Effective Practices in Early Childhood Education Human Kinetics

Social Studies and Young Children presents developmentally appropriate strategies for teaching social studies to young children, with a focus on NCSS and NAEYC standards and using trade books, activities, and other resources designed to reach young children. Written in an easy-to-understand style, the book weaves current research-based principles of developmentally appropriate practice throughout. Through the book's experiential, hands-on learning approach, teachers see how to reach young learners, pique their interest, and use their natural curiosity to develop more critical thinking. The developmental learning focus promotes the idea that by understanding how young children learn, teachers will be more successful in presenting material in a way that children are able to comprehend, further allowing them to build knowledge as they are developmentally able to make sense of the material. Cross-curricular teaching and learning is promoted through the inclusion of a list of trade books in each chapter. A variety of strategies, activities, resources, and key chapter sections illustrate the concepts and help students make the connections to daily classroom practice. The First Edition of *Social Studies and Young Children* includes: Students make the connections between the theory and learning of social studies. Chapter 1 presents helpful background information about learning

theory, including an illustrative table that summarizes theorists and their ideas about young learners. Learning and understanding of the text concepts, diversity, and inclusion are enhanced through a variety of key chapter sections. Students become familiar with what children should be learning as they plan for learning goals. Included are 10 NCSS themes and relevant NAEYC standards listed in every chapter. An understanding of what is developmentally appropriate for teaching social studies content and concepts is accomplished through references to child development and DAP throughout the book. Concepts and ideas are illustrated and clarified. Numerous practical and useful examples, activities, and resource ideas relevant for different age groups appear at the end of each chapter. Teachers see how to provide relevant, appropriate assessment for young children in a full chapter devoted to the topic. (Chapter 9) Teachers see how to integrate social studies into the everyday lives of their students, and to teach social studies with other subjects through the book's interdisciplinary experiential method presented throughout.

As the only text of its kind, this book provides in-depth information about Vygotsky's theories, neo-Vygotskians' findings, and concrete explanations and strategies that instruct teachers how to influence student learning and development. Key changes to this edition include a new chapter on dynamic assessment, separate and expanded chapters on developmental

accomplishments of infants and toddlers, preschool/kindergarten, and primary grades and on supporting those accomplishments, and elaborations of Vygotsky's ideas from neo-Vygotskians from Russia. FEATURES Written for the beginning student, the book provides a clear discussion of Vygotskian principles including...a historical overview and a complete chapter on the "Zone of Proximal Development," (ZPD). Each section of the book builds on the other...framework, strategies, and applications of the Vygotskian approach. The work of Vygotsky is compared in a fair and balanced way with the work of Piaget. Examples and activities have been class-tested in a variety of classroom environments including a Head Start program, private preschool, and in the Denver Public Schools.

With empirical evidence and theoretical critique, this book unveils the myths and debates (e.g., child-centeredness versus teacher-directedness) about early childhood curricula, revealing their unique social, cultural, and historical roots. Analyzing globally advocated early childhood curricula and ideologies, such as the developmentally appropriate practice, the child-centered approach, constructivism, and globalized childhood, this book argues that the direct adoption of these contextually bound approaches in local environments may be inappropriate if social and cultural compatibility is lacking. The authors then examine how early childhood curricula may be implemented in a hybrid form. Featuring case studies from American and Chinese contexts, this book offers insights and recommendations for the future development and redeployment of early childhood curriculum studies and practices in a post-truth era. This volume serves as a valuable resource for scholars and students of early childhood education and comparative education, as well as for key education stakeholders.

The authors' goal in writing *Developmentally Appropriate Curriculum: Best Practices in Early Childhood Education* was to bring together the best information currently available for developing an integrated approach to curriculum and instruction in the early years. The Sixth Edition addresses all aspects of classroom life, including the roles of children and adults, the physical and social environments, and teaching and learning within multiple domains for children age three to eight. It provides a comprehensive, cohesive approach to curriculum development, which results in greater continuity for children and practitioners in group settings in childcare, preschool, and the early elementary grades. Concentrating as much on the "how" of curriculum development as on the "what and why," the authors provide practical, research-based guidelines for translating theory into best practice that accommodates age-appropriateness, individual differences, and social and cultural diversity. Students learn how to conceptualize, plan, implement, and evaluate curriculum through detailed application opportunities in each chapter. EBOOK: Quality in Early Childhood Services - An International

Perspective National Assn for the Education

Developmental Education is an approach to education in school that aims at promoting children's cultural development and their abilities to

participate autonomously and well-informed in the cultural practices of their community. From the point of view of Cultural-historical Activity theory (CHAT), a play-based curriculum has been developed over the past decades for primary school, which presents activity contexts for pupils in the classroom that create learning and teaching opportunities for helping pupils with appropriating cultural knowledge, skills, and moral understandings in meaningful ways. The approach is implemented in numerous Dutch primary schools classrooms with the explicit intention to support the learning of both pupils and teachers. The book focuses especially on education of young children (4 - 8 years old) in primary school and presents the underpinning concepts of this approach, and chapters on examples of good practices in a variety of subject matter areas, such as literacy (vocabulary acquisition, reading, writing), mathematics, and arts. Successful implementation of Developmental Education in the classroom strongly depends on dynamic assessment and continuous observations of young pupils' development. Strategies for implementation of both the teaching practices and assessment strategies are discussed in detail in the book.

Focused Portfolios Pearson
 The long-awaited new edition of NAEYC's book *Developmentally Appropriate Practice in Early Childhood Programs* is here, fully revised and updated! Since the first edition in 1987, it has been an essential resource for the early childhood education field. Early childhood educators have a professional

responsibility to plan and implement intentional, developmentally appropriate learning experiences that promote the social and emotional development, physical development and health, cognitive development, and general learning competencies of each child served. But what is developmentally appropriate practice (DAP)? DAP is a framework designed to promote young children's optimal learning and development through a strengths-based approach to joyful, engaged learning. As educators make decisions to support each child's learning and development, they consider what they know about (1) commonality in children's development and learning, (2) each child as an individual (within the context of their family and community), and (3) everything discernible about the social and cultural contexts for each child, each educator, and the program as a whole. This latest edition of the book is fully revised to underscore the critical role social and cultural contexts play in child development and learning, including new research about implicit bias and teachers' own context and consideration of advances in neuroscience. Educators implement developmentally appropriate practice by recognizing the many assets all young children bring to the early learning program as individuals and as members of families and communities. They also develop an awareness of their own context. Building on each child's strengths, educators design and implement learning settings to help each child achieve their full potential across all domains of development and across all content areas.
