“Surprising and remarkable...Toggling between big ideas, technical details, and his personal intellectual journey, Greene writes a thesis suitable to both airplane reading and PhD seminars.”—The Boston Globe Our brains were designed for tribal life, for getting along with a select group of others (Us) and for fighting off everyone else (Them). But modern times have forced the world’s tribes into a shared space, resulting in epic clashes of values along with unprecedented opportunities. As the world shrinks, the moral lines that divide us become more salient and more puzzling. We fight over everything from tax codes to gay marriage to global

warming, and we wonder where, if at all, we can find our common ground. A grand synthesis of neuroscience, psychology, and philosophy, Moral Tribes reveals the underlying causes of modern conflict and lights the way forward. Greene compares the human brain to a dual-mode camera, with point-and-shoot automatic settings (“portrait,” “landscape”) as well as a manual mode. Our point-and-shoot settings are our emotions—efficient, automated programs honed by evolution, culture, and personal experience. The brain’s manual mode is its capacity for deliberate reasoning, which makes our thinking flexible. Point-and-shoot emotions make us social animals, turning Me into Us. But they also make us tribal animals, turning Us against Them. Our tribal emotions make us fight—sometimes with bombs, sometimes with words—often with life-and-death stakes. A major

achievement from a rising star in a new scientific field, Moral Tribes will refashion your deepest beliefs about how moral thinking works and how it can work better.

What might we learn if the study of ethics focused less on hard cases and more on the practices of everyday life? In *Everyday Ethics*, Michael Lamb and Brian Williams gather some of the world’s leading scholars and practitioners of moral theology (including some GUP authors) to explore that question in dialogue with anthropology and the social sciences.

Inspired by the work of Michael Banner, these scholars cross disciplinary boundaries to analyze the ethics of ordinary practices—from eating, learning, and loving thy neighbor to borrowing and spending, using technology, and working in a flexible economy. Along the way, they consider the moral and methodological questions that emerge from this interdisciplinary dialogue and assess the implications for the future of moral theology.

This volume establishes a foundation for a uniform code of professional ethics for public administrators in the United States. *Public Administration Ethics for the 21st Century* lays the ethical foundations for a uniform professional code of ethics for public administrators, civil servants, and non-profit administrators in the US. Martinez synthesizes five disparate schools of ethical thought as to how public administrators can come to know the good and behave in ways that advance the values of citizenship, equity, and public interest within their respective organizations. Using case studies, he teaches American administrators how to combine the approaches of all five schools to evaluate and resolve complex ethical dilemmas within the constraints of the U.S. democratic values set. Martinez enunciates the common ethical principles that guide public administrators in their practice within the specific ethical parameters and organizational cultures of a myriad entities at the federal, state, and local levels of government in the United States, as well as in non-profit organizations. Along the way, Martinez addresses a number of crucial issues, including personal gain, conflict of interest, transparency, democratic impartiality, hiring, hierarchical discipline, media relations, partisan pressure, appointments by elected officials, and whistle-blowing. The striking, high-profile case studies—Nathan Bedford Forrest, Adolph Eichmann, Lieutenant William Calley, and Mary Ann Wright—illustrate

ethical dilemmas where, for better or worse, the individual was at odds with the organization.

A Companion to Ethics Dogwise Publishing

Dog trainers face ethical decisions all the time. Do I keep working with a client when it is obvious that the owner will not keep up the training program to the detriment of the dog? Should I accept payments from other dog professionals to whom I refer clients? What is the proper way to interact with other dog trainers who use methods I disagree with? Author Jim Barry dives deep into the ethical questions frequently faced by dog trainers and offers up a systematic approach to helping trainers resolve difficult dilemmas.

MORAL TRIBES

St. Martin's Press

Most people would agree that thoughtful behavior and common decency are in short supply, or simply forgotten in hurried lives of emails, cellphones, and multi-

tasking. In *Choosing Civility*, P. M. Forni identifies the twenty-five rules that are most essential in connecting effectively and happily with others. In clear, witty, and, well...civilized language, Forni covers topics that include: * Think Twice Before Asking Favors * Give Constructive Criticism * Refrain from Idle Complaints * Respect Others' Opinions * Don't Shift Responsibility and Blame * Care for Your Guests * Accept and Give Praise Finally, Forni provides examples of how to put each rule into practice and so make life—and the lives of others—more enjoyable, companionable, and rewarding. *Choosing Civility* is a simple, practical, perfectly measured, and quietly magical handbook on the lost art of civility and compassion. “Insightful meditation on how changing the way we think can improve our daily lives. ... A deft exploration that urges us to think before speaking.” —Kirkus, Starred Review

