This book is one of the first to explore how Chinese companies are feeling the impulse of emerging business trends and seizing opportunities brought by technology innovation. It consists case studies of 7 Chinese companies: 3DMed, Wechat from Tencent, Shanghai GM, CP Group, Alibaba, AutoNavi, and ICBC. Each Chinese company has its unique perspectives and different ways to make transformation and business model adjustments. The book helps fill the gap between the global interest in “Innovate in China” and the limited availability of cases on innovations in the country. It is a valuable reference resource for readers in China and beyond wishing to address challenges in the context of growing digital technologies and overwhelming business trends.

OECD HEALTH POLICY STUDIES CANCER CARE ASSURING QUALITY TO IMPROVE SURVIVAL

Demos Medical Publishing

¿Es la salud un derecho humano fundamental? ¿Se está respetando ese derecho? ¿Hay personas que no pueden acceder a los medicamentos que necesitan? ¿Cuántocuesta fabricar un medicamento? ¿Por qué son los precios excesivos? ¿Cuánto cuesta realmente la investigación? ¿Por qué se conceden monopolios a las empresas a través de las patentes y la exclusividad de datos? ¿Es verdad que se gastamás en marketing y en beneficios que en investigación? ¿Tienen la misma causalos problemas de exceso y de acceso en relación con los medicamentos? ¿Se haconvertido el medicamento en un producto financiero? El actual modelo es eficiente para las empresas pero, ¿es eficiente para la sociedad? ¿Hay alternativas? Si la salud es un derecho humano fundamental, indispensable para el ejerciciode los demás derechos humanos, el acceso a los medicamentos es parte de ese derecho, y por lo tanto estamos obligados a contestar a estas incómodas preguntas, aunque solo sea porque una de cada tres personas en el mundo no tienen acceso a los medicamentos que necesitan, y en España, Portugal y otros países deUnión Europea, millones de personas no pudieron comprar en 2015 los medicamentos que les habían recetado sus médicos en la sanidad pública. El precio excesivo de los medicamentos (muy por encima del coste de fabricación y de I+D), además de suponer una barrera importante al acceso, provoca que la calidad de otras prestaciones se vea mermada y que se ponga en riesgo la estabilidad del sistema sanitario público. En la raíz del problema está un modelo que prima más la visión del medicamento como producto financiero que como derecho de las personas. El equilibrio está roto. Además, este mismo modelo genera también el consumo innecesario de medicamentos y contribuye a un número muy elevado de reacciones adversas que causan muertes e importantes gastos. Estas y otras cuestiones se analizan con rigor en Medicamentos: ¿derecho humano o negocio?, donde los autores contestan a algunas de estas preguntas y animan a abrir un debate que ayude a promover la estabilidad de los sistemas sanitarios públicos y el acceso de todas las personas a los medicamentos necesarios.

Cancer Control Opportunities in Low- and Middle-Income Countries ABC-CLIO

Drug repurposing is the development of existing drugs for new uses: given that 9 in 10 drugs that enter drug development are never marketed and therefore represent wasted effort, it is an attractive as well as inherently more efficient process. Three repurposed drugs can be brought to market for the same cost as one new chemical entity; and they can also be identified more quickly, an important benefit for patients whose diseases are progressing faster than therapeutic innovation. But repurposing also requires a fresh look at configuring pharmaceutical R&D, considering clinical, regulatory and patent issues much earlier than would otherwise be the case; a holistic gedanken experiment almost needs to be undertaken at the very start of any repurposing development. In addition to new ways of thinking, the discovery of repurposing opportunities can take advantage of artificial intelligence techniques to match the perfect new use for an existing drug. And while repurposing of medicines has been in the mind of every doctor since Hypocrates, modern clinical practice will simply have to adapt to new repurposing techniques in an age where the number of known diseases is increasing much faster than the healthcare dollars available.

