 Lynn and Vanhanen argue that a significant part of the gap between rich and poor countries is due to differences in national intelligence (national IQs). Based on an extensive survey of national IQ tests, the results of their study challenge the previous theories of economic development and provide a new basis to evaluate the prospects of economic development throughout the world.
 Recueil des travaux de la Faculté des lettres et des sciences de Niš Xist Publishing
 Contains new ways to comprehend, evaluate, and motivate children by utilizing the seven essential virtues--conscience, empathy, self-control, respect, tolerance, kindness, and fairness--that define moral intelligence.

 How Twins Learn to Talk Springer

Two dozen brief essays by the foremost experts in the field are presented in this volume. Each researcher comments on the nature of intelligence, its measurement, and the future of research in the field, bringing his or her own perspective to bear on the issues. Truly diverse viewpoints are represented: cognitive psychology, developmental psychology, psychometrics, artificial intelligence, cross-cultural psychology, educational psychology, and differential psychology. An introduction that sets an historical and philosophical context, and two essays that interrelate the contributions, complete the volume.

REVIIJA ZA PSIHLOGIJU

Harper Collins
 This collective monograph is the first data-oriented, empirical in-depth study of the system of clitics on Bosnian, Croatian and Serbian. It fills the gap between the theoretical and normative literature by including solid data on variation found in dialects and spoken language and obtained from massive Web Corpora and speakers' acceptability judgements. The authors investigate three primary sources of variation: inventory, placement and morphonological processes. A separate part of the book is dedicated to the phenomenon of clitic climbing, the major challenge for any syntactic theory. The theory of complexity serves as the explanation for the very diverse constraints on clitic climbing established in the empirical studies. It allows to construct a series of hierarchies where the factors relevant for predicting clitic climbing interact with each other. Thus, the study pushes our understanding of clitics away from fine-grained descriptions and syntactic generalisations towards a probabilistic modelling of syntax.

assessment, cross-battery assessment of nonverbal cognitive ability, and psychological and physiological influences on assessment. The book discusses nonverbal assessment of cognition and intelligence as well as related domains, such as academic skills, neurocognitive functioning, personality, and behavior issues. Guidelines for using common nonverbal assessment tools and strategies feature the most up-to-date information on administration and scoring, psychometric properties, and strengths and limitations. Best practices for testing diverse children and adults and using reliable, valid, and fair assessment instruments are emphasized throughout the book. Featured instruments in the Handbook include: The Universal Nonverbal Intelligence Test, Second Edition (UNIT2). The newest version of the Leiter International Performance Scale (Leiter-3). The Wechsler Nonverbal Scale of Ability (WNV). The Comprehensive Test of Nonverbal Intelligence, Second Edition (CTONI-2). The Test of Nonverbal Intelligence. The General Ability Measure for Adults (GAMA). The Second Edition of the Handbook of Nonverbal Assessment is a must-have resource for researchers and graduate students in school and clinical child psychology, speech and language pathology, educational technology, social work, and related disciplines as well as clinicians, professionals, and in-service educators of diverse students.

A gripping read of romance, intrigue and human emotion. Anna Karenina has been called the world's greatest novel. Set in 19th century Russia, Anna seeks to escape a loveless marriage for a passionate romance. This Xist Classics edition has been professionally formatted for e-readers with a linked table of contents. This eBook also contains a bonus book club leadership guide and discussion questions. We hope you'll share this book with your friends, neighbors and colleagues and can't wait to hear what you have to say about it. Xist Publishing is a digital-first publisher. Xist Publishing creates books for the touchscreen generation and is dedicated to helping everyone develop a lifetime love of reading, no matter what form it takes

Savremena škola IPI Beograd

This challenging book is essential reading for teachers, teacher-educators, policymakers, and all those involved in the assessment of pupils and students. Its publication is motivated by the contributors' concern at the accelerating return to formal assessment procedures in National Tests and examinations, and at the downgrading over recent years of assessments made by teachers. The contributors believe that formal assessment is the reverse of what is needed for the valid assessment of progress in abilities, such as solving problems, handling information, and being adaptable, interactive and reflective.

Naše teme

Studies show that emotional intelligence -- the social and emotional skills that make up what we call character -- is more important to your child's success than the cognitive intelligence measured by IQ. And unlike IQ, emotional intelligence can be developed in kids at all stages. Filled with games, checklists and practical parenting techniques, How to Raise a Child with a High EQ will help your child to cope with -- and overcome -- the emotional stress of modern times and the normal problems of growing up.
