Artful questioning may be the most powerful tool a teacher has in her instructional toolkit to manage the class, engage students with the subject matter, encourage dialogue, and deepen understanding. Educators are encouraged to break the pattern of low-level daily procedural questioning and instead focus powerful questions that increase student engagement and insure their mastery of content and skills. Powerful questioning may engender deep, diverse, creative, and metacognitive thinking. The authors, all with extensive teaching experience, describe powerful questioning in English Language Arts, Mathematics, History and Social Studies, and Science through both exposition and narration and using vignettes of teacher practice. Their focus is on those moments when teachers and students are engaged in classroom questioning tasks that involve face-to-face interactions and oral discourse,

which comprise the great majority of time spent in schools.

The first book on the topic. Following an overview of different forms of feminism, and an introduction to feminism in music therapy, part one deals with the sociological implications of feminist worldviews of music therapy. Part two examines clinical work from a feminist perspective. Part three critically reflects on significant aspects of music therapy that relate to feminism, including the use of mother concepts, gender roles, gender messages in the song literature, the competitive separation of music therapy practices, and the representation of women in music, healthcare, and music therapy. Part four focuses on specific areas of training in music therapy from a feminist perspective including pedagogy, supervision, assessment, research, and ethics.

These easy-to-implement activities engage young children as they identify things in their natural environment and the man-made environment, explore different types of maps, and construct a variety of maps to answer the

compelling question, "What is my place in the world?" A rich variety of children's literature, including informational text, helps them learn the geography content and increase their spatial understanding of their environment. The World Around Me integrates a comprehensive variety of Common Core State Standards for reading and language arts. One of the best ways to engage young children is by involving them in projects. Activities in this unit utilize the Dimensions of the C3 Framework's Inquiry Arc as teachers are encouraged to serve as facilitators in inquiry-based lessons. If Chromebooks or I-Pads are available, students use Google Earth to explore the world as they create and seek to answer their own questions.

"To know things, for us to know things, is bad for them. We get to wanting and when we get to wanting it's bad for them. They think we want what they got . . . That's why they don't want us reading." -- Nightjohn "I didn't know what letters was, not what they meant, but I thought it might be something I wanted to know. To learn."--Sarny Sarny, a female slave at the Waller plantation, first sees Nightjohn when he is brought there with a rope around his neck, his body covered in scars. He had escaped north to freedom, but he came back--came back to teach reading. Knowing that the penalty for reading is dismemberment Nightjohn still returned to slavery to teach others how to read. And twelve-year-old Sarny is willing to take the risk to learn. Set in the 1850s, Gary Paulsen's groundbreaking new novel is unlike anything else the award-winning author has written. It is a meticulously researched, historically

accurate, and artistically crafted portrayal of a grim time in our nation's past, brought to light through the personal history of two unforgettable characters.

The achievement of students of color continues to be disproportionately low at all levels of education. More than ever, Geneva Gay's foundational book on culturally responsive teaching is essential reading in addressing the needs of today's diverse student population. Combining insights from multicultural education theory and research with real-life classroom stories, Gay demonstrates that all students will perform better on multiple measures of achievement when teaching is filtered through their own cultural experiences. This bestselling text has been extensively revised to include expanded coverage of student ethnic groups: African and Latino Americans as well as Asian and Native Americans as well as

new material on culturally diverse communication, addressing common myths about language diversity and the effects of "English Plus" instruction.

Grounded in a critical sociocultural approach, this volume examines issues associated with teaching and learning difficult histories in international contexts. Defined as representations of past violence and oppression, difficult histories are contested and can evoke emotional, often painful, responses in the present. Teaching and learning these histories is contentious yet necessary for increased dialogue within conflict-ridden societies, reconciliation in post-conflict societies, and greater social cohesion in long-standing democratic nations.

Focusing on locations and populations across the globe, chapter authors investigate how key themes—including culture, identity, collective memory, emotion, and multi-perspectivity, historical consciousness, distance, and amnesia—inform the teaching and learning of difficult histories.

In a world of political upheaval, rising inequality, catastrophic climate change, and widespread doubt of even the most authoritative sources of information, is there a place for critique? This book calls for a systematic reappraisal of critical thinking—its assumptions, its practices, its genealogy, its predicament—following the principle that critique can only start with self-critique. In *A Time for Critique*, Didier Fassin, Bernard E. Harcourt, and a group of eminent political theorists, anthropologists, sociologists, philosophers, and literary and legal scholars reflect on the multiplying contexts and forms of critical discourse and on the social actors and social

movements engaged in them. How can one maintain sufficient distance from the eventful present without doing it an injustice? How can one address contemporary issues without repudiating the intellectual legacies of the past? How can one avoid the disconnection between theory and action? How can critique be both public and collective? These provocative questions are addressed by revisiting the works of Foucault and Arendt, Said and Césaire, Benjamin and Du Bois, but they are also given substance through on-the-ground case studies that treat subaltern criticism in Palestine, emancipatory mobilizations in Syria, the antitorture campaigns of Sri Lankan activists, and the abolitionism of the African American critical resistance and undercommons movements in the United States. Examining lucidly the present challenges of critique, *A Time for Critique* shows how its theoretical reassessment and its emerging forms can illuminate the imaginative modalities to rejuvenate critical praxis.

"The Lewis and Clark Corps of Discovery is often presented as an exciting adventure story of discovery, friendship, patriotism. However, when viewed through a non-colonial lens, this same period in U.S. History can be understood quite differently. In *BEYOND ADVENTURE*, the authors provide a conceptual framework, ready-to-use lesson plans, and teaching resources to address oversimplified versions of the Lewis and Clark expedition"--
