Understanding Canadian Public Administration offers excellent coverage of all the important and significant areas of public administration. While still providing a background of the theory and practice of public administration in Canada, the new fourth edition has been updated to reflect political changes in recent years. New topics - such as the financial crisis, the proroguing crisis of 2008/2009, Aboriginal Self-Government, and the Public Service Renewal Action Plan- have been added. Content on departmental organizations, agents of Parliament, political staff, and Human Resources Management have also been updated. In discussing these new topics, as well as information from the previous edition, Understanding Canadian Public Administration

remains an easily accessible introductory text that is neither encyclopaedic nor esoteric. It provides you with an overview of essential theoretical issues in the field and then uses that theoretical grounding to examine the actual practice of public administration. The text compares the roles of the private and public sectors and examines the impact that the latter has had on the former. From a practical approach, it analyzes how public policy is actually set within the context of the Canadian federal state.

REJECTING THE COLONIAL POLITICS OF RECOGNITION

University of Toronto Press

A gargantuan, mind-altering comedy about the Pursuit of Happiness in America Set in an addicts' halfway house and a tennis academy, and featuring the most endearingly screwed-up family to come along in recent fiction, *Infinite Jest* explores essential questions about what entertainment is and why it has come to so dominate our lives; about how our desire for entertainment affects our need to connect with other people; and about what the pleasures we choose say about who we are. Equal parts philosophical quest and screwball comedy, *Infinite Jest* bends every rule of fiction without sacrificing for a moment its own entertainment value. It is an exuberant, uniquely American exploration of the passions that make us human - and one of those rare books that renew the idea of what a novel can do. "The next step in fiction...Edgy, accurate, and darkly witty...Think Beckett, think Pynchon, think Gaddis. Think." --Sven Birkerts, *The Atlantic*

Micropolitics and Canadian Business explores the internal structure of industry politics in contemporary Canada. This "micropolitics" approach offers a revealing set of conceptual tools and models that illuminate the politics of everyday business at the industry, firm, and policy issue levels. It builds wider contexts in which the concrete particulars of business-government relations can be explored and understood in a systematic fashion. The approach developed is a comparative one. The book examines three industries—paper, steel, and airlines—carefully chosen to represent a revealing cross-section of a vast economic field covering the primary (resource), secondary (manufacturing), and tertiary (service) sectors of the economy. In addition, one industry (pulp and paper) is primarily export-oriented, another (steel) focuses mainly on domestic sales, and the third (air transport) is strongly grounded in both. The book applies to each a common set of questions and applies a similar set of methods. Separate chapters on each industry begin with a brief review of current industry concerns, followed by a historical and structural survey of that industry. Each chapter continues with studies of two leading firms, highlighting their internal politics and their strategic orientations. Since firms are the building blocks of industry, they tell us much about the larger structures of political power. Finally, each chapter examines two significant public policy controversies whose scope extends beyond core business boundaries. *Micropolitics and Canadian Business* specifically analyzes three industries; however, the approach used may be applied to a much wider universe of companies and sectors. Throughout, this book furthers our understanding of the complex contexts of business politics. As such, it will be of interest to both students and practitioners of business and government relations.

Journalism in Crisis addresses the concerns of scholars, activists, and journalists committed to Canadian journalism as a democratic institution and as a set of democratic practices. The authors look within Canada and abroad for solutions for balancing the Canadian media ecology. Public policies have been central to the creation and shaping of Canada's media system and, rather than wait for new technologies or economic models, the contributors offer concrete recommendations for how public policies can foster journalism that can support democratic life in twenty-first century Canada. Their work, which includes new theoretical perspectives and valuable discussions of journalism practices in public, private, and community media, should be read by professional and citizen journalists, academics, media activists, policy makers and media audiences concerned about the future of democratic journalism in Canada.

Today's globalization debates pit neoliberals, who favour even deeper integration into the global economy, against neo-mercantilists, who call for a relatively selective approach to globalization and the return to more interventionist industrial policies. Both sides claim to have the facts on their side. Inspired by the work of economists Ha-Joon Chang and Dani Rodrik, editors Andrew Smith and Dimitry Anastakis bring together essays from both historians and economists in this collection to test claims that wealth comes from either protectionism or free trade. With empirical research that spans more than a century of Canadian history, *Smart Globalization* demonstrates that Canada's success stemmed neither from complete openness to globalization or policies of isolation and self-sufficiency.

WINNER OF: Frantz Fanon Outstanding Book from the Caribbean Philosophical Association Canadian Political Science Association's C.B. MacPherson Prize Studies in Political Economy Book Prize Over the past forty years, recognition has become the dominant mode of negotiation and decolonization between the nation-state and Indigenous nations in North America. The term "recognition" shapes debates over Indigenous cultural distinctiveness, Indigenous rights to land and self-government, and Indigenous peoples' right to benefit from the development of their lands and resources. In a work of critically engaged political theory, Glen Sean Coulthard challenges recognition as a method of organizing difference and identity in liberal politics, questioning the assumption that contemporary difference and past histories of destructive colonialism between the state and Indigenous peoples can be reconciled through a process of acknowledgment. Beyond this, Coulthard examines an alternative politics—one that seeks to revalue, reconstruct, and redeploy Indigenous cultural practices based on self-recognition rather than on seeking appreciation from the very agents of colonialism. Coulthard demonstrates how a "place-based" modification of Karl Marx's theory of "primitive accumulation" throws light on Indigenous-state relations in settler-colonial contexts and how Frantz Fanon's critique of colonial recognition shows that this relationship reproduces itself over time. This framework strengthens his exploration of the ways that the politics of recognition has come to serve the interests of settler-colonial

power. In addressing the core tenets of Indigenous resistance movements, like Red Power and Idle No More, Coulthard offers fresh insights into the politics of active decolonization.
