An essay on American engraved powder horns and a résumé of the Gilbert collection precede the

catalogue, which consists of detailed descriptions of the individual pieces and notes of genealogical or historical interest. Each horn in the collection is illustrated by a colotype reproduction and, with one exception (an undecorated horn), by a line drawing of the engraved area. An indexed checklist of the collections records the pertinent details of each powder horn.

Evan Marshall and Ed Sanow rocked the firearms world with the release of Handgun Stopping Power and Street Stoppers. Both books predicted the effectiveness of all types of ammunition by studying the results of real-life shootings rather than relying on laboratory tests that ignored the dynamics of an actual gunfight. This third book in the series provides the very latest street results of all the major handgun calibers, from .22 LR to .45 ACP, as well as popular rifle and shotgun loads. It also contains chapters on short-barrel ballistics, the emergence of the hot new .357 SIG caliber, the continued success of the .40 S&W, the development of the latest exotic ammo, the effectiveness of black powder firearms

and a brand-new ammo test protocol based on the results of the many gunfights of U.S. Border Patrol officers.
