Students can easily misstep when they first begin to do research. Leanne C. Powner's new title *Empirical Research and Writing: A Student's Practical Guide* provides valuable advice and guidance on conducting and writing about empirical research. Chapter by chapter, students are guided through the key steps in the research process. Written in a lively and engaging manner and with a dose of humor, this practical text shows students exactly how to choose a research topic, conduct a literature review, make research design decisions, collect and analyze data, and

then write up and present the results. The book's approachable style and just-in-time information delivery make it a text students will want to read, and its wide-ranging and surprisingly sophisticated coverage will make it an important resource for their later coursework.

With more than three-quarters of a million copies sold since its first publication, *The Craft of Research* has helped generations of researchers at every level—from first-year undergraduates to advanced graduate students to research reporters in business and government—learn how to conduct effective and meaningful research. Conceived by seasoned researchers and educators Wayne C. Booth, Gregory G. Colomb, and Joseph M. Williams, this fundamental work explains how to find and evaluate sources, anticipate and respond to reader reservations, and integrate these pieces into an argument that stands up to reader critique. The fourth edition has been thoroughly but respectfully revised by Joseph Bizup and William T. FitzGerald. It retains the original five-part structure, as well as the sound advice of earlier editions, but reflects the way research and writing are taught and practiced today. Its chapters on finding and engaging sources now incorporate recent developments in library and Internet research, emphasizing new techniques made possible by online databases and search engines. Bizup and FitzGerald provide fresh examples and standardized terminology to clarify concepts like argument, warrant, and problem. Following the same guiding principle as earlier editions—that the skills of doing and reporting research are not just for elite students but for everyone—this new edition retains the accessible voice and direct approach that have made *The Craft of Research* a leader in the field of research reference. With updated examples and information on evaluation and using contemporary sources, this beloved classic is ready for the next generation of researchers.

In *Sleuthing the Alamo*, historian James E. Crisp draws back the curtain on years of mythmaking to reveal some surprising truths about the Texas Revolution--truths often obscured by both racism and "political correctness," as history has been hijacked by combatants in the culture wars of the past two centuries. Beginning with a very personal prologue recalling both the pride and the prejudices that he encountered in the Texas of his youth, Crisp traces his path to the discovery of documents distorted, censored, and ignored--documents which reveal long-silenced voices from the Texan past. In each of four chapters focusing on specific documentary "finds," Crisp uncovers the clues that led to these archival discoveries. Along the way, the cast of characters expands to include: a prominent historian who tried to walk away from his first book; an unlikely teenaged "speechwriter" for General Sam Houston; three eyewitnesses to the death of Davy Crockett at the Alamo; a desperate inmate of Mexico City's Inquisition Prison, whose scribbled memoir of the war in Texas is now listed in the Guinness Book of World Records; and the stealthy slasher of the most famous historical painting in Texas. In his afterword, Crisp explores the evidence behind the mythic "Yellow Rose of Texas" and examines some of the powerful forces at work in silencing the very voices from the past that we most need to hear today. Here then is an engaging first-person account of historical detective work, illuminating the methods of the serious historian--and the motives of those who prefer glorious myth to unflattering truth.

Final advice from the great Peter Drucker for driving growth and profitability in the 21st Century—with a new foreword from the author "We need a new theory of management. The assumptions built into business today are not accurate." - Peter Drucker Based on multiple interviews and working sessions with Peter Drucker during the last year of his life, *The Definitive Drucker* reveals the management luminary's most important concepts and applies them real-life business risks and opportunities. The book sheds light on the most pressing management issues, such as the role of the CEO, why so many leaders fail, and the fragility and interdependencies of our economic and social systems, and it imparts Drucker's views on current business practices, technological, economic, and social changes, and trends—many of which Drucker predicted decades ago. A celebration of this extraordinary man's life and work, *The Definitive Drucker* offers a unique opportunity to use Drucker's final business lessons to strategize, create, and succeed in any market.

We all have a 100% chance of dying--eventually. But what are the world's biggest killers? When are you most at risk? And what can you do to postpone the inevitable for as long as possible? *Death: A Survival Guide* offers a unique insight into the biggest threats to life and limb in the industrialized world. Sarah Brewer's comprehensive and thorough survey looks at 100 causes of death from the most common such as heart disease, smoking related deaths and domestic accidents to the unusual and downright bizarre lightning strikes and animal attacks. This fascinating--and occasionally sideways--look at death and dying will help you understand the most common causes of death and how each one affects the human body. "At a glance" statistics reveal who dies where, when and how often; lists of warning signs, symptoms and risk factors allow you to determine the chances of it happening to you; and finally case studies on prevention, treatment and cures describe the best steps you can take to avoid meeting your maker in this way.
