ON BEING DIFFERENT: DIVERSITY AND MULTICULTURALISM IN THE NORTH AMERICAN MAINSTREAM

McGraw-Hill Humanities/Social Sciences/Languages

A leading name in anthropology, Conrad Philip Kottak continues to define student learning in the general anthropology course.

Anthropology:Appreciating Human Diversity offers an up-to-date holistic introduction to general anthropology from the four-field perspective. Key themes of appreciating the experiences students bring to the classroom, appreciating human diversity, and appreciating the field of anthropology are showcased throughout the text. The program presents anthropology's core concepts and also demonstrates anthropology's relevance to the 21st-century world we inhabit. Revisions to the 17th edition of Anthropology: Appreciating Human Diversity were extensively informed by student data, collected anonymously by McGraw-Hill's adaptive learning system. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.

Cultural Diversity in the United States McGraw-Hill Education

Now in its 19th edition, Cultural Anthropology: Appreciating Cultural Diversity is an introduction to sociocultural anthropology, also covering linguistic and applied anthropology. While presenting cultural anthropology's core concepts and topics, the text also aims to demonstrate anthropology's relevance to the 21st-century world we inhabit. The subtitle of the text reflects its goal of instilling a sense of appreciation: (1) of cultural diversity, (2) of cultural anthropology as a field, and (3) of how an anthropological approach can build on, and help make sense of, the experience that students bring to the classroom.

Cultural Anthropology McGraw-Hill Education

Indonesia is home to diverse peoples who differ from one another in terms of physical appearance as well as social and cultural practices. The way such matters are understood is partly rooted in ideas developed by racial scientists working in the Netherlands Indies beginning in the late nineteenth century, who tried to develop systematic ways to define and identify distinctive races. Their work helped spread the idea that race had a scientific basis in anthropometry and craniology, and was central to people's identity, but their encounters in the archipelago also challenged their ideas about race. In this new monograph, Fenneke Sysling draws on published works and private papers to describe the way Dutch racial scientists tried to make sense of the human diversity in the Indonesian archipelago. The making of racial knowledge, it contends, cannot be explained solely in terms of

internal European intellectual developments. It was "on the ground" that ideas about race were made and unmade with a set of knowledge strategies that did not always combine well. Sysling describes how skulls were assembled through the colonial infrastructure, how measuring sessions were resisted, what role photography and plaster casting played in racial science and shows how these aspects of science in practice were entangled with the Dutch colonial Empire.

ANTHROPOLOGY: APPRECIATING HUMAN DIVERSITY LOOSE LEAF EDITION WITH CONNECT ACCESS CARD

McGraw-Hill Education

This concise, student-friendly, current introduction to general anthropology carefully balances coverage of core topics and contemporary changes in the field. Window on Humanity is a perfect match for general anthropology courses that use readings or ethnographies along with a main text.

DYNAMICS OF HUMAN DIVERSITY

Pacific Linguistics School of Culture History and Language College of

This lively text by leading medical anthropologist Elisa J. Sobo offers a unique, holistic approach to human diversity and rises to the challenge of truly integrating biology and culture. The inviting writing style and fascinating examples make important ideas from complexity theory and epigenetics accessible to students. In this second edition, the material has been updated to reflect changes in both the scientific and socio-cultural landscape, for example in relation to topics such as the microbiome and transgender. Readers learn to conceptualize human biology and culture concurrently--as an adaptive biocultural capacity that has helped to produce the rich range of human diversity seen today. With clearly structured topics, an extensive glossary and suggestions for further reading, this text makes a complex, interdisciplinary topic a joy to teach.

A Study Guide for Anthropology McGraw-Hill Education

Focused on the appreciation of anthropology, the new edition of Cultural Anthropology: Appreciating Cultural Diversity offers an up-to-date holistic introduction to cultural anthropology. Key themes of appreciating the experiences students bring to the classroom, appreciating cultural diversity, and appreciating the field of anthropology are showcased throughout the text. In this edition, Understanding Ourselves chapter openers and Through the Eyes of Others boxes show how anthropology helps us understand ourselves. New Appreciating Diversity boxes focus on the various forms of human biologic.

