Genre Analysis By John M Swales OMB No. 3442780786251 edited by

HAYDEN CAYDEN

Scientific and Technical Translation
Walter de Gruyter GmbH & Co KG
This book provides a rich and accessible

account of genre studies by a world-renowned applied linguist. The hardback edition discusses today's research world, its various configurations of genres, and the role of English within the genres. Theoretical and methodological issues are explored, with a special emphasis on various metaphors of genre. The book is full of carefully worded detail and each chapter ends with suggestions for pedagogical practice. The volume closes with evaluations of contrastive rhetoric, applied corpus linguistics, and critical approaches to EAP. *Research Genres* provides a rich and scholarly account of this key area.

Science Communication on the Internet
Cambridge University Press

This book examines the expanding world of genres on the Internet to understand issues of science communication today. The book explores how some traditional print genres have become digital, how some genres have evolved into new digital hybrids, and how and why new genres have emerged and are emerging in response to new rhetorical exigences and communicative demands. Because social actions are in constant change and, ensuing from this, genres evolve faster than ever, it is important to gain insight into the interrelations between old genres and new genres and the processes underpinning the construction of new genre sets, chains and assemblages for communicating scientific research to both expert and diversified audiences. In examining scientific genres on the Internet this book seeks to illustrate the increasing diversification of genre ecologies and their underlying social, disciplinary and individual agendas.

Investigating English Legal Genres in Academic and Professional Contexts
Peter Lang

This volume brings together a selection of contributions presented at the 15th European Symposium on Languages for Special Purposes, held at the University of Bergamo (Italy) from 29 August to 2 September 2005. The conference title, «New Trends in Specialized Discourse», reflects the emphasis given to recent orientations in research, coming from established as well as new authors in the field. As suggested by the title of this volume, the analysis of specialized discourse calls for a specialized discourse analysis. When applied linguists deal with vocational discourses, they are faced with a double challenge: on the one hand, an understanding of textualisations often alien to the general language; on the other hand, the use of analytical tools designed specifically for their investigation. The studies presented in this volume position themselves somewhere along this continuum, focusing alternatively on converging/diverging features of texts and discourses.

Public Information Messages John Benjamins Publishing Company

This volume explores the complex relations between norms and exemplars of genres from business and technical communication. Contributors compare a variety of types of norm with textual practices in a variety of ways. The genres examined are typical of the range of audiences and media of workplace and business communication: product withdrawal notices, press releases, job ads, oral presentations, sales letters and tenders, chairman's reports, and technical reports. They are compared with norms set by teachers, by unimaginative practice, by more or less self-appointed experts, or by practitioners who may not share the national or professional culture of their

colleagues. However accurate these may be they never do justice to the complexity of 'reality'. The contributors to this volume use a wide variety of methods in their attempt to capture this reality. Many analyse texts, but all combine this procedure with at least one other approach and often more: questionnaires, experiments assessing the effect of manipulated texts, analysis of practitioner comments, and use of natural sources of practitioner judgements like awards for good practice.

Advances in Medical Discourse

Analysis University of Michigan Press/ELT

Genre analysis has become a key approach within the field of English for Specific Purposes and helps students understand particular language use patterns in target contexts. *Introducing Genre and English for Specific Purposes* provides an overview of how genre has been conceptualized and applied in ESP, as well as the features that distinguish ESP genre research and teaching from those of other genre schools. The macro and micro aspects of ESP genre-based pedagogy are also analysed and include: different possibilities for planning and designing an ESP genre-based course; the concrete, micro aspects of materials creation; and how genres can be learned through play. *Introducing Genre and English for Specific Purposes* is essential reading for students and pre-service teachers who are studying Genre, English for Specific Purposes or language teaching methodologies.

