Cliffs Notes

THINGS FALL APART tells two overlapping, intertwining stories, both of which center around Okonkwo, a “strong man” of an Ibo village in Nigeria. The first of these stories traces Okonkwo's fall from grace with the tribal world in which he lives, and in its classical purity of line and economical beauty it provides us with a powerful fable about the

immemorial conflict between the individual and society. The second story, which is as modern as the first is ancient, and which elevates the book to a tragic plane, concerns the clash of cultures and the destruction of Okonkwo's world through the arrival of aggressive, proselytizing European missionaries. These twin dramas are perfectly harmonized, and they are modulated by an awareness capable of encompassing at once the life of nature, human history, and the mysterious compulsions of the soul. THINGS FALL APART is the most illuminating and permanent monument we have to the modern African experience as seen from within.

Random House Digital, Inc.
This book takes a fresh look at programs
for advanced studies for high school
students in the United States, with a
particular focus on the Advanced
Placement and the International
Baccalaureate programs, and asks how

advanced studies can be significantly
improved in general. It also examines
two of the core issues surrounding these
programs: they can have a profound
impact on other components of the
education system and participation in
the programs has become key to
admission at selective institutions of
higher education. By looking at what
could enhance the quality of high school
advanced study programs as well as
what precedes and comes after these
programs, this report provides teachers,
parents, curriculum developers,
administrators, college science and
mathematics faculty, and the
educational research community with a
detailed assessment that can be used to
guide change within advanced study
programs.
