"When we decided to write a nursing textbook, we wanted it to be written to the entry-level student, not about the student. We designed it so that students could truly understand what they are reading without the need for prior nursing experience or knowledge.

We wrote it to guide the student in developing simple problem-solving skills and then progressing to clinical judgment in real-world nursing. Our aim is to teach students to understand and connect the what, why, and how of safe and effective care"--

Each section balances

need-to-know narrative with step-by-step skills, and every chapter includes a detailed case study with a concept map to help you apply knowledge and use clinical judgement in clinical situations involving nursing skills.
