Noted astrologer and spiritual teacher Barbara Hand Clow channels the voice of Satya, a Pleiadian goddess. Satya describes the huge cosmic drama taking place simultaneously in nine dimensions, with Earth as the chosen theater. The Pleiadians are a group of enlightened beings who believe that the end of the Mayan Calendar will signal a critical leap in human evolution; the Pleiadians will be there to guide us for that leap. This shift is the coming Age of Light, and the entry of our solar system into the Photon Band and the Age of Aquarius.

Finding Your Way to Renewed Hope and Happiness When Life and Love Take Unexpected Turns Simon and Schuster

Introduction by the Pleiadians We call ourselves Pleiadians. And by way of an introduction, let us say that we are journeyers through time and multiple dimensions. We are a curious group intent upon exploring the nooks and crannies of existence, traipsing over cosmic hill and dale in search of answers to the majestic mysteries of life. All of existence is a vast web of energy, and there are seemingly endless and dazzling directions, connections, events, and entertaining diversions to explore. However, at present we are most earnestly focused on a specific place and time - Earth from the year 1987 through 2012 and after... It appears that during this period this location safeguards the probability of a triumphant achievement where, for a short while, some of the majestic mysteries of life are realized and revealed. We are here to observe and participate in the greatness of this event. Our perspectives are multidimensional in range and scope, for we are a wondrous collective of conscious energies who are intentionally expanding our beliefs about the

nature of existence throughout many points in time. The heavens are filled with life, and in our search for knowledge and greater understanding of who we are, our journey has led us to you. Earth is currently experiencing a tumultuous transformation of consciousness, the likes of which you have no recorded historical precedent for. Yet, within the corridors of human cellular memory, many images stir with a hint of strange familiarity. You are deeply immersed in a time of critical change; humanity is poised at the threshold of a new understanding of cosmic power. Naturally, many of us wonder what you will do with this knowledge. In other epochs of time, the nature of this power has been misunderstood and subsequently misused, inevitably leading the way to your self-destruction. Nevertheless, the immense cycles of living and seasons of learning continue to patiently offer the same lessons, for while life may appear to be destroyed, consciousness is ever enduring and only changed in form. Humanity is rapidly approaching the edge of the great cosmic cliffs of consciousness. What you do now, the choices you make, will determine a course of experience more complex and astounding than you can currently imagine. The dawning of a new revolution in consciousness is at hand. You cannot escape the necessity to manage this power: now or ever. In light of our adventurous spirit, we are here to share our perspectives on your rapidly changing lives, and to offer our support, as well as a few timely suggestions on managing the massively accelerated energies that silently stir your planet. Focusing on the term empowerment this book examines the various meanings given to the concept of empowerment and the many ways power can be expressed - in personal relationships and in wider social interactions.

Train Your Mind for Peace and Purpose Every Day Red Wheel/Weiser

Inside today's data-driven personalized medicine, and the time, effort, and information required from patients to make it a reality Medicine has been personal long before the concept of "personalized medicine" became popular. Health professionals have always taken into consideration the individual characteristics of their patients when diagnosing, and treating them. Patients have cared for themselves and for each other, contributed to medical research, and advocated for new treatments. Given this history, why has the notion of personalized medicine gained so much traction at the beginning of the new millennium? Personalized Medicine investigates the recent movement for patients' involvement in how they are treated, diagnosed, and medicated; a movement that accompanies the increasingly popular idea that people should be proactive, well-informed participants in their own healthcare. While it is often the case that participatory practices in medicine are celebrated as instances of patient empowerment or, alternatively, are dismissed as cases of patient exploitation, Barbara Prainsack challenges these views to illustrate how personalized medicine can give rise to a technology-focused individualism, yet also present new opportunities to strengthen solidarity. Facing the future, this book reveals how medicine informed by digital, quantified, and computable information is already changing the personalization movement, providing a contemporary twist on how medical symptoms or ailments are shared and discussed in society. Bringing together empirical work and critical scholarship from medicine, public health, data

governance, bioethics, and digital sociology, *Personalized Medicine* analyzes the challenges of personalization driven by patient work and data. This compelling volume proposes an understanding that uses novel technological practices to foreground the needs and interests of patients, instead of being ruled by them.