Dynamics of Human Biocultural Diversity Routledge

A recent National Academy of Sciences inductee, Conrad Phillip Kottak offers an up-to-date holistic introduction to general anthropology from the four-field perspective. Kottak emphasizes why anthropology should matter to students and how students can use anthropology to better understand themselves. "Bringing It All Together" essays found on the online learning center demonstrate the integrated and comparative nature of anthropology. New "Through the Eyes of Others" essays offer the perspectives of foreign students and recent graduates who present their own cultures of origin in contrast with contemporary American culture. Thought-provoking questions now begin each chapter to highlight key themes and spark discussions and critical thinking.

ANTHROPOLOGY

NUS Press

This text is intended for the sophomore level course in human variation/human biology taught in anthropology departments. It may also serve as a supplementary text in introductory physical anthropology courses. In addition to covering the standard topics for the course, it features contemporary topics in human biology such as the Human Genome Project, genetic engineering, the effects of stress, obesity and pollution.

The Challenge of Human Diversity --

Anthropology McGraw-Hill Education

Middleton's fair, uncluttered synthesis of a wide-ranging topic continues to offer inspiration for thinking about what it means to be different from and similar to others. Brief ethnographic excerpts are interwoven to demonstrate the hold that culture has on us. Such firsthand experiences, reported by anthropologists, reveal the challenging and sometimes humorous situations that can arise when we attempt to understand others and when they do the same with us. Heralded by *Anthropology Today*: Middleton, by making the sensory and intellectual challenge of culture shock so central to his pedagogic strategy, has found common ground that should unite all schools of cultural anthropology. The work brims with valuable insights that broaden possibilities to achieve rewarding human interaction, whether in our own neighborhood or across the globe. Arguably one of the best contemporary treatments of cultural diversity available, the latest edition includes expanded discussions of applied anthropology and ethics.

Anthropology McGraw-Hill Education

Cultural Diversity in the United States: A Critical Reader is an unprecedented collection of contemporary writings authored by some of anthropology's most notable scholars from across the discipline - on the central issues of cultural diversity in the United States. The contributors to this landmark critical reader rethink diversity, identity politics, and multiculturalism, and provide fundamental tools for the analysis and understanding of critical political issues in the United States today.

Anthropology McGraw-Hill Humanities, Social Sciences & World Languages

This lively text offers a unique, holistic approach to human diversity for undergraduate courses in fields including anthropology, medicine, human ecology, and general education. Leading medical anthropologist Elisa Sobo rises to the challenge of truly integrating biology and culture. Her inviting writing style and fascinating examples make important new ideas from complexity theory and epigenetics accessible to undergraduates from all disciplines, regardless of academic background. Students learn to conceptualize human biology and culture concurrently—as an adaptive biocultural capacity that has helped to produce the rich range of human diversity seen today. With clearly structured topics, an extensive glossary and suggestions for further reading, this text makes a complex, interdisciplinary topic a joy to teach.

MIRROR FOR HUMANITY

Anthropology Oxford University Press, USA

Race and Human Diversity is an introduction to the study of human diversity in both its biological and cultural dimensions. Robert L. Anemone examines the biological basis of human difference and how humans have biologically and culturally adapted to life in different environments. The book discusses the history of the race concept, evolutionary theory, human genetics, and the connections between racial classifications and racism. It invites students to question the existence of race as biology, but to recognize race as a social construction with significant implications for the lived experience of individuals and populations. This second edition has been thoroughly revised, with new material on human genetic diversity, developmental plasticity and epigenetics. There is additional coverage of the history of eugenics; race in US history, citizenship and migration; affirmative action; and white privilege and the burden of race. Fully accessible for undergraduate students with no prior knowledge of genetics or statistics, this is a key text for any student taking an introductory class on race or human diversity. Chapter 9 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.