Public Administration Ethics for the 21st Century New World Library

How do we turn off the noise of daily life, turn on our brains, and begin to engage in that fundamental human activity known as thinking again? P.M. Forni, America's civility expert has given some thought to how we can successfully think our way through a greatly distracting world and live a better life. In *The Thinking Life*, he looks at the importance of thinking: how we do it, why we don't do it enough and why we need to do more of it. In twelve short chapters, he gives readers a remedy for the Age of Distraction, an age fuelled by social networking overload, compulsive texting and an omnipresent stream of cellphone calls. He shows how to put aside time each day to improve: - Attention - Introspection - Self-control - Positive thinking - Proactive thinking - Decision making - Creative thinking - Problem solving Just as Forni did with civility, he puts the importance of good thinking front and center in a book as lucid and profound as his earlier works. "The most provocative and useful book I've read in years." - Robert Sutton, New York Times bestselling author of *The No Asshole Rule*

MORAL COURAGE

St. Martin's Press

“The perfect handbook for understanding what constitutes moral relations with friends, enemies, and one’s own self.” —Booklist In an age when most of us spend more time thinking about what movie we’ll see than about how we want to lead our lives, nothing could be more timely and helpful than *Everyday Ethics*. In this refreshingly original book, Joshua Halberstam shows us how to develop a

moral imagination—and have fun while doing it. Halberstam demolishes the clichés of both religion and psychotherapy and entices us into looking at the small actions that make up the big picture of our character and values. Should we really refrain from making judgments? Should we let our conscience be our guide even if it urges us not to pay our taxes? Halberstam has something intriguing to say about these and many other issues. Witty and entertaining, *Everyday Ethics* is the moral equivalent of an aerobic dance session, as exhilarating as it is instructive.

"Jewish thinkers don't talk all that much

about love. All too often we leave that to Christian theologians. But in this excellent volume, Rabbi Joseph Telushkin puts the commandment to love at the center of Jewish theology and experience. This is a book that will change the way you think about—and practice—Judaism." –Professor Ari L. Goldman, Columbia University, and author of *The Search for God at Harvard* "Love your neighbor as yourself" is the best-known commandment in the Bible. Yet we rarely hear anyone talk about how to apply these words in daily life. In this landmark work, Rabbi Joseph Telushkin, one of the premier scholars and thinkers of our time, gives both Jews and non-Jews an extraordinary summation of what Jewish tradition teaches about putting these words into practice. Writing with great clarity and simplicity as well as with deep wisdom, Telushkin covers topics such as love and kindness, hospitality, visiting the sick, comforting mourners, charity, relations between Jews and non-Jews, compassion for animals, tolerance, self-defense, and end-of-life issues. This second volume of the first major code of Jewish ethics written in the English language is breathtaking in its scope and will undoubtedly influence readers for generations to come. It offers hundreds of practical examples from the Torah, the Talmud, the Midrash, and both ancient and modern rabbinic commentaries—as well as contemporary anecdotes—all teaching us how to care for one another each and every day. *A Code of Jewish Ethics, Volume 2: Love Your Neighbor as Yourself* is a consummate work of scholarship. Like its acclaimed predecessor, which received the National Jewish Book Award, it is rich with ideas to contemplate and discuss, while being primarily a book to live by. Nothing could be more important in these strife-torn times than learning how to love our neighbors as ourselves. The message of this book is as vital and timely now as it has been since time immemorial.

Is there a universal human natural moral system—a moral system inherent in human nature, resulting from fundamental natural principles and evolutionary processes, discernible and explainable via the fast-improving scientific understanding of human behavior and evolution, and which satisfies the basic requirements associated with systems of morality? Is it valid—scientifically and rationally—to acknowledge the existence of the natural moral system and use it to improve human moral understanding? To inform public policy? To help address the shared

problems of humanity? To help us live together better? To facilitate happiness? What is the nature of the natural moral system? What are its foundational characteristics? What is the relationship between morality and survival? Morality and happiness? And what about meaning? What are the obligations of political and corporate leaders, scientists, educators, and others to use the human gift of reason to help improve the human condition? Integrating recent advances in scientific understanding, and viewing them from the standpoint of questions traditionally asked by philosophers, Jeff Huggins addresses these questions of immense relevance to the sustainability and quality of human life, biodiversity, and the environment as well as to our everyday lives as modern humans.

PRAISE FOR A SEAT AT THE TABLE "A poignant depiction of a deeply loving father and a no less loving son desperate to find his own very different path without shattering the connection to his family, to his father." Rabbi Joseph Telushkin, Author of Jewish Literacy and a Jewish Code of Ethics "Halberstam takes you deeply into the Chassidic community with a critical eye but a loving, understanding heart. This tender, compassionate coming-of-age

story brims over with wisdom from the Jewish tradition. It's worth reading for the Chassidic tales alone." David Grubin, Documentary Filmmaker, The Jewish Americans, LBJ "Joshua Halberstam knows the soul of Chassidic Brooklyn better than anyone without payes and a black hat. He explores that world with a unique combination of skepticism and compassion. A Seat at the Table is a lovely and deeply humane book." Melvin Jules Bukiet, Author of Strange Fire and Neurotica "In this novel of fathers and sons, faith and doubt, Joshua Halberstam illuminates a world rich with religious tradition and Chassidic stories, and he proves himself to be a master storyteller in his own right.