Genre Analysis Routledge

The *Handbook of Technology and Second Language Teaching and Learning* presents a comprehensive exploration of the impact of technology on the field of second language learning. The rapidly

evolving language-technology interface has propelled dramatic changes in, and increased opportunities for, second language teaching and learning. Its influence has been felt no less keenly in the approaches and methods of assessing learners' language and researching language teaching and learning. Contributions from a team of international scholars make up the Handbook consisting of four parts: language teaching and learning through technology; the technology-pedagogy interface; technology for L2 assessment; and research and development of technology for language learning. It considers how technology assists in all areas of language development, the emergence of pedagogy at the intersection of language and technology, technology in language assessment, and major research issues in research and development of technologies for language learning. It covers all aspects of language including grammar, vocabulary, reading, writing, listening, speaking, pragmatics, and intercultural learning, as well as new pedagogical and assessment approaches, and new ways of conceiving and conducting research and development. The *Handbook of Technology and Second Language Teaching and Learning* demonstrates the extensive, multifaceted implications of technology for language teachers, learners, materials-developers, and researchers.

EXPLORATIONS AND APPLICATIONS

Routledge

Persuasion, in its various linguistic forms, enters our lives daily. Politicians and the news media attempt to change or confirm our beliefs, while advertisers try to bend our tastes toward buying their products. Persuasion goes on in

courtrooms, universities, and the business world. Persuasion pervades interpersonal relations in all social spheres, public and private. And persuasion reaches us via a large number of genres and their intricate interplay. This volume brings together nine chapters which investigate some of the typical genres of modern persuasion. Using both quantitative and qualitative methods, the authors explore the linguistic features of successful (and unsuccessful) persuasion and the reasons for the variation of persuasive choices as realized in various genres: business negotiations, judicial argumentation, political speech, advertising, newspaper editorials, and news writing. In the final chapter, the editors tie together the two themes – persuasion and genres – by proposing an Intergenre Model. This model assumes that a powerful force behind generic evolution is the perennial need for implicit persuasion.

The Handbook of Technology and Second Language Teaching and Learning Peter Lang

This book is a result of the 2013 CLAVIER Conference held in Modena in November 2013, and includes a selection of the papers presented on that occasion. As the title suggests, this volume encourages cross-generic and cross-disciplinary investigations, in order to advocate integrated approaches to the study of media discourse regarding both theoretical background and practical applications. Bringing together a wide range of case studies, the book fosters debate on a variety of aspects related to the representation of specialised discourse in and through the media, including, for example, voice and point of view, argumentative practices, knowledge construction, multimodality,

the re-contextualization and re-conceptualization of knowledge, opinion formation and peer-to-peer communication, and popularization in and through traditional, digital and social media. Taken together, the contributions to this volume provide extensive exemplification of the type of research currently being conducted on these issues. The variety of the questions posed and the wide array of methods used here therefore represent a substantial contribution to sharpening existing knowledge and furthering the ongoing debate among scholars in the field.

NEW TRENDS IN SPECIALIZED DISCOURSE ANALYSIS

Peter Lang
Discourse Studies is an interdisciplinary field studying the social production of meaning across the entire spectrum of the social sciences and humanities. The Discourse Studies Reader brings together 40 key readings from discourse researchers in Europe and North America, some of which are now translated into English for the first time. Divided into seven sections – ‘Theoretical Inspirations: Structuralism versus Pragmatics’, ‘From Structuralism to Poststructuralism’, ‘Enunciative Pragmatics’, ‘Interactionism’, ‘Sociopragmatics’, ‘Historical Knowledge’ and ‘Critical Approaches’ – The Discourse Studies Reader offers a comprehensive overview of the main currents in discourse studies, both discourse theory and discourse analysis. With short introductions elaborating the

broader context, the sections present key selections from a variety of disciplinary backgrounds by placing them into their respective epistemological traditions. The Discourse Studies Reader is an indispensable textbook for students and scholars alike who are interested in discourse theoretical questions and working with discourse analytical methods.

NEW DIRECTIONS IN ESP AND EAP RESEARCH AND PRACTICE

Routledge

This volume presents the science review article as an opportune genre for introducing rhetorical diversity into scientific communities. First, it discusses the theoretical issues involved in applying the notion of a discourse community to that of an international science discourse community and examines the practical issues faced by writers who must use a language system that is not their mother tongue in order to become active participants. The review article is argued to be important in shaping the views of scientific discourse communities. Next, based on specialist informant and linguistic findings, review articles are classified into four different types according to their focus: history, status quo, theory/model or issue. Finally, practical suggestions for teaching how to write a review article are offered based on a framework of Moves and Steps, which can be expanded to the teaching of other genres.

