Immunity to Human Fungal Pathogens: Mechanisms of Host Recognition, Protection, Pathology, and Fungal Interference Routledge
 "Tooth Enamel: Frontiers in Mineral Chemistry and Biochemistry, Integrative Cell Biology and Genetics" incorporates the proceedings of the 9th International Enamel Symposium (Enamel 9) hosted in the UK and chaired by Professor Jennifer Kirkham and Professor Ariane Berdal. The topic covers cellular and molecular aspects of the development, pathology, evolution

and repair or regeneration of dental enamel. The original research papers and reviews will be of interest to all enamel and biomineralization researchers. Clinicians will find up-to-date thinking and opinion on the aetiology of enamel pathologies and their potential future treatment via novel strategies for preventing, repairing and regenerating enamel.

Worldwide Mobilizations CRC Press

This textbook provides a multidisciplinary introduction to global and international studies. Offering unrivalled breadth and depth, it covers all the key dimensions of the topic, including broad introductions to international politics

and economics, and focused surveys of topics from human rights and migration to conflict and the environment. John McCormick's lucid writing style renders complex information understandable to all students. Full-colour photographs, maps, tables and figures bring the subject to life and innovative pedagogical features emphasize the importance of understanding perspectives and experiences different from one's own worldview. Assuming no prior knowledge of the subject, this textbook is ideal for undergraduate students worldwide who are taking introductory modules in global and international studies.

The text can also be used by undergraduate students taking courses on globalization.

**BERNARD SHAW,
SEAN O'CASEY,
AND THE DEAD
JAMES CONNOLLY**

Routledge
Britain is facing big security challenges in the 2020s. The decade to come will not be as favourable as the two past decades. For a country as 'globalised' as Britain, security challenges cover a wide spectrum - from terrorism, international crime and cyber attack through to the prospects of war in its own continent or even, again, for its own survival. Brexit has entered these equations and turned them into a political tipping point, from

which there is no hiding and no turning back. Tipping Point looks at the immediate and long-term security challenges Britain faces - from security and foreign policy to the crisis of liberal democracy - as well as Britain's security capabilities.

Trump and Mussolini

Frontiers Media SA
This book captures concepts and projects that reshape the discipline of architecture by prioritizing people over buildings. In doing so, it uncovers sophisticated approaches that go beyond standard architectural protocols to explore experience-based aesthetics, encounters, action-based research, critical practices, and social engagement. If these

are widely understood as singular or incompatible approaches, the book reveals that they form a growing network of interrelations and generate levels of flexibility and dynamism that are reshaping the discipline. The thirteen chapters analyze thought-provoking projects - branded museums, restaged exhibitions, home/work spaces, multi-cultural spaces, ageing apartment blocks, abandoned homes, and urban slums amongst them. Together, they enliven the stalled debate about a single architectural response to the complex challenges of the contemporary world by highlighting pluralistic perspectives on architecture that offer

fresh solutions on how architecture can improve people's lives. Featuring essays from an international range of authors, this book makes a vital contribution to our understanding of the wider conditions under which, and in relation to which, contemporary architecture is produced.

WORKING LIFE AND GENDER INEQUALITY

World Scientific
Across diverse academic fields, scholars and practitioners are engaged in developing interventions to promote outcomes like health and quality of life. Indeed, such is the apparent efficacy of such interventions, that there are many policy-led initiatives to

implement these at national and international scales. However, few scholars or practitioners have thought in any systematic and critical way about the importance of contextualizing these interventions, i.e., considering how the impact of such interventions may be affected and mediated by specific sociocultural factors (from gender, to ethnicity and socio-economics). The aim of the Research Topic "The Sociocultural Context of Psychosocial Interventions" was to address this lacuna. As such, we tried to help bringing a more 'contextual' mindset to the implementation of health and wellbeing interventions. This may

help to shift the way such interventions are designed and implemented, both at a granular local level (i.e., influencing individual practitioners) and at a large-scale macro level (e.g., influencing policy makers). Themes within this Research Topic have concerned both macro-sociocultural as well as meso-and micro-layers, and the peculiarities of implementing real world research based on these levels. There has been room for physical and mental health, for family relationships, for educational contexts and even for the effects of crime. Some works have included interesting methodological discussions on the integration of different

ecological layers or the modal distribution of our interests. For us it has been very important to work giving a greater diffusion to these issues since, considering psychosocial interventions in the context in which they occur, goes beyond an epistemological or methodological discussion. Rather, these considerations seriously affect the ability of practitioners to really reach the people who need their interventions, listening to their needs and respecting their preferences. For the editors of this book, then, the contextualization of interventions means considering the people who receive them as full citizens immersed

in complex societies where factors such as social justice and health or well-being do not float apart in space but affect each other dialectically. We therefore think that the duty of both academics and practitioners is not to forget that it is as important to evaluate the direct effect of our interventions as the influence we have in the society as a whole when we carry them out. We hope you enjoy reading these works and that their dissemination stimulates new lines of research committed to both good practise and social transformation.