The Living Lessons of Pleiadians New World Library

This textbook for courses on women and politics thematically integrates two profound historical developments focusing on women's political participation in contemporary public life in the United States. The second wave of women's rights activism has now spanned a half century producing a revolution in women's presence and influence in the public realm of American life. Over the course of this same era, however, a second phenomenon of rising economic inequality has also dramatically changed the American landscape. Burrell's text uniquely examines the effect of the age of inequality on women's advancement toward economic and political equality and in turn how policy initiatives of the women's movement have addressed inequality issues. Students will come to better understand what's at stake in the politics and policy issues from the women's rights movement to the "war on women" debate. Explaining a diverse set of issues and viewpoints, Burrell brings a fresh approach to the engagement of women in the public realm over the past half century. Framing this activism in the great economic divide of the same time period provides a thought-provoking, challenging, and broad thematic approach to this history. The text chronicles the many diverse types of actions women have taken in the contemporary era to achieve gender equity, empowerment, and a greater public voice. Women—both liberal feminist and conservative— have run for and been elected to positions of leadership at all levels of government. Women have formed organizations to lobby for equity in employment and education, in the military and to promote reproductive rights. They have engaged in unconventional political activities marching against and protesting the actions and policies of economic corporations and governmental institutions. Women with few economic resources have joined together to challenge local power structures. In addition to efforts to improve the lives and status of women in the United States, nongovernmental organizations (NGOs) have formed to promote global women's rights. Readers of this text will gain a great appreciation of the multiple political voices of American women and the challenges to continued unequal voices.

While living in a Buddhist monastery, she experiences a deepening of faith in the eternal harmony of creation. Since the 2010 Deepwater Horizon blowout and oil spill, efforts to improve safety in the offshore oil industry have resulted in the adoption of new technological controls, increased promotion of safety

culture, and the adoption of new data collection systems to improve both safety and performance. As an essential element of a positive safety culture, operators and regulators are increasingly integrating strategies that empower workers to participate in process safety decisions that reduce hazards and improve safety. While the human factors of personal safety have been widely studied and widely adopted in many high-risk industries, process safety—the application of engineering, design, and operative practices to address major hazard concerns—is less well understood from a human factors perspective, particularly in the offshore oil industry. The National Academies of Sciences, Engineering, and Medicine organized a workshop in January 2018 to explore best practices and lessons learned from other high-risk, high-reliability industries for the benefit of the research community and of citizens, industry practitioners, decision makers, and officials addressing safety in the offshore oil industry. This publication summarizes the presentations and discussions from the workshop.

A Journey of Connection Through the Heart Llewellyn Worldwide

With compassion and compelling insight, the Pleiadians, those system-busting time-travelers from the future, take us on a journey through the uncharted lands of *The Book of Earth*, which comprises all human experience. While “our world goes belly-up in these most absurd of times,” they offer us “tools for survival.” During the crucial period between 1987 and 2012—a nanosecond in the annals of existence where secrets and solutions are stored—we have the unique opportunity to move from the deepest of density to the highest of frequencies—where we shift from linear to multi-dimensional living. To make this transition, we must face not only the limitations of our 3-D world with its electronic manipulation and mind control, we must embrace our own wounds, and those of our ancestors and our leaders. To heal ourselves, to raise our frequency from one of despair and fear to one of great inspiration and love, the Pleiadians urge us to rethink and reevaluate our lives: “You shall change, you will change, you must change, because this is the season of change.”

Pleiadian Tales and Lessons in Living Routledge

Jay Shetty, social media superstar and host of the #1 podcast *On Purpose*, distills the timeless wisdom he learned as a monk into practical steps anyone can take every day to live a less anxious, more meaningful life. When you think like a monk, you’ll understand: -How to overcome negativity - How to stop overthinking -Why comparison kills love -How to use your fear -Why you can’t find happiness by looking for it -How to learn from everyone you meet -Why you are not your thoughts - How to find your purpose -Why kindness is crucial to success -And much more... Shetty grew up in a family where you could become one of three things—a doctor, a lawyer, or a failure. His family was convinced he had chosen option three: instead of attending his college graduation ceremony, he headed to India to become a monk, to meditate every day for four to eight hours, and devote his life to helping others. After three years, one of his teachers told him that he would have more impact on the world if he left the monk’s path to share his experience and wisdom with others. Heavily in debt, and with no recognizable skills on his résumé, he moved back home in north London with his parents. Shetty reconnected with old school friends—many working for some of the world’s largest corporations—who were experiencing tremendous stress, pressure, and unhappiness, and they invited Shetty to coach them on well-being, purpose, and mindfulness. Since then, Shetty has become one of the world’s most popular influencers. In 2017, he was named in the *Forbes* magazine