A Corpus-based Approach □□□□□□□□

As you are reading this, you are finding yourself in the ubiquitous public sphere that is the Web. Ubiquitous, and yet not universally accessible. This volume addresses this dilemma of the public sphere, which is by definition open to

everyone but in practice often excludes particular groups of people in particular societies at particular points in time. The guiding questions for this collection of articles are therefore: Who has access to the public sphere? How is this access enabled or disabled? Under what conditions is it granted or withheld, and by whom? We regard the public sphere as the nodal point for the discourses of business, politics and media, and this basic assumption is also reflected in the structure of the volume. Each of these three macro-topics comprises chapters by international scholars from a variety of disciplines and research traditions who each combine up-to-date overviews of the relevant literature with their own cutting-edge research into aspects of different public spheres such as corporate promotional communication, political rhetoric or genre features of electronic mass media. The broad scope of the volume is perhaps best reflected in a comprehensive discussion of communication technologies ranging from conventional spoken and written formats such as company brochures, political speeches and TV shows to emerging ones like customer chat forums, political blogs and text messaging. Due to the books' wide scope, its interdisciplinary approach and its clear structure, we are sure that whether you work in communication and media studies, linguistics, political science, sociology or marketing, you will find this handbook an invaluable guide offering state-of-the-art literature reviews and exciting new research in your field and adjacent areas.

Persuasion Across Genres Peter Lang
A broad strand of applied linguistic research has focused on the language of science and scholarship, stressing its

role in the construction and negotiation of knowledge claims. Central to the success of such texts is the use of evaluative expressions encoding what is considered to be desirable or undesirable in a given domain. While the speech acts relevant to evaluation have been extensively researched, little is known of the underlying values they encode. This volume seeks to fill the gap by exploring the main facets of academic value in a corpus of research articles from leading journals in anthropology, biology, computer science, economics, engineering, history, mathematics, medicine, physics and sociology. The collocations and qualified entities associated with such variables in the corpus provide insights into how scholars draw on a repertoire of conventional, largely unqualified, axiological meanings instrumental to the production of new knowledge in their field.

INNOVATIVE APPROACHES IN TEACHING ENGLISH WRITING TO CHINESE SPEAKERS

Taylor & Francis

Writing matters, and so does research into real-life writing. The shift from an industrial to an information society has increased the importance of writing and text production in education, in everyday life and in more and more professions in the fields of economics and politics, science and technology, culture and media. Through writing, we build up organizations and social networks, develop projects, inform colleagues and customers, and generate the basis for decisions. The quality of writing is decisive for social resonance and professional success. This ubiquitous real-life writing is what the present

handbook is about. The de Gruyter Handbook of Writing and Text Production brings together and systematizes state-of-the-art research. The volume contains five sections, focussing on (I) the theory and methodology of writing and text production research, as well as on problem-oriented and problem-solving approaches related to (II) authors, (III) modes and media, (IV) genres, and (V) domains of writing and text production. Throughout the 21 chapters, exemplary research projects illustrate the theoretical perspectives from globally relevant research spaces and traditions. Both established and future scholars can benefit from the handbook's fresh approach to writing in the context of multimodal, multi-semiotic text production.

Investigating interdiscursive performance in professional practice

University of Michigan Press

Specialised English: New Directions in ESP and EAP Research and Practice provides an authoritative and cutting-edge account of the latest avenues of research and practice in the dynamic field of Specialised English. Ken Hyland and Lillian Wong present 17 specially commissioned chapters by some of the world's leading experts to offer discussions of key topics in research, theory and pedagogy from a variety of international perspectives. Divided into three sections, which focus on conceptual issues, text and classroom practice, this book: Offers a clear and accessible introduction to current issues in EAP and ESP, including academic

interaction, academic lingua franca, second language publishing, workplace talk, practitioner identity, data-driven learning and critical thinking Includes studies of a range of genres such as research articles and student reports, student spontaneous speech, personal statements, builders' diaries and university tutorials Presents links between theory and practice with a sampling of different research methodologies, practical applications and theoretical approaches Specialised English is essential reading for upper-level undergraduate and postgraduate students and researchers in EAP/ESP and applied linguistics, as well as pre- and in-service teachers and teacher educators.

