Balancing Societal and Individual Benefits and Risks of Prescription Opioid Use Routledge  
Since the publication of the Coleman report in the US many decades ago, it has been widely accepted that the evidence that schools are marginal in the grand scheme of academic achievement

is conclusive. Despite this, educational policy across the world remains focused almost exclusively on schools. With contributions from such figures as Jeanne Brooks-Gunn, Doris Entwistle and Richard Arum this book is an important contribution to a debate that has implications across the board in social sciences and policy-making. It will be required reading for students and academics within sociology, economics and education and should also find a place on the bookshelves of education policy-makers.

## THE CROSSING

Springer

This book takes a fresh look at programs for advanced studies for high school students in the United States, with a particular focus on the Advanced Placement and the International Baccalaureate programs, and asks how advanced studies can be significantly improved in general. It also examines two of the core issues surrounding these programs: they can have a profound impact on other components of the education system and participation in the programs has become key to admission at selective institutions of higher education. By looking at what could enhance the quality of high school advanced study programs as well as what precedes and comes after these programs, this report provides teachers, parents, curriculum developers, administrators, college science and mathematics faculty, and the educational research community with a detailed assessment that can be used to guide change within advanced study programs.

The critically acclaimed, award-winning, modern classic *Speak* is now a stunning graphic novel.

"Speak up for yourself—we want to know what you have to say." From the first moment of her freshman year at Merryweather High, Melinda knows this is a big fat lie, part of the nonsense of high school. She is friendless—an outcast—because she busted an end-of-summer party by calling the cops, so now nobody will talk to her, let alone listen to her. Through her work on an art project, she is finally able to face what really happened that night: She was raped by an upperclassman, a guy who still attends Merryweather and is still a threat to her. With powerful illustrations by Emily Carroll, Laurie Halse Anderson's *Speak: The Graphic Novel* comes alive for new audiences and fans of the classic novel. This title has Common Core connections.

**Improving Advanced Study of Mathematics and Science in U.S. High Schools** The Princeton Review

The idea for this volume arose out of a need for a treatment of the interplay between language and ethnonationalism within both formal and nonformal educational settings. In no way intended to be exhaustive in scope, the contents give the reader a critical overview of issues related to language, cultural identity formation, and ethnonationalism. The chapters within this work deal with the effects of different language groups with differing amounts of power within society coming into contact with one another, and provide insight into how language is both utilized by and affected by processes such as colonialism, post-colonialism, acculturation, and ethnonationalism. Language is central to culture—indeed houses cultural understandings and allows generational transfer of key aspects of a group's heritage.

#1 NEW YORK TIMES BESTSELLER • “The story of modern medicine and bioethics—and, indeed, race relations—is refracted beautifully, and movingly.”—Entertainment Weekly NOW A MAJOR MOTION PICTURE FROM HBO® STARRING OPRAH WINFREY AND ROSE BYRNE • ONE OF THE “MOST INFLUENTIAL” (CNN), “DEFINING” (LITHUB), AND “BEST” (THE PHILADELPHIA INQUIRER) BOOKS OF THE DECADE • ONE OF ESSENCE’S 50 MOST IMPACTFUL BLACK BOOKS OF THE PAST 50 YEARS • WINNER OF THE CHICAGO TRIBUNE HEARTLAND PRIZE FOR NONFICTION NAMED ONE OF THE BEST

BOOKS OF THE YEAR BY The New York Times Book Review • Entertainment Weekly • O: The Oprah Magazine • NPR • Financial Times • New York • Independent (U.K.) • Times (U.K.) • Publishers Weekly • Library Journal • Kirkus Reviews • Booklist • Globe and Mail Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

U.S. History Farrar, Straus and Giroux (BYR)

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

Comparative Sociology of Examinations Routledge

Rethinking the SAT is a unique presentation of the latest thoughts and research findings of key individuals in the world of college admissions, including the president of the largest public university system in the U.S., as well as the presidents of the two companies that sponsor college admissions tests in the U.S. The contributors address not only the pros and cons of the SAT itself, but the broader question of who should go to college in the twenty-first century.

*Alternative Assessments With Gifted and Talented Students* provides a concise and thorough introduction to methods for identifying gifted students in the school setting. Including overviews of assessment tools and alternative methods of assessment, as well as pertinent discussions concerning the need to identify gifted and talented students, this book combines research and experience from top scholars in the field of gifted education in a convenient guide for teachers, administrators, and gifted education program directors. Topics covered include the need for nonverbal testing with traditionally unidentified students; the identification of students from minority populations; the value of using traditional assessments with students; the role of creativity tools as a measure of giftedness; and the use of portfolios, products, and performance-based assessment to document learning; among others. This handy guide to assessing and identifying gifted students is a necessity for anyone serving and working with this population. A service publication of the National Association for Gifted Children (Washington, DC) This designation indicates that this book has been jointly developed with NAGC and that this book passes the highest standards of scholarship, research, and practice.

SHORTLISTED FOR THE 1999 BOOKER PRIZE Uma, the plain, spinster daughter of a close-knit Indian family, is trapped at home, smothered by her overbearing parents and their traditions, unlike her ambitious younger sister Aruna, who brings off a 'good' marriage, and brother Arun, the disappointing son and heir who is studying in America. Across the world in Massachusetts, life with the Patton family is bewildering for Arun in the alien culture of freedom, freezers and paradoxically self-denying self-indulgence.