ENCYCLOPEDIA OF PUBLIC HEALTH: PRINCIPLES, PEOPLE, AND PROGRAMS [2 VOLUMES]

OECD Publishing

"The signature undertaking of the Twenty-Second Edition was clarifying the QC practices necessary to perform the methods in this manual. Section in Part 1000 were rewritten, and detailed QC sections were added in Parts 2000 through 7000. These changes are a direct and necessary result of the mandate to stay abreast of regulatory requirements and a policy intended to clarify the QC steps considered to be an integral part of each test method. Additional QC steps were added to almost half of the sections."--Pref. p. iv.

ARZNEIVERORDNUNGS-REPORT 2017

OECD Publishing

This report describes the current situation with regard to universal health coverage and global quality of care, and outlines the steps governments, health services and their workers, together with citizens and patients need to urgently take.

The Colon Cancer Diet Royal Society of Chemistry

Katharina Kichko supports the first Personalized Medicine learnings as she provides an approach overview in general as well as reimbursement and regulatory policies in particular. In focus stays analysis of the current Personalized Medicine in the U.S. and Germany as well as its preconditions for a wider implementation in the medical practice. Results have shown that the U.S. – as early knower – have the most projects as well as personalized drugs and therapies, while Germany – as a follower – has a significant number of projects and personalized products and more to come in future.

Health System and Reform in Lebanon Lippincott Williams & Wilkins

“Aku pasti mengabdii!” Kalimat itulah yang selalu bergema dalam diri para penerima beasiswa LPDP. Kesempatan besar yang telah diberikan oleh pemerintah Indonesia tentu tak boleh disia-siakan. Dan, kontribusi pemikiran menjadi salah satu jalan pengabdian. Saat ini, Indonesia tengah berlari menuju posisi penting di kancah internasional. Misi besar itu akan diwujudkan dalam “Indonesia Emas 2045”. Melalui misi tersebut, dalam buku ini, para peraih beasiswa LPDP menuangkan gagasan besarnya dalam berbagai bidang. Melalui esai-esai kritis dan penuh inovasi segar inilah, mereka berusaha membangun Indonesia sebagai negara membanggakan bagi generasi anak cucu kita kelak. [Mizan, Bentang Pustaka, Motivasi, Inspirasi, Kisah Inspiratif, Semangat, Perjuangan, Negara, Indonesia]

China's Technology Innovators National Academies Press

This book provides an overview of the global pharmaceutical pricing policies. Medicines use is increasing globally with the increase in resistant microbes, emergence of new treatments, and because of awareness among consumers. This has resulted in increased drug expenditures globally. As the pharmaceutical market is expanding, a variety of pharmaceutical pricing strategies and policies have been employed by drug companies, state organizations and pharmaceutical pricing authorities.

The 340B Program Handbook Springer

Im seit 1985 jährlich als Buch erscheinenden Arzneiverordnungs-Report werden die Rezepte für die Patienten der gesetzlichen Krankenversicherung (GKV) mit Methoden der evidenzbasierten Medizin analysiert.Seit dieser Zeit bietet der Report eine unabhängige Informationsmöglichkeit über die verschiedenen Komponenten der Arzneimittelverordnung und trägt damit zur Transparenz des Arzneimittelmarkts, zur Bewertung von Arzneimitteln und zu einer sowohl zweckmäßigen und sicheren evidenzbasierten als auch wirtschaftlichen Arzneitherapie bei.

Ensuring Quality Cancer Care Through the Oncology Workforce OECD Publishing

Cancer Care: Assuring Quality to Improve Survival surveys the policy trends in cancer care over recent years and looks at survival rates to identify the why some countries are doing better than others.

Health at a Glance: Europe 2018 State of Health in the EU Cycle Doubleday

This report discusses the need for an integrated and cyclical approach to managing health technology in order to mitigate clinical and financial risks, and ensure acceptable value for money.