30-under-30 for being a game-changer in the world of media. In 2018, he had the #1 video on Facebook with over 360 million views. His social media following totals over 38 million, he has produced over 400 viral videos which have amassed more than 8 billion views, and his podcast, *On Purpose*, is consistently ranked the world’s #1 Health and Wellness podcast. In this inspiring, empowering book, Shetty draws on his time as a monk to show us how we can clear the roadblocks to our potential and power. Combining ancient wisdom and his own rich experiences in the ashram, *Think Like a Monk* reveals how to overcome negative thoughts and habits, and access the calm and purpose that lie within all of us. He transforms abstract lessons into advice and exercises we can all apply to reduce stress, improve relationships, and give the gifts we find in ourselves to the world. Shetty proves that everyone can—and should—think like a monk.

KNOW MY NAME

Routledge

Introduction by the Pleiadians Greetings, dear friends. It is our distinct pleasure to partake of your reality once again, and to journey with you for a while on the road to adventure and self-discovery. "What journey?" you may rightly ask, for it may seem that you are traveling in circles, and the idea of a great adventure in your life is a far cry and distant dream from the daily dogma and relentless burdens of living you face. Nonetheless, allow us to accompany you for a while, as companions offering to entertain you and enliven your step as we point out the sites and symbols along the way. We are storytellers extraordinaire, or so we've been told, and we too have traveled in seemingly endless circles, so we have much in common. Our destination is the same as yours, for we are you in another version and form of reality, as deeply entrenched and entrapped as you believe yourselves to be. What sort of paradox is this? And who indeed are we, claiming kin to you and yours? And why do we desire to journey with you? Well, these things you must decide for yourselves. We relate great tales and relish a resplendently irreverent good humor, all intended to figure things out, in all due respect, as best we can. We strive to make sense of existence, gathering multidimensional pieces of a puzzle into a form and shape that encompass untold and unrecognized societies. "How can pieces of a puzzle be multidimensional and what is multidimensional anyway?" We can hear your questions now, and we guarantee that you will have many more before the journey is complete. So we ask, may we join you and enter your reality by invitation? For it is through your beckoning and with your permission that we spring forth as a part of your life. Feel into the depths of your being before you

respond. Seek inside for an answer, for to invite us into your reality as friends and companions will with certainty confound and change your lives, and perhaps some of you are quite content with where you are. Perhaps you are not really interested in multi-dimensional realities and perceive these ideas as vague notions and tidbits of unfounded fiction, fracturing and fragmenting a logic you paid so dearly to achieve. If that is the case, then you may do well to stop short now, and put our tale aside. Perhaps in another time and place, we will meet again. If, however, we have piqued your curiosity and you feel compelled to continue, so be it. It is best to start with the truth. As a matter of fact-if there is such a thing-it is best to end with the truth as well. "And how about the middle and all along the way?" you may ask. Well, the truth is essential throughout the journey; however, the ongoing paradox invariably involves your point of view. Remember that. Now we are travelers through time, which is the best way to describe us. We call ourselves Pleiadians, though we answer to many names and characters. We are as real as you believe yourselves to be. When we encounter you, we meet ourselves located on a slice of time, poised, as you believe, in a solid physical 3-D world. You fascinate us, and perhaps by the end of our travels and tales, you will be fascinated with yourselves as well. For now the task of telling is at hand, and so the tale begins.

"A struggle between two memories" is how Palestinian poet Mahmud Darwish describes the conflict between Palestinians and Israelis. Within this struggle, the meanings of land and home have been challenged and questioned, so that even heaps of stones become points of contention. Are they proof of ancient Hebrew settlement, or rubble from a bulldozed Palestinian village? The memory of these stones, and of the land itself, is nurtured and maintained in Palestinian writing and other modes of expression, which are used to confront and counter Israeli images and rhetoric. This struggle provides a rich vein of thought about the nature of human experience of place and the political uses to which these experiences are put. In this book, Barbara McKean Parmenter explores the roots of Western and Zionist images of Palestine, then draws upon the work of Darwish, Ghassan
