MANDARIN LESSONS IN LIFE, LOVE, AND LANGUAGE

Bloomsbury Publishing USA

These days, development inspires scant trust in the West. For critics who condemn centralized efforts to plan African societies as latter day imperialism, such plans too closely reflect their roots in colonial rule and neoliberal economics. But proponents of this pessimistic view often ignore how significant this concept has become for Africans themselves. In *Bewitching Development*, James Howard Smith presents a close ethnographic account of how people in the Taita Hills of Kenya have appropriated and made sense of development thought and practice, focusing on the complex ways that development connects with changing understandings of witchcraft. Similar to magic, development's promise of a better world elicits both hope and suspicion from Wataita. Smith shows that the unforeseen changes wrought by development—greater wealth for some, dashed hopes for many more—foster moral debates that Taita people express in occult terms. By carefully chronicling the beliefs and actions of this diverse community—from frustrated youths to nostalgic seniors, duplicitous preachers to thought-provoking witch doctors—*Bewitching Development* vividly depicts the social life of formerly foreign ideas and practices in postcolonial Africa.

Witchcraft and the Reinvention of Development in Neoliberal Kenya Elements of Ocean Engineering

Deborah Fallows has spent much of her life learning languages and traveling around the world. But nothing prepared her for the surprises of learning Mandarin, China's most common language, or the intensity of living in Shanghai and Beijing. Over time, she realized that her struggles and triumphs in studying the language of her adopted home provided small clues to deciphering the behavior and habits of its people, and its culture's conundrums. As her skill with Mandarin increased, bits of the language—a word, a phrase, an oddity of grammar—became windows into understanding romance, humor, protocol, relationships, and the overflowing humanity of modern China. Fallows learned, for example, that the abrupt, blunt way of speaking that Chinese people sometimes use isn't rudeness, but is, in fact, a way to acknowledge and honor the closeness between two friends. She learned that English speakers' trouble with hearing or saying tones—the variations in inflection that can change a word's meaning—is matched by Chinese speakers' inability not to hear tones, or to even take a guess at understanding what might have been meant when foreigners misuse them. In sharing what she discovered about Mandarin, and how those discoveries helped her understand a culture that had at first seemed impenetrable, Deborah Fallows's *Dreaming in Chinese* opens up China to Westerners more completely, perhaps, than it has ever been before.
