism, politics and postcolonial studies.

INTRODUCTION TO SOCIOLOGY : SOCI 1120

University of Michigan Press

The purpose of this book is to explore new developments in the field of economic sociology. It contains cutting-edge theoretical discussions by some of the world's leading economic sociologists, with chapters on topics such as the economic convention, relational sociology, economic identity, economy and law, economic networks and institutions. The book is distinctive in a number of ways. First, it focuses on theoretical contributions, by pulling together and extending what the contributors believe to be the most important theoretical innovations within their own particular areas of the field. Second, there are contributions by leading economic sociologists from both the US and Europe, which gives the book both wider scope and appeal, while also creating the opportunity for some interesting dialogue between distinct theoretical traditions. The book will be of interest to researchers, Ph.D. students, and advanced students on both side of the Atlantic, and indispensable in advanced economic sociology courses.

Imagining Imagining Verso

This book provides an extensive analysis and discussion of the transnational mobilization of citizens and youth, alongside the production of creative, imaginative, and constructive solutions to the European crisis. The volume provides a variety of interdisciplinary analyses, as well as a series of perspectives on populism that have not been addressed extensively, including an examination of left-wing populism, the constituent power dimension of populism, and transnational manifestations of populism, contributing to debates on political science, political sociology, social movements studies, and political and constitutional theory.

With the global expansion of reproductive technologies, there are ever more ways to create a family, and more family types than ever before. This book explores the experiences of those persons - whether single, in a couple, or part of collective co-parenting arrangements; whether hetero- or homosexual; whether cis- or transgender - who are creating what has been termed 'new family

forms' with reproductive 'assistance'. Drawing on qualitative research from around the world, the book is particularly anchored in two bodies of social science scholarship - sociological and anthropological inquiries into the cultural impact of reproductive technologies on the one hand, and parenting culture studies on the other. It seeks to create fertile conversations between these scholarships, highlighting the intersections in the ways we think about conceiving and caring for children in today's 'reproductive landscape'. Focusing specifically on persons whose reproductive journeys do not conform to dominant scripts, the book traces the many ways in which intentions, expectations and technological developments contribute to changing and enduring conceptions of good parenthood in the twenty-first century. Taking a holistic perspective, the book presents deep insights into the experiences not only of (intending) parents, but also of donors, surrogates, medical professionals and activists. The collection will be of interest to an international readership of scholars of gender, reproduction, parenting and family life. The chapters in this book were originally published as a special issue of *Anthropology & Medicine*.

Introduction to Sociology 2e adheres to the scope and sequence of a typical, one-semester introductory sociology course. It offers comprehensive coverage of core concepts, foundational scholars, and emerging theories, which are supported by a wealth of engaging learning materials. The textbook presents detailed section reviews with rich questions, discussions that help students apply their knowledge, and features that draw learners into the discipline in meaningful ways. The second edition retains the book's conceptual organization, aligning to most courses, and has been significantly updated to reflect the latest research and provide examples most relevant to today's students. In order to help instructors transition to the revised version, the 2e changes are described within the preface. The images in this textbook are grayscale. Authors include: Heather Griffiths, Nathan Keirns, Eric Strayer, Susan Cody-Rydzewski, Gail Scaramuzzo, Tommy Sadler, Sally Vyain, Jeff Bry, Faye Jones

Imagining the popular in contemporary French culture Oxford University Press

Imagining Justice seeks to move away from normative thinking about justice, particularly in the area of justice education, suggesting that what is needed today is a way to think about the enterprise of justice that will capture its full potential. By providing an introduction to the intellectual potential of the field of justice, we can acknowledge that the field is wider than formerly recognized, and ultimately imagine the full richness that justice can encompass.

This timely book sets social entrepreneurship in a historical context, from its philanthropic beginnings in the Victorian era to the present day, against the backdrop of contemporary global capitalism.

An Introduction to Health Sociology UPNE

The late 20th century was a formative phase in the history of digital media culture. The introduction of "new media" was associated with promises for the future that still resonate today. This book brings together contributions that discuss key aspects of the "imaginaries" surrounding new media in this epoch. The focus is on the works of the media artist group Van Gogh-TV, especially the historically very important interactive television project "Piazza virtuale" (1992). The editors PD Dr. Christoph Ernst is Research Assistant at the University of Bonn. Prof. Dr. Jens Schroter is Professor of Media Studies at the University of Bonn.

