Conflict is ubiquitous and inevitable, but people generally dislike it and try to prevent or avoid it as much as possible. So why do clashes of right and wrong occur? And why are some more serious than others? In *Moral Time*, sociologist Donald Black presents a new theory of conflict that provides answers to these and many other questions. The heart of the theory is a completely new concept of social time. Black claims that the root cause of conflict is the movement of social time, including relational, vertical, and cultural time—changes in intimacy, inequality, and diversity. The theory of moral time reveals the causes of conflict in all human relationships, from marital and other close relationships to those between strangers, ethnic groups, and entire societies. Moreover, the theory explains the origins and clash of right and wrong not only in modern societies but across the world and across history, from conflict concerning sexual behavior such as rape, adultery, and homosexuality, to bad manners and dislike in everyday life, theft and other crime, racism, anti-Semitism, anti-Americanism, witchcraft accusations, warfare, heresy, obscenity, creativity, and insanity. Black concludes by explaining the evolution of conflict and morality across human history, from the tribal to the modern age. He also provides surprising insights into the postmodern emergence of the right to happiness and the expanding rights of humans and non-humans across the world. *Moral Time* offers an incisive, powerful, and radically new understanding of human conflict—a fundamental and inescapable feature of social life.

For the discourse of localization, translation is often "just a language problem". For translation theorists, localization introduces fancy words but nothing essentially new. Both views are probably right, but only to an extent. This book sets up a dialogue across those differences. Is there anything that translation theory can gain from localization? Can localization theory learn anything from the history and complexity of translation? To address those questions, both terms are placed within a more general frame, that of text transfer. Texts are distributed in time and space; localization and translation respond differently to those movements; their relative virtues are thus brought out on common ground. Anthony Pym here reviews not only key problems in translation theory, but also critical concepts such as cultural resistance, variable transaction costs, segmentation of the labour market, and the dehumanization of technical discourse. The book closes with a plea for the humanizing virtues of translation, over and above the efficiencies of localization.
