A scientific investigation and personal adventure story about zombis and the voodoo culture of Haiti by a Harvard scientist. In April 1982, ethnobotanist Wade Davis arrived in Haiti to investigate two documented cases of zombis—people who had reappeared in Haitian society years after they had been officially declared dead and had been buried. Drawn into a netherworld of rituals and celebrations, Davis penetrated the voodoo mystique deeply enough to place zombification in its proper context within voodoo culture. In the course of his investigation, Davis came to realize that the story of voodoo is the history of Haiti—from the African origins of its people to the successful Haitian independence movement, down to the present day, where voodoo culture is, in effect, the government of Haiti's countryside. *The Serpent and the Rainbow* combines anthropological investigation with a remarkable personal adventure to illuminate and finally explain a phenomenon that has long fascinated Americans.

This study recovers Italo Calvino's central place in a lost history of interdisciplinary thought, politics, and literary philosophy in the 1960s. Drawing on his letters, essays, critical reviews, and fiction, as well as a wide range of works—primarily urban planning and design theory and history—circulating among his primary interlocutors, this book takes as its point of departure a sweeping reinterpretation of *Invisible Cities*. Passages from Calvino's most famous novel routinely appear as aphorisms in calendars, posters, and the popular literature of inspiration and self-help, reducing the novel to vague abstractions and totalizing wisdom about thinking outside the box. The shadow of postmodern studies has had a similarly diminishing effect on this text, rendering up an accomplished but ultimately apolitical novelistic experimentation in endless deconstructive deferrals, the shiny surfaces of play, and the ultimately rigged game of self-referentiality. In contrast, this study draws on an archive of untranslated Italian- and French-language materials on urban planning, architecture, and utopian architecture to argue that Calvino's novel in fact introduces readers to the material history

of urban renewal in Italy, France, and the U.S. in the 1960s, as well as the multidisciplinary core of cultural life in that decade: the complex and continuous interplay among novelists and architects, scientists and artists, literary historians and visual studies scholars. His last love poem for the dying city was in fact profoundly engaged, deeply committed to the ethical dimensions of both architecture and lived experience in the spaces of modernity as well as the resistant practices of reading and utopian imagining that his urban studies in turn inspired.

One of Italy's greatest and most popular writers offers three witty, fantastical stories, each dominated by one of three senses-- taste, hearing, or smell.

The Invisible City Random House

A collection of twenty-two fairy tales by the Nobel Prize-winning novelist, most translated into English for the first time, show the influence of German Romanticism, psychoanalysis, and Eastern religion on his development as an author.

Invisible Cities Invisible Cities

Imaginary conversations between Marco Polo and his host, the Chinese ruler Kublai Khan, conjure up cities of magical times. "Of all tasks, describing the contents of a book is the most difficult and in the case of a marvelous invention like Invisible Cities, perfectly irrelevant" (Gore Vidal). Translated by William Weaver.

"The posthumously published collection Hermit in Paris draws

together an array of Italo Calvino's autobiographical writings that provide an illuminating and unexpectedly intimate portrait of one of the postwar era's most inventive and fascinating writers. In these pages, Calvino recounts his experiences in Italy's antifascist resistance, pays homage to his influences, traces the evolution of his literary style, and, in one of the book's most humorous and entertaining sections, provides a wry commentary on his travels in the United States in 1959 and 1960"--

Port Towns and Urban Cultures Houghton Mifflin Harcourt

"Calvino . . . managed effortlessly what no author in English could quite claim: his novels and stories and fables were both classically modernist and giddily postmodern, embracing both experiment and tradition, at once conceptual and humane, intimate and mythic." — Jonathan Lethem, *New York Times Book Review* Blending reality and illusion with elegance and precision, the stories in this collection take place in a World War II-era and postwar Italy tinged with the visionary and fablelike qualities. A trio of gluttonous burglars invades a pastry shop; two children trespass upon a forbidden garden; a wealthy family invites a rustic goatherd to lunch, only to mock him. In the title story, a compact masterpiece of shifting perspectives, a panicked soldier tries to keep his wits—and his life—when he faces off against a young partisan with a loaded rifle and miraculous aim. Select stories from *Last Comes the Raven* have been published in translation, but the collection as a whole has never appeared in English. This volume, including several stories newly translated by Ann Goldstein, is an important addition to Calvino's legacy.

"A group of travellers chance to meet, first in a castle, then a

tavern. Their powers of speech are magically taken from them and instead they have only tarot cards with which to tell their tales. What follows is an exquisite interlinking of narratives, and a fantastic, surreal, and chaotic history of all human consciousness."--Goodreads

IN THE WATCHFUL CITY

Houghton Mifflin Harcourt

Despite the port's prominence in maritime history, its cultural significance has long been neglected in favour of its role within economic and imperial networks. Defined by their intersection of maritime and urban space, port towns were sites of complex cultural exchanges. This book, the product of international scholarship, offers innovative and challenging perspectives on the cultural histories of ports, ranging from eighteenth-century Africa to twentieth-century Australasia and Europe. The essays in this important collection explore two key themes; the nature and character of 'sailortown' culture and port-town life, and the representations of port towns that were forged both within and beyond urban-maritime communities. The book's exploration of port town identities and cultures, and its use of a rich array of methodological approaches and cultural artefacts, will make it of great interest to both urban and maritime historians. It also represents a major contribution to the emerging, interdisciplinary field of coastal studies.

