M. Morris Mano ( 2nd ...COMP541 Digital Logic and Computer Design (4). Prerequisite, COMP 411. This course is an introduction to digital logic as well as the structure and electronic design of modern processors. Students will implement a working computer during the laboratory sessions.Syllabus | Comp 541: Digital Logic and Computer DesignSince the bulk of a digital computer is simply an interconnected network of logic gates, the overall

cost of building a computer correlates strongly with the price per logic gate. In the 1930s, the earliest digital logic systems were constructed from telephone relays because these were inexpensive and relatively reliable. Digital Design and Computer Architecture takes a unique and modern approach to digital design. Beginning with digital logic gates and progressing to the design of combinational and sequential circuits, Harris and Harris use

these fundamental building blocks as the basis for what follows: the design of an actual MIPS processor.