The Sociocultural Context of Psychosocial Interventions BRILL

In the modern globalized world of work, society's

capitalist and patriarchal norms perpetuate old and create new differences based on gender, class, ethnicity, age, and other social categorizations. This book proposes a novel conceptual framework offering theoretical and methodological insights for thinking through the present and future inequality challenges in the globalized world of work and working life issues in the context of spatio-temporal relations. Bringing together global feminist studies of intersectionality and transnationalism, work-life research, and studies of space, place, and identity, this edited collection responds to the growing interest in peripheries, rurality,

and other spaces beyond the urban and business market centres. In crossing the theoretical boundaries between intersectionality and peripherality, this volume brings these concepts together to identify how racism, capitalism and heteropatriarchy operate on bodies in the name of work, particularly as expressed in precarious labour conditions. It also advocates for transnational solidarity as part of feminist ethics, while providing an opportunity to reflect on ways forward for feminist intersectional studies of work and working life, drawing on embodied relationality and a feminist ethics of care. Working Life and

Gender Inequality explores the intersectional nature of gender, class, race and other inequalities from a global and spatial perspective. It will be of value to researchers, academics, students, managers, consultants, and policy makers in the fields of organizational studies, leadership, feminist and gender studies, working life, intersectionality and transnational feminism.

POSITIONING THE ACADEMIC LIBRARY WITHIN THE UNIVERSITY

Frontiers Media SA
As Cold War battle lines are seemingly re-drawn, Russia's various 'frozen' war zones (ongoing separatist conflicts) are often cited as particularly

volatile and assumed by some Western commentators and policymakers to be 'next' on Putin's 'wish list'. But, as Helena Rytövuori-Apunen demonstrates here, this is a gross (and dangerous) oversimplification that will only serve to fuel the vicious circle of reciprocal military escalation. Drawing on a range of empirical research and across separatist conflicts in Georgia (South Ossetia and Abkhazia), Moldova (Transnistria and Gagauzia) and Azerbaijan (Nagorno-Karabakh) and the 2014 annexation of Crimea from Ukraine, her timely book provides a balanced assessment and critique of the assumptions and misunderstandings

that inform mainstream discussions, as well as placing the conflicts in their proper and complex historical contexts. At a time when there is an increasing tendency to view Russia as the source of all instability in Eastern Europe, *Power and Conflict in Russia's Borderlands* is essential reading for anyone interested in the geopolitics of post-Soviet Russia, as well as policymakers and practitioners of peace/conflict resolution studies.

Introduction to Global Studies

Routledge

This volume brings together international experts to provide fresh perspectives on geopolitical concerns in the South China Sea. The book considers the

interests and security strategies of each of the nations with a claim to ownership and jurisdiction in the Sea. Examining contexts including the region's natural resources and China's behaviour, the book also assesses the motivations and approaches of other states in Asia and further afield. This is an accessible, even-handed and comprehensive examination of current and future rivalries and challenges in one of the most strategically important and militarized maritime regions of the world.

Asian Migrant Workers in the Arab Gulf States Routledge
Asian Migrant Workers in the Arab Gulf States (edited by Masako Ishii, et al.) examines how nationals and migrants

construct new relationships in the segregated socioeconomic spaces of the region
Girl Warriors Routledge
Digital innovation — involving the Internet, its content and ecosystems of global users — is a rapidly evolving way of creating strategic and societal value. The phenomenon of Open data is on the rise and transforming the fundamental nature of how many industries, companies and governments connect with each other and the end-users of products and services — from increased customer-centric innovations, to winning political campaigns, and managing public health concerns. Open data holds the promise of greater

transparency, greater accountability and empowerment of stakeholders. Yet curating and publicly sharing data can be difficult, requires substantive investments in knowledge infrastructures and incentives to do so are not well understood. Who is driving and enabling the open data movement? What motivates organizations to release data and how are they using it to create value? What are the current challenges and how are they being mitigated? What are the decision-frames adopted for sharing data? What are the possible applications and lessons to be learnt from current practices? What is the role of organisational

ingredients and culture as a catalyst for adopting and facilitating open data practices? What is the possible impact of semantic web application? By exploring the multiple dimensions of open data and the interplay of economic utility, governance, societal values of fairness and trust, this volume seeks to entice readers by providing evidence-based answers to these questions, among others. Readers are tempted to a progressively revealing and enlightening journey from the conceptualisation to cultural proliferation of the latest trends in knowledge management: open data. Digital Innovation: Harnessing the Value of Open Data draws on

practical experiences, bringing together widely distributed and latest knowledge of open data practices as case studies from researchers, academics, industry leaders, policy advisors and practitioners. In exploring the economics and technology paradigms, data governance and management practices of digital-centric private and public organizations, this volume sheds light on why there exists a need to embrace open data, what is needed to optimize the value of open data in driving digital innovation and how it is being currently conceived. The book draws a thought-provoking conclusion on open data as a purpose-driven phenomenon,

with its disparate applications in a world of where global convergence on information sharing, storing and management are increasingly becoming a norm. Postcards from Absurdistan

