### JAPAN AND EAST ASIA IN TRANSITION

OECD Publishing

Increasing annual investments in small- and medium-sized enterprises (SMEs) in developing countries by \$1 trillion would yield disproportionate dividends in terms of progress towards the Sustainable Development Goals (SDGs), while also delivering healthy returns for investors. Yet, less than 1% of the tens of trillions of dollars that global asset managers have under management is currently invested in developing country SMEs. This edition of SME Competitiveness Outlook explains how best to scale up private sector investment in developing country SMEs for sustainable development impact. It identifies four main streams through which investors, facilitators and enterprises can form partnerships for sustainable development, and it makes a strong case for investing in small businesses to achieve the Sustainable Development Goals.

*Urban Disasters and Resilience in Asia* Edward Elgar Publishing

Digital transformation can positively impact economic growth, jobs creation, and social inclusion.

As the Central Asia Regional Economic Cooperation (CAREC) region deals with the challenges posed by the coronavirus disease (COVID-19) pandemic, investing in national broadband infrastructure is more crucial than ever to enable connectivity and improve service delivery.

Digitalization will allow CAREC member countries to develop robust solutions for areas including agriculture and water, e-commerce and trade, education and skills, energy, finance, health, transportation, and tourism. The CAREC Digital Strategy 2030 is intended as a catalyst for regional

cooperation, promoting policy design, capacity building, and dialogue to address economic and social challenges in the region with the help of digital technologies.

### AID FOR TRADE IN ASIA AND THE PACIFIC

Asian Development Bank

The rapid growth of fintech services in Asia and the Pacific can help countries leapfrog the challenges of traditional financial services infrastructure and dramatically increase access to financial services. An inclusive fintech ecosystem is essential to support economic growth, greater equality, and lower poverty levels. This publication details how to better understand and provide an enabling policy and regulatory environment to promote responsible fintech innovation, while ensuring consumer protection and supporting inclusive economic development in the region.

*Asian Business and Management* Brookings Institution Press

The international financial crisis of 2007 and 2008 and the situation caused by the COVID-19 pandemic have had a great impact on many firms' financial needs. Simultaneously, several emerging countries have bet on boosting private initiatives as a way to diversify their economies and create jobs and wealth for their populations. New forms of financing have appeared that have impacted the firm's capital structure, cost of capital, and access to finance by underprivileged communities that are normally outside the formal economy. The Handbook of Research on Acceleration Programs for SMEs provides and shares knowledge on the financial mix, alternative forms of finance, capital structure, and more. It calls attention to relevant challenges, financial institutions, and governments to guarantee funds and economic and social development with new competencies, innovations, new ways of investing, entrepreneurship, and business models with new public policies. Covering topics such as earnings management, capital structure, and foreign

exchange, this major reference work is an essential resource for government officials, business leaders and executives, economists, sociologists, students and faculty of higher education, librarians, researchers, and academicians.

### SMEs AND ECONOMIC INTEGRATION IN SOUTHEAST ASIA

Institute of Southeast Asian Studies

This collection of selected studies by well-known experts in major Asian countries surveys, discusses and analyzes emerging problems and challenges facing them. It proposes prescriptions for better regional economic integration and more effective economic management in the future. The book's area of study includes economics and business development, development economics, trade and investment, global competitiveness economics policy in Asia, globalisation, the WTO, and regional and international economic integration.

### THE ROLE OF SMEs IN NATIONAL ECONOMIES IN EAST ASIA

Edward Elgar Publishing

This book examines how Japan has changed its economic relationship with East Asia since the mid 1990s by looking at its commitments to import relief, regional financial and industrial transformations, and regionalism. While the Japanese government has taken proactive initiatives to sustain the sound development of the regional economies, it has become more strategic in preserving its interests in the rapid industrial transformation. The book includes valuable information about Japan's trade remedy measures, Sino-Japan relations, and regional integration in East Asia.

*Handbook of Research on Global Institutional Roles for Inclusive Development* Institute of

#### Southeast Asian Studies

A vibrant stratum of small and medium-sized enterprises (SMEs) is critical for the growth and development of Asian economies. These enterprises generate employment, contribute to investment, participate in value chains, and support innovation. SMEs that seek to sustain and grow their operations, however, face a variety of constraints, many of which are directly related to size. These so-called "size-induced market failures" create a role for public policy interventions by governments throughout the region. This book focuses on the market failures encountered by enterprises in the key areas of technology and innovation, credit and finance, education and skills, and market access. Obstacles to participation in the rapidly expanding regional and global value chains are also examined. Among a variety of issues, the book explores the "missing middle" in credit facilities for enterprises that are beyond microcredit but not yet able to secure regular loans from banks. The book investigates the barriers to innovation and how best to combine internal and external research and development. It also looks at the hiring versus training options to build human capital. The various chapter authors examine national and multicountry experiences in South and East Asia, ranging from those in Pakistan to Japan.

#### **Handbook of Research on Acceleration Programs for SMEs** Routledge

This study looks at the increasingly important role of entrepreneurship and small and medium enterprises (SMEs) as agents of development. The book also focuses on the new policy initiatives by the different governments as they address the issues affecting the development of SMEs themselves.