A Linguistic Approach Peter Lang
Discourse is language as it occurs, in any form or context, beyond the speech act. It may be written or spoken, monological or dialogical, but there is always a communicative aim or purpose. The present volume provides systematic orientation in the vast field of studying discourse from a pragmatic perspective. It first gives an overview of a range of approaches developed for the analysis of discourse, including, among others, conversation analysis, systemic-functional analysis, genre analysis, critical discourse analysis, corpus-driven approaches and multimodal analysis. The focus is furthermore on functional units in discourse, such as discourse markers, moves, speech act sequences, discourse phases and silence. The final section of the volume examines discourse types and domains, providing a taxonomy of discourse types and focusing on a range of discourse domains, e.g. classroom discourse, medical discourse, legal discourse, electronic discourse. Each article surveys the current state of the art of the

respective topic area while also presenting new research findings.

Critical Genre Analysis Cambridge University Press
divdivIncidents in an Educational Life chronicles the educational journey of John M. Swales. A leading scholar in the field of Applied Linguistics and its subfield of English for Specific Purposes, Swales has taught across the globe in places such as Italy, Sweden, Libya, the United Kingdom, and the University of Michigan. His memoir offers a rare glimpse into the professional journey of a prominent scholar and educator./DIV div /DIV divIncidents in an Educational Life explores the lessons Swales learned by teaching and by being taught. The story follows his gradual transformation from an English as a Second Language teacher to one of the leading international figures in his field, stopping along the way to tell the sometimes amusing, sometimes painful anecdotes that have made him the recognized educator he is today. His entertaining prose make this volume a must-read for anyone considering the field, or the many ways in which we all become teachers./DIV div /DIV divJohn M. Swales is one of the leading international scholars in the field of English for Specific Purposes. He retired in the summer of 2006 from the University of Michigan after teaching at multiple universities overseas. He is the co-author of the international bestseller *Academic Writing for Graduate Students* (3rd ed.). /DIV/DIV

CORPUS-BASED RESEARCH ON VARIATION IN ENGLISH LEGAL DISCOURSE

John Wiley & Sons

The focus of this volume is on medical

discourse, a domain of language which deserves closer scrutiny by academics as well as practitioners, due to its increasing relevance and pervasiveness in modern society. Despite the wealth of publications dealing with specialized or academic discourse and its rhetoric, few of these are devoted specifically to medical discourse. This book seeks to redress the balance by bringing together a number of studies that bear witness to the widespread interest in medical texts shown by linguists and professional communities around the world. The volume is divided into two main parts: the first targets medical discourse in its spoken dimension, while the second contains various analyses of written texts. The theoretical perspectives and individual case studies presented here reflect the wide range of methodological approaches and theoretical issues that characterise current research in the field.

Introducing Genre and English for Specific Purposes Walter de Gruyter GmbH & Co KG

Genre theory has focused primarily on the analysis of generic constructs, with increasing attention to and emphasis on

the contexts in which such genres are produced, interpreted, and used to achieve objectives, often giving the impression as if producing genres is an end in itself, rather than a means to an end. The result of this focus is that there has been very little attention paid to the ultimate outcomes of these genre-based discursive activities, which are more appropriately viewed as academic, institutional, organizational, and professional actions and practices, which are invariably non-discursive, though often achieved through discursive means. It was this objective in mind that the book develops an approach to a more critical and deeper understanding of interdiscursive professional voices and actions. Critical Genre Analysis as a theory of discursive performance is thus an attempt to be as objective as possible, rigorous in analytical endeavour, using a multiperspective and multidimensional methodological framework taking into account interdiscursive aspects of genre construction to make it increasingly explanatory to demystify discursive performance in a range of professional contexts.