A Critical Introduction Routledge

Bringing together the experience, perspective and expertise of Paul Farmer, Jim Yong Kim, and Arthur Kleinman, *Reimagining Global Health* provides an original, compelling introduction to the field of global health. Drawn from a Harvard course developed by their student Matthew Basilio, this work provides an accessible and engaging framework for the study of global health. Insisting on an approach that is historically deep and geographically broad, the authors underline the importance of a transdisciplinary approach, and offer a highly readable distillation of several historical and ethnographic perspectives of contemporary global health problems. The case studies presented throughout *Reimagining Global Health* bring together ethnographic, theoretical, and historical perspectives into a wholly new and exciting investigation of global health. The interdisciplinary approach outlined in this text should prove useful not only in schools of public health, nursing, and medicine, but also in undergraduate and graduate classes in anthropology, sociology, political economy, and history, among others.

The Case for Sociology Edward Elgar Publishing

Second Opinion, Sixth Edition, is an essential text for students of health sociology, introducing students to the theories, concepts, and contexts needed to understand the social origins of health and illness. The book covers various sociological theories and perspectives relevant to health, including: the social patterns in the distribution of health and illness, the social construction of health and illness, and the social organization of health care. Now fully updated, this sixth edition features new chapters on young people's health, the social determinants of obesity and health, and medical technology. *Second Opinion* encourages students to rethink their own pre-conceptions and adopt a second opinion about how health, illness, and the health care system are by-products of the way a society is organized.

Imagining Windmills presents a compilation of scholarly chapters by selected authors of global standing in the arts therapies. This book reflects the theme of the 15th International Conference of the European Consortium for Arts Therapies (ECArTE), held in Alcalá de Henares, Spain, birthplace of Miguel de Cervantes. This innovative work seeks to further understanding of arts therapy education, practice and research and incorporates current thinking from art therapists, dance-movement therapists, dramatherapists and music therapists. Writers from Belgium, Germany, Greece, India, Israel, Italy, The Netherlands, Spain, Sweden, UK and USA combine to give an international voice to the book, which celebrates cultural distinctiveness, while also presenting shared intercultural

developments in the professions. This interdisciplinary publication explores questions of the unknown and the imagined, misconception, delusion, truth and trust in the arts therapies. It enquires into ways in which education and the practice of the arts therapies engage with the imagination as a place of multiple realities, which may lead us closer to finding our truth. This book will be of interest and relevance not only to those in the arts therapeutic community, but also to a broad audience including those in related professions – for instance psychology, sociology, the arts, medicine, health and wellbeing and education.

An Introduction Routledge

Using a critical, inequality-based approach, *Thinking About Sociology* explores social theory through real-world examples that challenge students to rethink their own assumptions about their roles in society and the social institutions with which they interact. Through the two chapters on research methods and multiple chapters on various inequalities, a focus is placed on building a solid critical sociological foundation that allows for the development of complex thinking, research, and problem-solving skills throughout. The robust visual program, integration of important questions, and useful student-friendly pedagogy -- including relevant, real-world examples -- keep students reflective and engaged. The new, second edition is comprehensive, including a new chapter on crime and deviance, and yet concise, with more focused coverage of gender and sexuality to better reflect teaching and learning approaches across Canada. Thoroughly updated data, theory, visuals, research, and topics in every chapter provide a contemporary and in-depth picture of sociology as a discipline today.

Black Feminist Sociology offers new writings by established and emerging scholars working in a Black feminist tradition. The book centers Black feminist sociology (BFS) within the sociology canon and widens it to feature Black feminist sociologists both outside the US and the academy. Inspired by a BFS lens, the essays are critical, personal, political and oriented toward social justice. Key themes include the origins of BFS, expositions of BFS orientations to research that extend disciplinary norms, and contradictions of the pleasures and costs of such an approach both academically and personally. Authors explore their own sociological legacy of intellectual development to raise critical questions of intellectual thought and self-reflexivity. The book highlights the dynamism of BFS so future generations of scholars can expand upon and beyond the book's key themes.

Touching and Imagining Routledge

C. Wright Mills' classic *The Sociological Imagination* has inspired generations of students to study Sociology. However, the book is nearly half a century old. What would a book address, aiming to attract and inform students in the 21st century? This is the task that Steve Fuller sets himself in this major new invitation to study Sociology. The book: Critically examines the history of the social sciences to discover what the key contributions of sociology have been and how relevant they remain. Demonstrates how biological and sociological themes have been intertwined from the beginning of both disciplines, from the 19th century to the present day. Covers virtually all of sociology's classic theorists and themes. Provides a glossary of key thinkers and concepts. This book sets the agenda for imagining sociology in the 21st century and will attract students and professionals alike.
