All the fundamentals. No fluff. Learn more with less! A truly revolutionary American Government textbook, Christine Barbour's

AmGov: Long Story Short, responds to the needs of today's students and instructors through brevity and accessibility. The succinct ten chapters are separated by tabs that make it easy to skim, flip, revisit, reorient, and return to content quickly. Reading aids like bullets, annotations and arrows walk students through important facts and break up the material in short, engaging bites of information that highlight not only what is important but why it's important. Though brief, this core book is still robust enough to provide everything that students need to be

successful in their American Government course. Whether for the on-the-go student who doesn't have time to read and digest a lengthy chapter, or the instructor who wants a book that will stay out of their way and leave room for plenty of supplementary reading and activities, AmGov provides a perfectly simplified foundation for a successful American Government course.

Part ode to building something with one's hands in the modern age, part celebration of the beauty and function of boats, and part moving father-daughter story, *How to Build a Boat* is a bold adventure. Once an essential skill, the ability to build a clinker boat, first innovated by the Vikings, can seem incomprehensible today. Yet it was the clinker, with its overlapping planks, that afforded us access to the oceans, and its

construction has become a lost art that calls to the do-it-yourselfer in all of us. John Gornall heard the call. A thoroughly unskilled modern man, Gornall set out to build a traditional wooden boat as a gift for his newborn daughter. It was, he recognized, a ridiculously quixotic challenge for a man who knew little about woodworking and even less about boat-building. He wasn't even sure what type of wood he should use, the tools he'd need, or where on earth he'd build the boat. He had much to consider...and even more to learn. But, undaunted, he embarked on a voyage of rediscovery, determined to navigate his way back to a time when we could fashion our future and leave

our mark on history using only time-honored skills and the materials at hand. His journey began in East Anglia, on England's rocky eastern coast. If all went according to plan, it would end with a great adventure, as father and daughter cast off together for a voyage of discovery that neither would forget, and both would treasure until the end of their days. *How to Build a Boat* celebrates the art of boat-building, the simple pleasures of working with your hands, and the aspirations and glory of new fatherhood. John Gornall "tells the inspiring story of how even the least skilled of us can make something wonderful if we invest enough time and love" (The Daily

Mail) and taps into the allure of an ancient craft, interpreting it in a modern way, as tribute to the generations yet to come. "Both the book, and place, are magical" (The Sunday Telegraph).

Do your kids love animals? Elliot takes on

an adventure following a group of raccoons all around Sag Harbor the night before the town's annual HarborFest celebrations. He watches the plump little comedians feast on a buffet of discarded food as they run from place to place, leaving messes in their wake. If only the owners of those trash bins learned what Elliot had learned from a wildlife expert at school. Elliot is just a secret observer until he has the chance to help and forms a bond with the adorable group of raccoons! Funny and empowering, the Elliot's Adventures children's books are an ode to loving the world we live in by respecting nature and wildlife. The stories are designed to stimulate

children's imaginations and encourage unstructured outdoor play at a time when kids are spending more hours than ever behind a screen each day. A mother and son collaboration, this series is a celebration of parents and children everywhere. A perfect book for parents and kids who: - Enjoy silly adventures- Love to learn about animals- Care about the environment- Want to protect wildlife- Believe kids can make a difference.

"O'Reilly Media, Inc." In this inspirational and humorous collection of essays, author John Dietsch sees his addiction to and passion for fishing as a parable that can help

us shift from compulsive thinking to mindfulness and a closer connection to God. From creating fishing scenes on the set of *A River Runs Through It* in Montana, to directing fly fishing shows in New Zealand and from exploring deep canyons in California to guiding in Colorado, John shares his experiences and asks the question: what are we really fishing for? Through John's journeys across the globe, we discover that the same pursuit in fishing—of what is elusive but attainable—can be applied to our own spiritual journey. In the end, Dietsch uncovers his own truth under the rocks of a childhood river, recognizing the loss of both his brothers as the path of

acceptance and faith that is graced by waters.

In this sweeping literary, cultural, and political history, French sociologist Ginette Castro vividly and dramatically tells the story of the contemporary women's movement in the United States. From the liberal feminists, like Betty Friedan, Mary Daly, and the members of NOW, to the radical feminists, including Kate Millett, Ti-Grace Atkinson, New York Radical Women, and Cell 16, Dr. Castro offers an enlivened yet balanced account of the many different ideological currents within the movement. Central to her contribution is the

detailed reexamination of the role of the radical feminists, and her efforts to neutralize the sensationalism which has become attached to this segment of the movement. Captured here is the diversity of expression and yet the underlying unity, and potential for ideological synthesis in the American feminist movement. American Feminism makes an invaluable contribution to understanding the course of feminism in the United States and its radical roots.

**Catalogue VI** Simon and Schuster India's history and culture is ancient and dynamic, spanning back to the beginning of human civilization. Beginning with a mysterious culture along the Indus River

and in farming communities in the southern lands of India, the history of India is punctuated by constant integration with migrating peoples and with the diverse cultures that surround the country. Placed in the center of Asia, history in India is a crossroads of cultures from China to Europe, as well as the most significant Asian connection with the cultures of Africa. The Historical Dictionary of Ancient India provides information ranging from the earliest Paleolithic cultures in the Indian subcontinent to 1000 CE. The ancient history of this country is related in this book through a chronology, an introductory essay, a bibliography, and hundreds of cross-

referenced dictionary entries on rulers, bureaucrats, ancient societies, religion, gods, and philosophical ideas.

This successful text puts personality back into the personality course, integrating the classic insights of the personality theorists with modern research in a manner that will fascinate and captivate students. Organized around eight basic aspects of personality—psychoanalytic, ego, biological, behaviorist, cognitive, trait, humanistic, and situational/interactionist—the text both explains the classic theories and also explores how the information applies to the student reader. The text presents a balanced, critical, yet optimistic approach. Personality encourages critical thinking about human nature. While

holding the highest scientific standards, the text uses unique and provocative pedagogical devices (see below) to capture students' interest and bring the field of personality to life. It has been hailed as the best-written and most relevant personality textbook in the field.

## **GOVERNANCE AND SUSTAINABILITY**

Infinity Publishing  
Most people know that there are 70 million Baby Boomers in America today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations

don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money."

Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With

the principles outlined in *Millionaire by Thirty*, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future. *Personal Essays on Fly Fishing and the Transformative Power of Nature* Simon and Schuster
