Marriage and Family in a Changing Society New York : Free Press

This book offers an original and rounded examination of the origin and sociological contributions of one of the most significant, yet continuously ignored, programs of social science research ever established in the United States: the Atlanta Sociological Laboratory. Under the leadership of W.E.B. Du Bois, this unit at Atlanta University made extensive contributions to the discipline which, as the author demonstrates, extend beyond 'race studies' to include founding the first American school of sociology, establishing the first program of urban sociological research, conducting the first sociological study on religion in the United States, and developing methodological advances that remain in use today. However, all of these accomplishments have subsequently been attributed, erroneously, to White sociologists at predominately White institutions, while the Atlanta Sociological Laboratory remains sociologically ignored and marginalized. Placing the achievements of the Du Bois led Atlanta Sociological Laboratory in context, the author contends that American Jim Crow racism and segregation caused the school to become marginalized and ignored instead of becoming recognized as one the most significant early departments of sociology in the United States. Illuminating the sociological activities - and marginalization - of a group of African American scholars from a small African American institution of higher learning in the Deep South - whose works deserve to be canonized alongside those of their late nineteenth and early twentieth century peers - this book will appeal to all scholars with interests in the history of sociology and its development as a discipline, race and ethnicity, research methodology, the sociology of the south, and urban sociology.

[Death, Society and Human Experience \(1-download\)](#) Simon and Schuster

For thirty-five years and through thirteen editions, Jim Henslin's *Down to Earth Sociology* has opened new windows onto the social realities that shape our world. Now in its fourteenth edition, the most popular anthology in sociology includes new articles on our changing world while also retaining its classic must-read essays. Focusing on social interaction in everyday life, the forty-six selections bring students face-to-face with the twin projects of contemporary sociology: understanding the individual's experience of society and analyzing social structure. The fourteenth edition's exceptional new readings include selections on the role of sympathy in everyday life, mistaken perceptions of the American family, the effects of a criminal record on getting a job, and the major social trends affecting our future. Together with these essential new articles, the selections by Peter Berger, Herbert Gans, Erving Goffman, Donna Eder, Zella Luria, C. Wright Mills, Deborah Tannen, Barrie Thorne, Sidney Katz, Philip Zimbardo, and many others provide firsthand

reporting that gives students a sense of "being there." Henslin also explains basic methods of social research, providing insight into how sociologists explore the social world. The selections in *Down to Earth Sociology* highlight the most significant themes of contemporary sociology, ranging from the sociology of gender, power, politics, and religion to the contemporary crises of racial tension, crime, rape, poverty, and homelessness.

SOCIOLOGY OF AMERICAN SPORT

Pearson

Counter to popular perceptions, contemporary American sociology is and promotes a profoundly sacred project at heart. Sociology today is in fact animated by sacred impulses, driven by sacred commitments, and serves a sacred project. Sociology appears on the surface to be a secular, scientific enterprise--its founding fathers were mostly atheists. Its basic operating premises are secular and naturalistic. Sociologists today are disproportionately not religious, compared to all Americans, and often irreligious. The *Sacred Project of American Sociology* shows, counter-intuitively, that the secular enterprise that everyday sociology appears to be pursuing is actually not what is really going on at sociology's deepest level. Christian Smith conducts a self-reflexive, tables-turning, cultural and institutional sociology of the profession of American sociology itself, showing that this allegedly secular discipline ironically expresses Emile Durkheim's inescapable sacred, exemplifies its own versions of Marxist false consciousness, and generates a spirited reaction against Max Weber's melancholically observed disenchantment of the world. American sociology does not escape the analytical net that it casts over the rest of the ordinary world. Sociology itself is a part of that very human, very social, often very sacred and spiritual world. And sociology's ironic mis-recognition of its own sacred project leads to a variety of arguably self-destructive and distorting tendencies. This book re-asserts a vision for what sociology is most important for, in contrast with its current commitments, and calls sociologists back to a more honest, fair, and healthy vision of its purpose.
