Hector Hugh Munro (18 December 1870 – 14 November 1916), better known by the pen name Saki and also frequently as H. H. Munro, was a British writer whose witty, mischievous and sometimes macabre stories satirize Edwardian society and culture. He is considered a master of the short story, and often compared to O. Henry and Dorothy Parker. Influenced by Oscar Wilde, Lewis Carroll and Rudyard Kipling, he himself influenced A. A. Milne, Noël Coward and P. G. Wodehouse. Besides his short stories (which were first published in newspapers, as was customary at the time, and then collected into several volumes), he wrote a full-length play, *The Watched Pot*, in collaboration with Charles Maude; two one-act plays; a historical study, *The Rise of the Russian Empire* (the only book published under his own name); a short novel, *The Unbearable Bassington*; the episodic *The Westminster Alice* (a parliamentary parody of *Alice in Wonderland*); and *When William Came*, subtitled *A Story of London Under the Hohenzollerns*, a fantasy about a future German invasion and occupation of Britain. "The Unrest-Cure" - Saki's recurring hero Clovis

Sangrail, a clever, mischievous young man, overhears the complacent middle-aged Huddle complaining of his own addiction to routine and aversion to change. Huddle's friend makes the wry suggestion that he needs an "unrest-cure" (the opposite of a rest cure), to be performed, if possible, in the home. Clovis takes it upon himself to "help" the man and his sister by involving them in an invented outrage that will be a "blot on the twentieth century". Famous works of the author Saki: "The Interlopers", "Gabriel-Ernest", "The Schartz-Metterklume Method", "The Toys of Peace", "The Storyteller", "The Open Window", "The Unrest-Cure", "Esmé", "Sredni Vashtar", "Tobermory", "The Bull", "The East Wing".

In the tradition of his own bestselling masterpieces *The Story of Civilization* and *The Lessons of History*, Pulitzer Prize-winning historian Will Durant traces the lives and ideas of those who have helped to define civilization, from its dawn to the beginning of the modern world. *Heroes of History* is a book of life-enhancing wisdom and optimism, complete with Durant's wit, knowledge, and unique ability to explain events and ideas in simple, exciting terms. It is the lessons of our heritage passed on for the edification and benefit of future generations—a fitting legacy from America's most beloved historian and philosopher. Will Durant's popularity as America's favorite teacher of history and philosophy remains undiminished by time. His books are accessible to readers of every

kind, and his unique ability to compress complicated ideas and events into a few pages without ever "talking down" to the reader, enhanced by his memorable wit and a razor-sharp judgment about men and their motives, made all of his books huge bestsellers. *Heroes of History* carries on this tradition of making scholarship and philosophy understandable to the general reader, and making them good reading, as well. At the dawn of a new millennium and the beginning of a new century, nothing could be more appropriate than this brilliant book that examines the meaning of human civilization and history and draws from the experience of the past the lessons we need to know to put the future into context and live in confidence, rather than fear and ignorance.

The study of every unit of social organization must eventually lead to an analysis of the interaction of its elements. The analytical distinction between units of organization and processes of interaction is, therefore, not destined to divide up our work for us. A division of labor seems more likely to come from distinguishing among types of units, among types of elements, or among types of processes. Sociologists have traditionally studied face-to-face interaction as part of the area of "collective behavior"; the units of social organization involved are those that can form by virtue of a breakdown in ordinary social intercourse: crowds, mobs, panics, riots. The other aspect of the problem of face-to-face interaction—the units of organization in which orderly and uneventful face-to-face interaction occurs—has been neglected until recently, although there is some early work on classroom interaction, topics of conversation, committee meetings, and public assemblies. Instead of dividing face-to-face interaction into the eventful and the routine, I propose a different division—into unfocused interaction and focused interaction. Unfocused interaction consists of those interpersonal communications that result solely by virtue of persons being in one another's presence, as when two strangers across the room from each other check up on each other's clothing, posture, and general manner, while each modifies his own demeanor because he himself is under observation. Focused interaction occurs when people effectively agree to sustain for a time a single focus of cognitive and visual attention, as in a conversation, a board game, or a joint

task sustained by a close face-to-face circle of contributors. Those sustaining together a single focus of attention will, of course, engage one another in unfocused interaction, too. They will not do so in their capacity as participants in the focused activity, however, and persons present who are not in the focused activity will equally participate in this unfocused interaction. The two papers in this volume are concerned with focused interaction only. I call the natural unit of social organization in which focused interaction occurs a focused gathering, or an encounter, or a situated activity system. I assume that instances of this natural unit have enough in common to make it worthwhile to study them as a type. Three different terms are used out of desperation rather than by design; as will be suggested, each of the three in its own way is unsatisfactory, and each is satisfactory in a way that the others are not. The two essays deal from different points of view with this single unit of social organization. The first paper, "Fun in Games," approaches focused gatherings from an examination of the kind of games that are played around a table. The second paper, "Role Distance," approaches focused gatherings through a review and criticism of social-role analysis. The study of focused gatherings has been greatly stimulated recently by the study of group psychotherapy and especially by "small-group analysis." I feel, however, that full use of this work is impeded by a current tendency to identify focused gatherings too easily with social groups. A small but interesting area of study is thus obscured by the biggest title, "social group," that can be found for it.