Fantastic Tales Houghton Mifflin Harcourt

Fifty-five fictional cities, each described in beautiful detail - each with a woman's name... In *Invisible Cities* Marco Polo conjures up cities of magical times for his host, the Chinese ruler Kublai Khan,

but gradually it becomes clear that he is actually describing one city: Venice. As Gore Vidal wrote 'Of all tasks, describing the contents of a book is the most difficult and in the case of a marvellous invention like *Invisible Cities*, perfectly irrelevant.' This is a captivating meditation on culture, language, time, memory and the nature of human experience. '*Invisible Cities* changed the way we read and what is possible in the balance between poetry and prose... The book I would choose as pillow and plate, alone on a desert island' Jeanette Winterson '*Touches* inexhaustibly on the essence of the human urge to create cities, be in cities, speak of cities' Guardian '*A subtle and beautiful meditation*' Sunday Times

These seemingly disparate characters gradually realize their connections to each other just as they realize that something is not quite right about their world. And it seems as though the answers might lie with Hawthorne Abendsen, a mysterious and reclusive author whose bestselling novel describes a world in which the US won the War... *The Man in the High Castle* is Dick at his best, giving readers a harrowing vision of the world that almost was. "The single most resonant and carefully imagined book of Dick's career." —New York Times

ARCHITECTURAL SPACE AND THE IMAGINATION

HarperCollins

The *Invisible City* explores urban spaces from the perspective of a traveller, writer, and creator of theatre to illuminate how cities

offer travellers and residents theatrical visions while also remaining mostly invisible, beyond the limits of attention. The book explores the city as both stage and content in three parts. Firstly, it follows in pattern Italo Calvino's novel *Invisible Cities*, wherein Marco Polo describes cities to the Mongol emperor Kublai Khan, to produce a constellation of vignettes recalling individual cities through travel writing and engagement with artworks. Secondly, Gillette traces the Teatro Potlach group and its ongoing immersive, site-specific performance project *Invisible Cities*, which has staged performances in dozens of cities across Europe and the Americas. The final part of the book offers useful exercises for artists and travellers interested in researching their own invisible cities. Written for practitioners, travellers, students, and thinkers interested in the city as site and source of performance, *The Invisible City* mixes travelogue with criticism and cleverly combines philosophical meditations with theatrical pedagogy.

Main description: What sort of society could bind together Jacques Roubaud, Italo Calvino, Marcel Duchamp, and Raymond Queneau-and Daniel Levin Becker, a young American obsessed with language play? Only the Oulipo, the Paris-based experimental collective founded in 1960 and fated to become one of literature's quirkiest movements. An international organization of writers, artists, and scientists who embrace formal and procedural constraints to achieve literature's possibilities, the Oulipo (the French acronym stands for 0workshop for potential literature0) is perhaps best known as the cradle of Georges Perec's novel *A Void*, which does not contain the letter e. Drawn to the Oulipo's mystique, Levin Becker secured a Fulbright grant to study the organization and traveled to Paris. He was eventually offered membership, becoming only the second American to be admitted to the group. From the perspective of a young initiate, the Oulipians and their projects are at once bizarre and utterly compelling. Levin Becker's love for games, puzzles, and language play is infectious, calling to mind Elif Batuman's delight in Russian literature in *The Possessed*. In recent years, the Oulipo has inspired the creation of numerous other collectives: the OuMuPo (a collective of DJs), the OuMaPo (marionette players), the OuBaPo (comic strip artists), the OuFlarfPo (poets who generate poetry with the aid of search engines), and a menagerie of other Ou-X-Pos (workshops for potential something). Levin Becker discusses these and other intriguing developments in this history and personal appreciation of an iconic-and iconoclastic-group.

INVISIBLE CITIES

Harvard University Press

From the myth of Arcadia through to the twenty-first century, ideas about sustainability – how we imagine better urban environments – remain persistently relevant, and raise recurring questions. How do cities evolve as complex spaces nurturing both urban creativity and the fortuitous art of discovery, and by which mechanisms do they foster imagination and innovation? While past utopias were conceived in terms of an ideal geometry, contemporary exemplary models of urban design seek technological solutions of optimal organisation. The Venice Variations explores Venice as a prototypical city that may hold unique answers to the ancient narrative of utopia. Venice was not the result of a preconceived ideal but the pragmatic outcome of social and economic networks of communication. Its urban creativity, though, came to represent the quintessential combination of place and institutions of its time. Through a discussion of Venice and two other works owing their inspiration to this city – Italo Calvino's *Invisible Cities* and Le Corbusier's *Venice Hospital* – Sophia Psarra describes Venice as a system that starts to resemble a highly probabilistic 'algorithm', that is, a structure with a small number of rules capable of producing a large number of variations. The rapidly escalating processes of urban development around our big cities share many of the motivations for survival, shelter and trade that brought Venice into existence. Rather than seeing these places as problems to be solved, we need to understand how urban complexity can evolve, as happened from its unprepossessing origins in the marshes of

the Venetian lagoon to the 'model city' that endured a thousand years. This book frees Venice from stereotypical representations, revealing its generative capacity to inform potential other 'Venices' for the future.