#### Southeast Asia in Search of an ASEAN Community IGI Global

Urban Disasters and Resilience in Asia presents the latest information on the intensity and frequency of disasters. Specifically, the fact that, in urban areas, more than 50% of the world's population is living on just 2% of the land surface, with most of these cities located in Asia and developing countries that have high vulnerability and intensification. The book offers an in-depth and multidisciplinary approach to reducing the impact of disasters by examining specific evidence from events in these areas that can be used to develop best practices and increase urban resilience worldwide. As urban resilience is largely a function of resilient and resourceful citizens, building cities which are more resilient internally and externally can lead to more productive economic returns. In an era of rapid urbanization and increasing disaster risks and vulnerabilities in Asian cities, *Urban Disasters and Resilience in Asia* is an invaluable tool for policy makers, researchers, and practitioners working in both public and private sectors. Explores a broad range of aspects of disaster and urban resiliency, including environmental, economic, architectural, and engineering factors Bridges the gap between urban resilience and rural areas and community building Provides evidence-based data that can lead to improved disaster resiliency in urban Asia Focuses on Asian cities, some of the most densely populated areas on the planet, where disasters are particularly devastating

Handbook of Research on Acceleration Programs for SMEs IGI Global  
Commonwealth Secretariat

COVID-19 has wreaked havoc on certain industries calling for a sharp increase in the attention paid to the existing business model, strategies, processes as well as practices. COVID-19 has put them to the test of resilience and agility. Multiple concerns and considerations are at play for these industries to restore business sustainability by looking at more radical approaches to preserving their businesses. This book explores the effect of COVID-19 leading to discussions within the scope of resilience, agility, and sustainability among some selected industries such as manufacturing, airlines, e-hailing, and SMEs, and also explores the emerging Work-from-Home trends as a result of COVID-19. As the main contribution of this scholarly work, the book also introduces Resilience-Agility Business Scenario Matrix for identifying plausible organizational scenarios and COVID Business Matrix (CoBuM) for a Remade World.

#### **Entrepreneurship and SMEs in Southeast Asia** Rowman & Littlefield

This timely volume examines various economic, managerial, social and political aspects of globalization and its impact on local economies. State-of-the-art analytical models and original empirical research is used to understand four key and interrelated facets of globalization; ¶ To understand the prospects and the problems of international business and MNCs in the global economy. ¶ To analyze globalization as a process of change. ¶ To understand the new roles of nation states in light of the above. ¶ To articulate the uneasy idea that globalization has resulted in serious imbalances in the global economy. The collection hosts a list of internationally eminent scholars who explain the implications of globalization for progress, crises and conflicts in South and Southeast Asia.

#### **GLOBALISATION AND SMEs IN EAST ASIA**

OECD Publishing

This volume provides data and analysis on micro, small, and medium-sized enterprises (MSMEs) in Central and West Asia to help policymakers support the development of these businesses. The development of MSMEs remains key to promoting inclusive growth in developing economies in Asia and the Pacific. The Asia Small and Medium-Sized Enterprise Monitor (ASM) serves as a resource for evidence-based policy design on MSME development. The ASM 2022 focuses on Central and West Asia. This volume reviews the financial and nonfinancial conditions of MSMEs at country and regional level. It highlights the need for increased lending to MSMEs with better loan assets, enhanced job creation, expanded foreign trade of MSMEs, strengthened digital infrastructure, and greater MSME productivity.

**Economic Globalization in Asia** Handbook of Research on Acceleration Programs for SMEs

Talking about ASEAN, this volume reappraises the organization from the inside, through controversial or perplexing issues such as the ASEAN Way, the accession of the new members, including Myanmar, the principle of non-interference, regional security, regional economic integration, the haze and SARS, and ASEAN's future.

#### **Key Success Factors of SME Internationalisation** Institute of Southeast Asian Studies

In order for foreign direct investment to have deep and lasting positive effects on host countries, it is essential that multinational corporations have close direct and indirect interaction with local firms. A valuable addition to the emerging literature on multinational-local firm interfaces, this book provides a number of case studies from emerging economies that examine such mutually beneficial business relationships and the policy measures necessary to support them.

*Local Economic and Employment Development (LEED) Job-rich Growth in Asia Strategies for Local Employment, Skills Development and Social Protection* Edward Elgar Publishing

This text reveals how competition policy and competitiveness are crucial to contemporary economic, financial and trade management as well as national and international governance, and focuses on contemporary major Asian economies facing increasing globalization and the prevailing influence of the WTO.

#### **Asia Small and Medium-Sized Enterprise Monitor 2022: Volume I** OECD Publishing

' . . . I consider the book a good general reference on SME conditions in the Asia-Pacific region. . . ' - Aegean Leung, ASEAN Economic Bulletin The 1997 financial and economic crisis in East Asia provided the catalyst for an important reappraisal of the Small and Medium sized Enterprise (SME) sector across the region. In this timely book, a distinguished group of contributors discusses the role of SMEs in the globalisation of the East Asian economies, and assess how the financial crisis has impacted on them. They focus on a number of key aspects of SMEs in the region, including: \* financing issues \* the role of entrepreneurship \* the diffusion of technology in the region \* Chinese small businesses \* SME requirements for information technology \* the opportunities afforded by electronic commerce \* regional labour markets and their impact on SMEs.

*Handbook of Research on Business and Technology Incubation and Acceleration* Bloomsbury Publishing

A joint OECD/ILO initiative, this book analyses local approaches in Asia to modernise labour markets and skills strategies and shows how local recovery is taking place through a combination of policy measures on employment creation, skills development and social protection.

#### **Fintech Policy Tool Kit For Regulators and Policy Makers in Asia and the Pacific** IGI Global

The SME Policy Index is a benchmarking tool for emerging economies to monitor and evaluate progress in policies that support small and medium-sized enterprises.

*Handbook of Research on Developing Circular, Digital, and Green Economies in Asia* Springer

This book offers policy guidance for Thailand for fostering entrepreneurship and strengthening the performance of SMEs and their contribution to growth and development.
