This unique supplement, available for the first time with Petruzella's "Programmable Logic Controllers, 3rd Edition," allows students and working technicians to use powerful simulation software to model and modify PLC operations. The printed manual has simulation exercises that parallel chapters in the text, with illustrations and step-by-step procedures for users to follow.

Programmable Logic Controller (PLC) Lab.

The PLC lab contains multiple workstations

equipped with computers, PLC units and

other interfacing devices to train students

how to program and upload ladder logic

code. Students program ladder logic code

using the RSLogix software, which

provides a graphical interface

representing conditional computer

programming functions such as if/else

statements.