Routledge
This book explores the complex and ever-changing relationship between the European Union and its member states. The recent surge in tension in this

relationship has been prompted by the actions of some member state governments as they question fundamental EU values and principles and refuse to implement common decisions seemingly on the basis of narrowly defined national interests. Furthermore, Brexit forces the EU for the first time to face the prospect of a major member state preparing to leave the Union. Are these developments heralding the return of the nation-state, and if so, in what form? Is the national revival a lasting phenomenon that will affect the EU for a long time to come, or is it a transitory trend? This book takes an interdisciplinary approach to answer

these questions. It brings together scholars from economics, law, and political science to provide insights into the multifaceted relations between the Union and its member states from different perspectives. All chapters are based on up-to-date research findings, succinct assessments of the current state of affairs and ongoing debates about the direction of European integration. The book concludes by offering policy recommendations at European and national levels.

**Quorum Network
(Sensing/Quenching)
in Multidrug-
Resistant Pathogens**

Routledge
Under increasingly
intense newsroom
demands, reporters

often find it difficult to cover the complexity of topics that deal with racial and social inequality. This path-breaking book lays out simple, effective reporting strategies that equip journalists to investigate disparity's root causes. Chapters discuss how racially disparate outcomes in health, education, wealth/income, housing, and the criminal justice system are often the result of inequity in opportunity and also provide theoretical frameworks for understanding the roots of racial inequity. Examples of model reporting from ProPublica, the Center for Public Integrity, and the San Jose Mercury News showcase best practice in writing while emphasizing

community-based reporting. Throughout the book, tools and practical techniques such as the Fault Lines framework, the Listening Post and the authors' Opportunity Index and Upstream-Downstream Framework all help journalists improve their awareness and coverage of structural inequity at a practical level. For students and journalists alike, *Reporting Inequality* is an ideal resource for understanding how to cover structures of injustice with balance and precision. *Arabs at Home and in the World* Frontiers Media SA This edited volume focuses on the South Atlantic regional and national issues with maritime implications: naval policy, security,

transnational organized crime, and Europe's legacy and current influence. The work analyzes the positions in favor and against NATO's extended role in the South Atlantic, the historical and current issues related to the Falklands War, the African national deficits, and initiatives to attend the regional maritime problems. Including contributions from Angolan, Brazilian, Senegalese, and US collaborators, the volume offers eclectic conceptual frameworks, rich historical backgrounds, updated data, original analysis models, and policy recommendations.

Data-Based Methods for Materials Design and Discovery
Bloomsbury Publishing

This open access book presents detailed findings about the ethical, legal, and social acceptance of robots in the German and European context. The key resource is the Bremen AI Delphi survey of scientists and politicians and a related population survey. The focus is on trust in robotic assistance, human willingness to use this assistance, and the expected personal well-being in human-robot interaction. Using recent data from Eurostat, the European Social Survey, and the Eurobarometer survey, the analysis is extended to Germany and the EU. The acceptance of robots in care and everyday life is viewed against their acceptance in other contexts of life and the

scientific research. The book reports on how the probability of five complex future scenarios is evaluated by experts and politicians. These scenarios cover a broad range of topics, including the worst-case scenario of cutthroat competition for jobs, the wealth promise of AI, communication in human-robot interaction, robotic assistance, and ethical and legal conflicts. International economic competition alone will ensure that countries invest sustainably in the future technologies of AI and robots. But will these technologies also be accepted by the population? The book raises the core issue of how governments can gain the needed social,

ethical, and user acceptance of AI and robots in everyday life. This highly topical book is of interest to researchers, professionals and policy makers working on various aspects of human-robot interaction. This is an open access book.