Immune Suppression and Tumor Growth National Academies Press

Do you or a loved one have a diagnosis of colon cancer? Did you know that changing your diet could lower your risk of dying of it even after you've been diagnosed? When you finish this book I

want you to be able to tell me, in one minute or less, how you should eat, exercise, and supplement to lower your risk of dying of colon cancer after you've been diagnosed with it. If you can do that, please tell me and everyone else in a book review and on my website. When I was diagnosed with colon cancer I went looking for information on what I could do and no one had the answers I wanted. I found the best answers available in the medical literature. It helps that I trained as a Naturopathic Doctor before my diagnosis. I know a fair amount about both natural and conventional alternatives. And I can read medicalese so you don't have to. It's terrible to be where we are. But we have choices, and this book is my way of giving us direction and hope.

Supportive Cancer Care Cornell University Press

Medicines are vital in improving patient health outcomes and pharmaceutical policy is a fundamental component of any health system. However, the global pharmaceutical policy is ever-evolving and data and quality ‘research-based information’ in this field are scarce. This book fills this gap and provides up-to-date empirical information and evidence-based synthesis. It focuses on pertinent key issues in global pharmaceutical policy including medicines safety, generic medicines, pharmaceutical supply chain, medicines financing, access and affordability of medicines, rational use of medicines, pharmacy health services research and access to vaccines and biological products. Featuring policy case studies from varied countries such as Mexico, Russia, China, Kyrgyzstan, and Pakistan, this book comprises a valuable and comprehensive resource for students, funders, policymakers, academics, and researchers interested in this field.

HEPATITIS B VIRUS IN HUMAN DISEASES

Springer Nature

Equivalence: Elizabeth L. Scott at Berkeley is the compelling story of one pioneering statistician's relentless twenty-year effort to promote the status of women in academe and science. Part biography and part microhistory, the book provides the context and background to understand Scott's masterfulness at using statistics to help solve societal problems. In addition to being one of the first researchers to work at the interface of astronomy and statistics and an early practitioner of statistics using high-speed computers, Scott worked on an impressively broad range of questions in science, from whether cloud seeding actually works to whether ozone depletion causes skin cancer. Later in her career, Scott became swept up in the academic women's movement. She used her well-developed scientific research skills together with the advocacy skills she had honed, in such activities as raising funds for Martin Luther King Jr. and keeping Free Speech Movement students out of jail, toward policy making that would improve the condition of the academic workforce for women. The book invites the reader into Scott's universe, a window of inspiration made possible by the fact that she saved and dated every piece of paper that came across her desk.

ISSUES AT STAKE AND MATTERS OF CONCERN

Springer

The Price of Global Health is a unique book that describes the pharmaceutical pricing process and its business, economic and social challenges. Global drug pricing is one of the most hotly debated yet least understood aspects of the pharmaceutical industry. How should drug prices be set and what does it mean for patients? Why do governments increasingly get involved, and what is its impact on the global competitive environment? How can a life-saving industry have a poorer image than gun and tobacco industries, whose products are associated with death? The pharmaceutical industry is under unprecedented pressure due to a combination of declining R&D productivity, payer/provider demands for better value and public pressures to show pricing restraint. Rapidly increasing cost of healthcare, shifts from fee-for-service to value-based reimbursement, public pressure on drug pricing and an increasingly vocal medical community have empowered public and private payers worldwide to be more demanding on evidence of value for the prescription drugs that are brought to market. Pharmaceutical companies have often failed to deliver evidence of patient value, as development decision-making is overly focused on speed to FDA approval rather than speed to commercial success by effectively addressing the many “Access Journey” obstacles that typify today's much changed pharmaceutical environment. This 3rd edition is significantly expanded with ten new chapters and revised and updated throughout to reflect today's environment. The contents are reorganized to directly address critical pricing and patient access issues. Ed Schoonveld explains how pharmaceutical prices are determined in a complex global payer environment and what factors influence the process. His insights will help a wide

range of audiences from healthcare industry professionals to policy makers, consumers,

pharmaceutical company leaders and access and pricing professionals to gain a better

understanding of this highly complex and emotionally charged field.
