The rain forests of Central and South America have long captured the attention and imagination of writers. From nineteenth century explorers to modern-day conservationists, a host of writers have put the rain forests into print. This is an annotated guide to over 1,600 works about the Central and South American jungles. Entries are arranged by category: Ecology and Conservation; Flora and Fauna; People of the Forest; Travel and Exploration; and Young Adult and Children's Reading. Each category begins with a brief description of what is to be found, followed by alphabetically arranged entries. Each bibliographic entry contains notes on the book's subject, focus,

and scope. The book's introduction gives insight into its usage, and the index allows for easy reference. This annotated bibliography, covering topics from the Achuar Indians to zoologists, will lead the reader to resources as diverse and fascinating as the rain forests themselves.

A classic adventure book in the spirit of *The Treasure of the Sierra Madre* and *Heart of Darkness*.

For the Specialist Book World Houghton Mifflin Harcourt

Four travelers meet in Bolivia and set off into the heart of the Amazon rainforest, but what begins as a dream adventure quickly deteriorates into a dangerous nightmare, and after weeks of wandering in the dense undergrowth, the four backpackers split up into two groups. But when a terrible rafting accident separates him from his partner, Yossi is forced to survive for weeks alone against one of the wildest backdrops on the planet. Stranded without a knife, map, or survival training, he must improvise shelter and forage for wild fruit to survive. As his feet begin to rot during raging storms, as he loses all sense of direction, and as he begins to lose all hope, he wonders whether he will make it out of the jungle alive. Lost in the

Jungle is the story of friendship and the teachings of nature, and a terrifying true account that you won't be able to put down.

Jungle Simon and Schuster
Alone, with no food, supplies, or weapons, Yossi Ghinsberg was lost in the Amazon for twenty-eight days. Against all odds, he survived, and his story became the international bestseller *Jungle*. Now, in *Laws of the Jungle*, Ghinsberg shares the profound truths the treacherous Amazon taught him. These nine revelations inspire personal consciousness and an evolved perspective on our nature— as humans and as beasts.

Jungle Scholastic Inc. Earth Works is the only comprehensive guide available to the best new and classic books about nature and the environment for adults and YAs. It provides descriptive entries for trade nonfiction and scholarly or technical books, and a significant number of fiction titles which are of interest to both the general public and specialists. Each chapter defines its scope, then identifies key books or authors, and refers to

notable related works in other chapters.

b.A masterpiece of historical adventure, *ISkeletons on the Zahara* The western Sahara is a baking hot and desolate place, home only to nomads and their camels, and to locusts, snails and thorny scrub -- and its

barren and ever-changing coastline has baffled sailors for centuries. In August 1815, the US brig Commerce was dashed against Cape Bojador and lost, although through bravery and quick thinking the ship's captain, James Riley, managed to lead all of his crew to safety. What followed was an extraordinary and desperate battle for survival in the face of human hostility, starvation, dehydration, death and despair. Captured, robbed and enslaved, the sailors were dragged and driven through the desert by their new owners, who neither spoke their language nor cared for their plight. Reduced to drinking urine, flayed by the sun, crippled by walking miles across burning stones and sand and losing over half of their body weights, the sailors struggled to hold onto both their humanity and their sanity. To reach safety, they would have to overcome not only the desert but also the greed and anger of those who would keep them in captivity. From the cold waters of the Atlantic to the searing Saharan sands, from the heart of the desert to the heart of

man, *Skeletons on the Zahara* is a spectacular odyssey through the extremes and a gripping account of courage, brotherhood, and survival. [Duke University Libraries](#)

A six-hundred-mile canoe trip in the Canadian wilderness is a seventeen-year-old's dream adventure, but after he is mauled by a grizzly bear, it's all about staying alive. This true-life wilderness survival epic recounts seventeen-year-old Alex Messenger's near-lethal encounter with a grizzly bear during a canoe trip in the Canadian tundra. The story follows Alex and his five companions as they paddle north through harrowing rapids and stunning terrain. Twenty-nine days into the trip, while out hiking alone, Alex is attacked by a barren-ground grizzly. Left for dead, he wakes to find that his summer adventure has become a struggle to stay alive. Over the next hours and days, Alex and his companions tend his wounds and use their resilience, ingenuity, and dogged perseverance to reach help at a remote village a thousand miles north of the US-Canadian border. *The Twenty-Ninth Day* is a coming-of-age

story like no other, filled with inspiring subarctic landscapes, thrilling riverine paddling, and a trial by fire of the human spirit.

A HARROWING TRUE STORY OF SURVIVAL

Basic Books

School and public libraries often provide programs and activities for children in preschool through the sixth grade, but there is little available to young adults. For them, libraries become a place for work—the place to research an assignment or find a book for a report—but the thought of the library as a place for enjoyment is lost. So how do librarians recapture the interest of teenagers? This just might be the answer. Here you will find theme-based units (such as *Cartoon Cavalcade*, *Log On at the Library*, *Go in Style*, *Cruising the Mall*, *Space Shots*, *Teens on TV*, and 44 others) that are designed for young adults. Each includes a display idea, suggestions for local sponsorship of prizes, a program game to encourage participation, 10 theme-related activities, curriculum tie-in activities, sample questions for use in trivia games or scavenger hunts, ideas for activity

sheets, a bibliography of related works, and a list of theme-related films. The units are highly flexible, allowing any public or school library to adapt them to their particular needs.

Only four men survived the plane crash. The pilot. A politician. A cop... and the criminal he was shackled to. On an icy night in October 1984, a commuter plane carrying nine passengers crashed in the remote wilderness of northern Alberta, killing six people. Four survived: the rookie pilot, a prominent politician, a cop, and the criminal he was escorting to face charges. Despite the poor weather, Erik Vogel, the 24-year-old pilot, was under intense pressure to fly. Larry Shaben, the author's father and Canada's first Muslim Cabinet Minister, was commuting home after a busy week at the Alberta Legislature. Constable Scott Deschamps was escorting Paul Archambault, a drifter wanted on an outstanding warrant. Against regulations, Archambault's handcuffs were removed—a decision that would profoundly impact the men's survival. As the men fight through the night to stay alive, the dividing lines of power, wealth, and status are erased, and each man is forced to confront the

precious and limited nature of his existence.

LAWS OF THE JUNGLE

Summersdale Publishers LTD - ROW
"A bold, ambitious and truly wonderful history of the world"—Peter Wohlleben, author of *The Hidden Life of Trees* From the age of dinosaurs to the first human cities, a groundbreaking new history of the planet that tropical forests made. To many of us, tropical forests are the domain of movies and novels. These dense, primordial wildernesses are beautiful to picture, but irrelevant

to our lives. *Jungle* tells a different story.

Archaeologist Patrick Roberts argues that tropical forests have shaped nearly every aspect of life on earth. They made the planet habitable, enabled the rise of dinosaurs and mammals, and spread flowering plants around the globe. New evidence also shows that humans evolved in jungles, developing agriculture and infrastructure unlike anything found elsewhere. Humanity's fate is tied to the fate of tropical forests, and by understanding how earlier societies managed these habitats, we can learn to live more sustainably and equitably today. Blending cutting-edge research and incisive social commentary, *Jungle* is a bold new vision of who we are and where we come from.
