Chapter 1 is an introduction to literacy, assessment, and instruction. Chapter 2 focuses on the importance of building relationships with others to help students develop positive attitudes and motivation toward literacy and learning. Chapters 3 through 7 each address a different literacy process: language development; word analysis; reading fluency; listening, reading, and viewing comprehension; and writing composition and visual representation. Content Knowledge in English Language Teacher Education provides original professional experiences and research accounts of teaching language in the specific context of English language teacher education programmes in diverse international settings, with contributions from Argentina, Australia, Chile, China, Ecuador, Japan, Mexico, the USA and Turkey. The volume focuses on how teacher educators plan and deliver modules which help future teachers understand English as a system and develop English language proficiency. The contributors describe and analyse their professional practices in designing, delivering and evaluating modules or courses on understanding the English language as a system, i.e. content knowledge, exploring the teaching of elements such as phonetics, phonology, grammar, pragmatics, philology, and discourse analysis. In addition, they draw on their vast professional experience to explore how to successfully develop competence and language skills in English so that teachers can become models and proficient users of the language for their students. The contributions range from more historical and functionally linguistic focused chapters to more sociocultural explorations of teaching English to future teachers including interculturality, multilingualism, World Englishes, critical thinking skills, academic writing, and literacy through literature. The accounts shed light on the diverse practices of educators from many different countries, contexts, and cultural and linguistic backgrounds, drawing links between policy and practice, to locate much of English language teacher education and curriculum development outside the so-called 'inner circle' of native English-language speaking contexts, practitioners, and researchers.

The 3rd Edition of *Literacy & Learning in the Content Areas* helps readers build the knowledge, motivation, tools, and confidence they need as they integrate literacy into their middle and high school content area classrooms. Its unique approach to teaching content area literacy actively engages preservice and practicing teachers in reading and writing and the very activities that they will use to teach literacy to their own students in middle and high school classrooms. Rather than passively learning about strategies for incorporating content area literacy activities, readers get hands-on experience in such techniques as mapping/webbing, anticipation guides, booktalks, class websites, and journal writing and reflection. Readers also learn how to integrate children's and young adult literature, primary sources, biographies, essays, poetry, and online content, communities, and websites into their classrooms. Each chapter offers concrete teaching examples and practical suggestions to help make literacy relevant to students' content area learning. Author Sharon Kane demonstrates how relevant reading, writing, speaking, listening, and visual learning activities can improve learning in content area subjects and at the same time help readers meet national content knowledge standards and benchmarks.

Do Irish superheroes actually sound Irish? Why are Gary Larson's Far Side cartoons funny? How do political cartoonists in India, Turkey, and the US get their point across? What is the impact of English on comics written in other languages? These questions and many more are answered in this volume, which brings together the two fields of comics research and linguistics to produce groundbreaking scholarship. With an international cast of contributors, the book offers novel insights into the role of language in comics, graphic novels, and single-panel cartoons, analyzing the intersections between the visual and the verbal. Contributions examine the relationship between cognitive linguistics and visual elements as well as interrogate the controversial claim about the status of comics as a language. The book argues that comics tell us a great deal about the sociocultural realities of language, exploring what code switching, language contact, dialect, and linguistic variation can tell us about identity – from the imagined and stereotyped to the political and real.