ROBOTS IN CARE AND EVERYDAY LIFE

Frontiers Media SA
A sweeping history of a twentieth-century Prague torn between fascism, communism, and democracy—with lessons for a world again threatened by dictatorship Postcards from Absurdistan is a cultural and political history of Prague from 1938, when the Nazis destroyed Czechoslovakia's artistically vibrant liberal democracy, to

1989, when the country's socialist regime collapsed after more than four decades of communist dictatorship. Derek Sayer shows that Prague's twentieth century, far from being a story of inexorable progress toward some "end of history," whether fascist, communist, or democratic, was a tragicomedy of recurring nightmares played out in a land Czech dissidents dubbed Absurdistan. Situated in the eye of the storms that shaped the modern world, Prague holds up an unsettling mirror to the absurdities and dangers of our own times. In a brilliant narrative, Sayer weaves a vivid montage of the lives of individual

Praguers—poets and politicians, architects and athletes, journalists and filmmakers, artists, musicians, and comedians—caught up in the crosscurrents of the turbulent half century following the Nazi invasion. This is the territory of the ideologist, the collaborator, the informer, the apparatchik, the dissident, the outsider, the torturer, and the refugee—not to mention the innocent bystander who is always looking the other way and Václav Havel's greengrocer whose knowing complicity allows the show to go on. Over and over, Prague exposes modernity's dreamworlds of progress as confections of kitsch. In a time

when democracy is once again under global assault, Postcards from Absurdistan is an unforgettable portrait of a city that illuminates the predicaments of the modern world.

Security, Strategy, and Military Dynamics in the South China Sea

Frontiers Media SA
Academic libraries are facing uncertain times. The international higher education environment is very volatile and academic libraries and librarians can play a major role in helping to strategically position their parent institution within it. In doing so, there needs to be clarity as to what the position of the academic library is with regard to the role and function it has

within the university and how library leadership can have pan-institutional influence and impact. There are several ways in which the academic library can position itself and this collection demonstrates many of these. Strategic alignment with the university and its mission is a fundamental part of successful positioning, as is being flexible, adaptable and responsive to changing needs, requirements and expectations. Developments in research support and scholarly communications, as well as super-convergences with other academic support departments, are examples of such responsiveness. These

topics along with other emerging themes, such as library functions and institutional partnerships and collaborations, are all discussed in the book and provide the reader with a rich variety of reflections and case studies on how academic libraries, from across the globe, have addressed their position within their institution. This book was originally published as a special issue of the journal *New Review of Academic Librarianship*.
Safety Pharmacology - Risk Assessment QT Interval Prolongation and Beyond Routledge
Fungi are found in virtually every environment, and comprise a significant portion of the normal microflora of healthy

individuals. Some species of fungi are aeroallergen sources capable of inducing sensitization and causing exacerbation of asthma and respiratory allergy. Others are transmissible between hosts and may cause no symptoms in healthy individuals. However, immune suppressed individuals may develop invasive disease marked by tissue invasion with a potential for widespread dissemination. Existing therapies for patients consist of antifungal drugs, yet these require prolonged administration with the possibility of adverse side effects, and may be rendered ineffective by the emergence of antifungal-resistant strains. It is therefore

of interest to increase our understanding of host-pathogen interactions in order to facilitate the development of new therapies for individuals suffering from fungal infection and disease. These early interactions are shaped by an array of constituent and secreted factors that stimulate or inhibit host immune responses toward protective or detrimental immunity. Likewise, an array of preformed factors and tissue-resident cells provide early protection from fungal infection and provide extracellular signals that result in localized recruitment of inflammatory cells and determine the character of subsequent adaptive

antifungal immunity. This Research Topic explores the host and fungal pathways that program innate and adaptive immunity and the immune cells, molecules, and regulatory pathways that comprise protective or detrimental responses to fungal exposure or infection. Over 200 authors contributed reviews, opinions, or original research focusing on antifungal immunity in humans and in experimental models. We believe that the results of these efforts provide a benchmark for further advances and improved antifungal therapies.

Reporting Inequality

McFarland

One of the goals of plant science is to improve agricultural

sustainability, increasing yield, food diversity, and nutrition, while minimizing the negative impact on our environment. In response to internal and external cues, plant hormones control various aspects of plant growth and development. The wealth of our knowledge on plant hormones shall greatly advance sustainable agriculture.

Tipping Point

Rowman & Littlefield
Current regulatory guidelines for cardiac safety utilize hERG block and QT interval prolongation as risk markers. This strategy has been successful at preventing harmful drugs from being marketed, but

criticized for leading to early withdrawal of potentially safe drugs. Here we collected a series of articles presenting new technological and conceptual advances, including refinement of ex vivo and in vitro assays, screens and models, and in silico approaches reflecting the increasing effort that has been put forward by regulatory agencies, industry, and academia to try and address the need of a more accurate, mechanistically-based paradigm of proarrhythmic potential of drugs. This Research Topic is dedicated to the memory of Dr. J. Jeremy Rice, our wonderful friend and colleague.