Modern society is beginning to re-examine its whole relationship with animals and the natural world. Until recently issues such as animal welfare and environmental protection were considered the domain of small, idealistic minorities. Now, these issues attract vast numbers of articulate supporters who collectively exercise considerable political muscle. Animals, both wild and domestic, form the primary focus of concern in this often acrimonious debate. Yet why do animals evoke such strong and contradictory emotions in people - and do our western attitudes have anything in common with those of other societies and cultures? Bringing together a range of contributions from distinguished experts in the field, *Animals and Society* explores the importance of animals in society from social, historical and cross-cultural perspectives.

The Secret Sin of Septimus Brope is a short story by Saki. Hector Hugh Munro (18 December 1870 - 13 November 1916), better known by the pen name Saki, and also frequently as H. H. Munro, was a British writer whose witty, mischievous and sometimes macabre stories satirized Edwardian society and culture. He is considered a master of the short story and often compared to O. Henry and Dorothy Parker. Influenced by Oscar Wilde, Lewis Carroll, and Kipling, he himself influenced A. A. Milne, Noel Coward, and P. G. Wodehouse. Beside his short stories (which were first published in newspapers, as was customary at the time, and then collected into several volumes), he wrote a full-length play, *The Watched Pot*, in collaboration with Charles Maude; two one-act plays; a historical study, *The Rise of the Russian Empire*, the only book published under his own name; a short novel, *The Unbearable Bassington*; the episodic *The Westminster Alice* (a Parliamentary parody of *Alice in Wonderland*), and *When William Came*, subtitled *A Story of London Under the Hohenzollerns*, a fantasy about a future German invasion of Britain. Mary was the daughter of Rear Admiral Samuel Mercer; and her nephew, Cecil William Mercer, became a famous writer as Dornford Yates. Charles Munro was an Inspector-General for the Burmese Police. In 1872, on a home visit to England, Mary was charged by a cow; and the shock caused her to miscarry. She never recovered and soon died. Charles Munro sent his children, including two-year-old Hector, to England, where they were brought up by their grandmother and aunts in a strict puritanical household. Munro was educated at Pencarwick School in Exmouth, Devon and at Bedford School. On a few occasions, when he retired, Charles travelled with Hector and his sister to fashionable European spas and tourist resorts. In 1893, Hector followed his father into the Indian Imperial Police, where he was posted to Burma (like George Orwell a generation later). Two years later, having contracted malaria, he resigned and returned to England. At the start of World War I, although 43 and officially over-age, Munro refused a commission and joined 2nd King Edward's Horse as an ordinary trooper, later transferring to 22nd Battalion, the Royal Fusiliers, where he rose to the rank of lance sergeant. More than once he returned to the battlefield when officially still too sick or injured. In November 1916, when sheltering in a shell crater near Beaumont-Hamel, France, during the Battle of the Ancre he was killed by a German sniper. His last words, according to several sources, were "Put that bloody cigarette out!" After his death, his sister Ethel destroyed most of his papers and wrote her own account of their childhood.

A New York Times bestseller! In this irreverently funny, one-of-a-kind book, transformational comedian Kyle Cease shows you how to love failure and follow your heart, release the addictions of your mind, and live in a state of infinite possibility. If Eckhart Tolle and Jim Carrey had a baby, that baby would be Kyle Cease. After twenty-five years of achieving what he thought were his dreams of being a headlining touring comedian and actor, Kyle Cease suddenly discovered that the belief that "When something happens, I will be happy" is a complete lie. With nothing more than an intuition, he decided to quit his stand-up career at its peak, and now—as a transformational

comedian, he brings his one-of-a-kind self-help wisdom to sold-out audiences in his *Evolving Out Loud* live stage show. In *I Hope I Screw This Up*, he disarms readers as he leads them to their own personal breakthroughs, helping them to recognize that actual happiness and fulfillment is available to them—not in some distant future, but right now. As he has shown audiences all over the world, when you embrace your pain, fear, and vulnerability instead of pushing it away, you will discover an authentic creativity and power that is truly unstoppable. Using self-deprecating personal stories, hilarious observations on life, and poorly drawn illustrations, Kyle unravels the deepest issues standing between us and emotional freedom. From discovering the never-ending opportunities that come from playing—and going with whatever comes up in the moment—to learning to let go of what feels heavy in our lives, this book is a journey into the endless possibility that can appear if we just dare to let go of our fear of screwing up. This is not motivation. This is not inspiration. This is true transformation.

The Ladybird is a long tale or novella by D. H. Lawrence. It was first drafted in 1915 as a short story entitled *The Thimble*. Lawrence rewrote and extended it under a new title in December 1921 and sent the final version to his English agent on 9 January 1922. It was collected with two other tales, *The Captain's Doll* and *The Fox*, and the three novellas were then published in London by Martin Secker in March 1923 under the title *The Ladybird* and in New York by Thomas Seltzer as *The Captain's Doll* in April 1923.

In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

This is the account of an American teenager who discovered a monastery in Tibet that was the inspiration for the legend of Shangri La. It might be categorized as a 'new age' or philosophy book, like the *Celestine Prophecy*, since it focuses on his spiritual training and their teachings in a novel-like format. Hard to believe, but interestingly, the sub-tropical region amongst the Himalayas that he describes finding, was later documented by explorers from National Geographic, then 'covered up' (there is still evidence of this). Also interesting is that the author was apparently mentioned in the Edgar Cayce readings (the famous American psychic whose books have sold millions of copies), as someone who would one day bring an important message to the world.
