Woody Ornamental And
Landscape Plant
Woody
ornamental plants are the
living, structural
components of a well-
landscaped yard. They are
long-lived perennials with
stems and branches that
increase in girth and
height each growing
season. Unlike

herbaceous plants that
die back to the ground in
winter, woody
ornamentals remain
aboveground year-round.
In the landscape, woody
ornamentals serve many
essential functions.¹¹
Woody Ornamentals | NC
State Extension
Publications
Try to find
roots with a transitional
area, from living to dead.
Look for white or cream
colored roots that
transition to brown or
black. Some woody
ornamental plants have
naturally dark roots. Using
your fingernail, peel away

the outer layer of the
roots to expose root
tissue and to check for
color. Do not add water to
the bag.

Improper transplanting is the digging and subsequent repositioning of a woody ornamental at the wrong time of the year. Woody ornamentals should only be dug before leafing-out in Spring or following Autumn leaf drop.Woody Plants - Landscape

DesignsProduction and landscape establishment of woody ornamentals generally follows the same cultural practices of 50 years ago. Concerns for non-point pollution, water conservation and economic viability will require the nursery industry to become more knowledgeable and more efficient. The purpose of this project is investigate the effects of nursery cultural practices on plantsAPPLYING KNOWLEDGE OF WOODY ORNAMENTAL PLANT PHYSIOLOGY TO ...Woody

plants are plants that have hard stems (thus the term, "woody") and that have buds that survive above ground in winter. The best-known examples are trees and shrubs (bushes). These are commonly broken down further into the deciduous and evergreen categories.Woody Plants - Botanical Term & ExamplesThe plant prefers full sun to part shade and doesn't mind clay soils, though it does perform best in moist, well-drained dirt. This plant can grow to be very

large, but many gardeners like to keep it pruned to a smaller shrub size. Extract of the plant's leaves, twigs, and bark is used in the cosmetics industry as an astringent. Best 15 Woody Shrubs for Fall Color: Make Your Autumn ... Everett E. Janne, Extension Landscape Horticulturist (deceased) Attractive trees and shrubs are important components in all well-landscaped properties. Planned maintenance and care are essential for keeping them healthy and

vigorous. An adequate fertilization program is an important requirement of any good woody-plant maintenance program. Fertilizing Woody Ornamentals | Earth-Kind® Landscaping The combined symposia will reflect the many exciting achievements in landscape, urban horticultural science, and woody ornamental plants through a strong academic-industry research partnership.
